THE POPULATION OF MASSACHUSETTS

From the Earliest Times to 1915.

Explanatory Note. — The population figures as given herewith for the years specified from 1621 to 1755, inclusive, are estimates, the authority for which is a paper on the "Population of Massachusetts," by Joseph B. Felt, published in 1845 in the first volume of the Collections of the American Statistical Association, and apparently the result of careful research; the figures in the first column for the years 1637, 1654, 1665, and 1673 are the aggregates of the estimates given by Felt separately for those years of the population of the Plymouth and Massachusetts Bay Colonies, respectively; and the figures for the years specified from 1696 to 1755, inclusive, are estimates for the Province of Massachusetts.

Not until 1765 was there a definite census taken, but in that year the first general enumeration of the population of Massachusetts was undertaken in accordance with Chapter 275, Resolves of 1763–64, and Chapter 28, Resolves of 1764–65. The population as ascertained by this census is given in the text of the report of the State Census for 1865 (p. 176) as 238,545, and in the footing of a table (p. 204) as 238,423; while the report of the State Census of 1895 (Vol. I, p. 216) gives the figure as 239,764, and this is repeated in the State Census Report for 1905 (Vol. I, p. 902). These varying statements of the population by the Census of 1765 are probably the result of different computations based upon the document which had, up to 1905, been accepted as the authority for the population ascertained by this census, namely, a compilation published in the "Columbian Centinel" of Boston, August 27, 1822, as transcribed from a manuscript found by Judge Samuel Dana of Groton among the papers of a deceased friend. In 1905, however, there was published in Boston a monograph on "Early Census Taking in Massachusetts," written by the late Josiah H. Benton, Jr., who had come into possession of another manuscript copy of the Census of 1765 differing in some respects from the Centinel copy; and in view of Benton's careful research into the whole subject and his comparison of contemporary records, the tables given in his work have been accepted by the writer in making a new compilation for the State for the Census of 1765, with the resulting total here given. Various figures have also been published from time to time for the Census of 1776, but the tables of the State Census Reports since 1865 are consistent in placing the figure in 1776, including negroes and Indians, at 299,841, though the units as given in the manuscript records in the ar-

chives of the Secretary of the Commonwealth add to a total of 299,065; the difference is so slight, however, that the former figure, for the sake of uniformity, is carried in our table. The population figure 357,510 for 1784 is derived from Felt's article, though in a report of the General Court dated February 14, 1786, the figure is given as 356,542, but our early public functionaries were not always as accurate in making additions and subtractions as they might have been. The population figures as given in our table for the censuses succeeding that of 1784 do not appear, however, to be subject to dispute on the ground of authenticity or accuracy of compilation. The discrepancy which may be noted between the State and United States Census figures for 1840 and 1850 is, partly at least, due to the exclusion from the state enumeration in those years of "paupers and convicts in the State prison."

Estimated Population, 1621–1755.

Year	Population of Massachusetts	Plymouth Colony	Massachusetts Bay Colony
1621	–	51	–
1622	–	100	–
1624	–	180	–

PART II. — COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

EXPLANATORY 183
TABLE 14. Composition and Characteristics of the Population by Sex, for the State and for Cities and Towns, arranged Alphabetically 184–285

(A) The Number of Native and Foreign Born.
(B) The Number of *White* Persons classified by Native of Native Parentage, Native of Foreign or Mixed Parentage, and Foreign Born; the Number of *Colored* Persons, classified by Native and Foreign Born; the Number of All Other Persons (including Chinese, Japanese, Indian, and All Other), classified by Native and Foreign Born.
(C) The Number and Per Cent of *Illiterates 10 years of Age and Over;* the Number and Per Cent of *Native, Foreign Born, White,* and *Colored* Illiterates 10 Years of Age and Over; and the Total Number of Illiterates *21 Years* of Age and Over.
(D) The Number of *Persons* of *Voting Age* (*i.e.*, 21 Years of Age and Over), classified by Native and Foreign Born.
(E) The Number of *Foreign-Born White Males*, classified by Alien, Naturalized, Unqualified, and Unknown.
(F) The Number of Persons in Each of 21 Specified Age Periods.

TABLE 14 — *Concluded.* PAGE

(G) The Number of Persons 14 Years of Age and Over Engaged in Gainful Occupations as Distributed among the Following General Classes:

(1) Agriculture, Forestry, and Animal Husbandry.
(2) Extraction of Minerals.
(3) Manufacturing and Mechanical Industries.
(4) Transportation.
(5) Trade.
(6) Public Service (not elsewhere classified).
(7) Professional Service.
(8) Domestic and Personal Service.
(9) Clerical.

PART III. — NATIVITY, COLOR OR RACE, ILLITERACY, POLITICAL CONDITION, AGES, AND CONJUGAL CONDITION.

EXPLANATORY 288–310
Explanatory Notes 288
Nativity 289–296
Native and Foreign Born 289
Number of Foreign Born Living in Massachusetts in 1915 . . 289, 290
Increase of the Foreign Born 290–292
Distribution of the Foreign Born 292, 293
Parent Nativity 293–296
Color or Race 296, 297
Illiteracy 297, 298
Political Condition 299–304
Ages 304–306
Persons in the Dependent and Productive Age Groups . . . 306
Persons of School, Militia, and Voting Age 306
Conjugal Condition 307–310
The Age Factor 308–310
Comparison for the 25-Year Period, 1890–1915 310

PART I

GENERAL INTRODUCTION

AND

POPULATION TABLES

THE DECENNIAL CENSUS OF THE COMMONWEALTH.

GENERAL INTRODUCTION.

PURPOSE AND SCOPE OF THE CENSUS; PROVISIONS OF THE CENSUS ACT OF 1915.

The primary function of the Decennial Census of the Commonwealth, taken by the Bureau of Statistics under the general authority of Section 7, Chapter 371, Acts of 1909, is to determine, as required by Articles XXI and XXII of the Amendments to the Constitution, the number of legal voters in each city and town of the Commonwealth and in each ward of each city, and the number of inhabitants of each city and town.[1] The object in ascertaining the number of legal voters is to furnish a basis for the apportionment of representatives and senators in the General Court for the periods between the taking of the census.

The first census taken under these amendments was in 1857, the regular decennial series beginning in 1865. As each census period approaches the Legislature passes an enabling act defining, in more or less detail, the scope of the census and providing for the necessary expenditures. This legislation, however, has not been limited to the specific requirements of the Constitution, and from 1875 to 1905, inclusive, the enumerations of population and legal voters as required by the Constitution were not only elaborated so as to include the gathering of much data concerning the people themselves (*e.g.*, state and country of birth, parent nativity, color or race, ages, literacy, conjugal condition, occupations), but were supplemented by censuses of manufactures, agriculture, fisheries and commerce, and the collection of information upon numerous other subjects of public interest. In making provision, however, for the Census of 1915, the act passed by the Legislature (Chapter 692, Acts of 1914)[2] following the recommendations of the Director of the Bureau, contemplated a census much more limited in scope than any of the State censuses since 1875. That is to say, it made no provision for a census of manufactures or a census of agriculture, such as was formerly taken in conjunction with

[1] "A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June, in the year eighteen hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year eighteen hundred and sixty-five, and of every tenth year thereafter. In the census aforesaid, a special enumeration shall be made of the legal voters; and in each city, said enumeration shall specify the number of such legal voters aforesaid, residing in each ward of such city."

Prior to the adoption of these amendments there had been numerous more or less complete enumerations of the population of Massachusetts in addition to those made decennially by the United States under the provisions of the Federal Constitution.

[2] For the text of the Census Act see Appendix A.

the decennial census of population and legal voters required by the Constitution, and certain other subjects of inquiry in former censuses were also omitted from the scope of the Census of 1915, partly because of the expense involved and partly because it was felt that this class of information was obtainable through other official channels.[1]

The act providing for the Census of 1915 accordingly contemplated only censuses of population, and of fisheries and commerce, the schedules of the former to embrace, besides the inquiries necessary to obtain the information required by the provisions of the Constitution, "such other questions as may be deemed expedient by the Director of said Bureau (*i.e.*, the Bureau of Statistics), subject to the approval of the Governor and Council." The Legislature of 1914, however, passed a resolve (Chapter 120)[2] for securing "in connection with the decennial census certain information relative to aged and dependent persons" for the information of the Legislature in considering the subject of old-age pensions, so-called. Thus the chief functions of the Census of 1915 may be summarized as follows: —

1. To enumerate and determine the population and the number of legal voters in accordance with the requirements of the Constitution.
2. To collect such additional information relative to the composition of the population as might be deemed expedient by the Director of the Bureau of Statistics, subject to the approval of the Governor and Council.
3. To take a census of the fisheries and commerce of the Commonwealth.
4. To make a special investigation of the subject of aged dependents.

The Director of the Bureau of Statistics was also authorized (Section 9) "to cause to be prepared and printed in such detail and with such analyses as he may deem advisable tabulations of the various classes of information" gathered in accordance with the Census Act and, furthermore, "to prepare from information obtained in the census such tabulations from time to time as may be desired by any individual or organization and to charge therefor a reasonable sum based upon the cost of making the same." He was also directed to make an enumeration of any city, upon petition of the city government, "in such manner as to show the number of inhabitants and legal voters in each street, square, or

[1] The entire cost of the Census of 1905, $478,859.36, was $105,000 in excess of the cost of the Census of 1895. In preparing for the Census of 1915 it was estimated that were it to be taken upon the same scale and cost proportionately the same as that of ten years earlier, making due allowance for the growth of the Commonwealth in the decade, it would involve an expenditure of approximately $600,000. But by eliminating entirely censuses of manufactures, agriculture, and certain other subjects from the scope of the Census of 1915, and by modifying the schedule of inquiries for the Population Census, thereby materially simplifying the latter, which it seemed quite possible to do without substantial sacrifice of valuable statistical information, and in the conviction, also, that appreciable economies could be effected in administrative methods, especially in the field service, it was believed that $400,000 would cover the legitimate requirements of the Census of 1915, or about $200,000 less than would have been necessary had it been proposed to follow the scope and method of the preceding census, taking into consideration the increase in population since, and about $80,000 less than the actual cost of the Census of 1905. This belief was amply justified by the results, the cost of the field work, which was approximately $187,000 in 1905, being reduced to $132,000 in 1915, or 29.4 per cent, notwithstanding the population enumerated increased in the meantime 23 per cent.

[2] For text of this resolve see Appendix B.

avenue, or in such blocks or squares of the city as may be designated, and specifying the detail with which it is desired the results thereof shall be tabulated," the expense of such tabulations to be assessed upon the city.

The fundamental purpose of the State census, to which all other considerations are incidental and subordinate, is to comply with the requirements of the Constitution in the matter of determining the number of legal voters as a basis for the apportionment of representatives and senators in the Legislature. But while the Constitution requires a census of "legal voters" to be taken, it nowhere specifically defines the term, nor is it defined in any statute of the Commonwealth. It accordingly devolves upon the census-taking authority to determine what constitutes a "legal voter," and this has always been done by giving the most feasible interpretation to the several qualifications laid down in the Constitution, the possession of which seemed to be intended by that instrument as conditions prerequisite for the exercise of the franchise. From these provisions it appears that a legal voter may be defined as *a native male 21 years of age or over or a foreign-born male 21 years of age or over who has been naturalized either by his own act or that of his father, provided such person, whether native or foreign born has resided in Massachusetts one year and in the city or town six months and can read and write the English language and is not a pauper or under guardianship.*

The number of legal voters in the State and in each city and town is, therefore, a matter of deduction, being the number of persons in the entire population who can respond to these several qualifications. It should be noted that the term "legal voter" has within this interpretation a technical meaning quite different from the term "registered voter." A "legal voter," in other words, is a person who is a *potential* voter, that is, he possesses the qualifications necessary, under the Constitution, to enable him to register for voting purposes; but while he may thus be, in a constitutional sense, a legal voter, he can, of course, have no legal right to exercise the act of voting without conforming to an additional requirement imposed by a statute of the Legislature, namely, that of registration.

It is apparent that in order to ascertain the number of "legal voters" in the Commonwealth in accordance with the definition above given, it is necessary to obtain certain specific information regarding each individual in the population which is incidentally of very great value in throwing light upon the economic and social condition of the people. For example, since a person must be a male in order to come within the category of "legal voters," it is first necessary to classify the population by sex, — and to do this we must ascertain the number of males and females, respectively; again, a male in order to qualify for voting must be 21 years of age or over, — consequently it is necessary to ask every male person his age in order that those 21 years of age or over may be separated from

those under that age; it is necessary, also, that he be a citizen, — consequently we must ascertain his place of birth, and if it appears that he is foreign born, it becomes further necessary to ascertain whether he has acquired citizenship by becoming naturalized by his own act or that of his father; his period of residence in Massachusetts and in the city or town in which he resides must likewise be ascertained for each male, in order to determine how many have resided in the State one year and in the city or town of residence, six months; and since, in order to qualify for the franchise, he must be able to read and write the English language, we must determine who are able to do this. It is further necessary to ascertain how many male persons are paupers or under guardianship — a pauper being for the practical purposes of the census, one who from disease, intemperance, misfortune, or any other cause has become dependent wholly or partially upon public charity; and a person under guardianship being for census purposes, one whom it is necessary to keep under restraint, such as an inmate of a penal institution, an insane hospital, etc., as well as an idiot cared for in a private family.

In addition to the information necessary to procure for each male person of the population, in order to determine his political status under the Constitution, certain other questions, not specifically required by the Constitution, are customarily asked at each census for the purpose of securing certain data constantly called for by students of economic and social questions. Among these are inquiries regarding conjugal condition, so that we may know what proportion of the population is single, married, widowed or divorced; questions relating to parent nativity and occupation; also an inquiry for the purpose of ascertaining the number of totally blind persons in the community for the benefit of the Massachusetts Commission for the Blind in its work of caring for those afflicted in this manner. If only the requirements of the Constitution were to govern the taking of the census, it would be unnecessary to procure any specific information relating to females; but most of the questions asked for males are also asked for females, in order that we may have statistical information regarding the population, irrespective of sex, for social and economic purposes.

Aside from the elimination of provisions for collateral censuses of manufactures, agriculture, and other subjects such as had been included in the State's former census undertakings, the act under which the Census of 1915 was taken embodied one radical departure from custom which had prevailed with respect to each census of population and legal voters hitherto taken under the requirements of Articles XXI and XXII of the Amendments to the Constitution. This was in the matter of the census day, *i.e.*, the day as of which the enumeration was to be made. That day had uniformly been fixed in the enabling act for each recurring census as May 1, undoubtedly for the reason that formerly this was the date for the assessment of taxes and also, perhaps, because the precedent established

in 1857 and the somewhat awkward phraseology of the constitutional provisions bearing upon the point had created a doubt as to whether the Legislature had authority to fix any other date. The great increase, however, in recent years in the number of people who leave their usual place of abode each year before May 1 for summer residence elsewhere, together with the fact that subsequent to the Census of 1905 the date of assessment had been set forward by the Legislature to April 1, prompted me to call attention to the desirability of changing the census day to that date which, if done, would facilitate a more complete enumeration and at the same time make it possible to check the enumerators' returns to the assessors' lists; hence April 1 was fixed as the census day in the Census Act, — although the question of the constitutionality of fixing a date other than May 1 was raised while the bill was pending.[1] But just prior to April 1, 1915, it was wisely deemed to be of the utmost importance, since the validity of the legislative apportionment to be made in 1916 might prove to be involved, that all doubt with regard to the point should be decisively settled by the highest authority in the Commonwealth. Consequently, on March 24, 1915, the House of Representatives passed an order requiring the opinion of the Justices of the Supreme Judicial Court. Their decision was favorable to proceeding on the date selected, the Court ruling that "under the Constitutional provision now in force the General Court may fix the first day of April as the date on which the census may be taken in any year following 1865."[2] The authority of the Legislature to meet changing conditions by fixing any day in the calendar year which is the decennial anniversary of the year 1865 as a date as of which the enumeration required by the Constitution shall be made, would therefore seem to be no longer open to question.

ORGANIZATION AND PRINCIPAL PERSONNEL OF THE CENSUS OF 1915.

The taking of the Decennial Census of the Commonwealth, as required by the provisions of Articles XXI and XXII of the Amendments to the Constitution is a work, which, in magnitude and complexity of detail, has no analogy in any other branch of the State service, involving as it does an undertaking in which the field work must be prosecuted rapidly within a limited space of time by a large force of temporary employees, without previous experience, who are expected to work for small compensation. It is necessary, therefore, at each census to transfer to the census staff a certain number of the regular employees of the Bureau of Statistics who are experts on this work, for the purpose of perfecting the organization and carrying the task through to completion, and there were eight such transfers to the Census of 1915 for a considerable period of the duration

[1] House Journals for 1914, June 1, 3, 4, 5.

[2] For text of the Order of the House and the Opinion of the Court, see Appendix C.

of the work upon the same (in addition to the Director and Deputy Director). This organization and its principal personnel (not including special agents and district inspectors) was as follows: —

Administration Division. — *Charles F. Gettemy, Director, and William G. Grundy, Deputy Director*, in immediate charge. This division made all the preparations for the census, the Director devising the schedules, appointing and organizing the field staff of about 2,000 persons, from among some 4,500 applicants, and the office staff of 200 employees at its maximum, preparing the examination papers used as a basis of appointments, the instructions to enumerators and the rules to be followed in editing schedules, and determining the classifications for the preparation of data for publication. The immediate duties of the Deputy Director embraced the laying out and planning of the field and office work of the census, the preparation of town and city maps, the division of the State into about 2,100 enumeration districts and 43 inspectors' districts, and describing the boundaries of the same, the preparation of forms and blanks, assisting the Director in preparing instructions to enumerators, the organizing of the field work and collecting of material, the checking and examining of returns, organizing and planning the work of examining, coding, punching, verifying, counting, sorting, and tabulating the population schedules and punched cards, from which the census tabulations are made, answering inquiries of the public in regard to census data, keeping of office records and accounts and the preparation of maps and checking of the assessors' block system of Boston. He also had general supervision over the Fisheries and Commerce Census and of special inquiries and tabulations called for by the Legislature and commissions or departments, in accordance with the census law, and the preparation of statistical tables and copy for census publications, as outlined and determined by the Director.

Division of Examination of Schedules, Coding and Hand Count of Population. — *Annie L. Flynn, Chief.* This division was organized into seven sections, each consisting of a group of clerks, segregated in separate rooms as far as possible, with a clerk in charge. Clerks employed for service in this division were first given preliminary oral instructions by the Chief of the Division, and then assigned to one of the several sections, being thereafter under the immediate supervision of the clerk in charge of the section. The clerks in charge of the several sections of this division were: Annie L. Flynn (Chief of Division), Mary M. Coakley, Laura G. Dillingham, Katherine F. Gorman, Gertrude A. Lambert, Helena E. Reardon, Edith M. von Kamecke. Miss Flynn, Chief of this division, began her duties in connection with the Census of 1915 on July 1, 1914, working through the remainder of that year in assisting the Director and Deputy in the making of the preliminary preparations. Her work during the preliminary period included assisting on the verification of boundaries of maps for the enumeration districts and the assessors' blocks of Boston, preparing various forms and blanks, etc., rating examination papers for inspectors and enumerators, and supervising the clerical part of the publicity work (circulars to women's clubs), listing designations of appointments, making out inventories of material to be shipped to enumerators, keeping records of oaths, commissions, etc., mailed and received, mailing post cards, notices, etc., dividing districts where necessary, instructing special agents, inspectors and enumerators. During the period of editing and coding, she had under her supervision an aggregate of about 130 clerks, whom she instructed in editing and coding according to directions as formulated by the Director and Deputy Director; she personally worked with each individual clerk on at least one enumeration district in order to test her ability; dictated correction letters; verified, either by letter or telephone or research work, various

returns on the schedules which seemed improbable or unknown to clerks, etc.; supervised the hand count of males and females, the legal voters, the count for 65 years and over, special tabulations, tabulations of dwellings, families, rooms, and villages, precincts of cities and towns, population by assessors' blocks of Boston, and aggregation of census reports; and kept various work and efficiency records.

Card Punching and Verification Division. — *George A. Gerrish, Chief.* The nature of the work performed in this division is described on page 24. The specific duties of the Chief of the Division included responsibility for the proper instruction of the operators of the machines; maintaining discipline; keeping an attendance record; keeping a record of the districts received for punching and verifying, that none be omitted or duplicated; keeping a record of the time consumed in punching and verifying each district, a record of the number of cards punched or verified by each clerk per month, and the number of errors, partly as a basis for payments by the bonus system and partly as a basis for cost accounts; assembling the punched cards into units (a unit being a town or city ward) for the Counting and Sorting Division. Mr. Gerrish entered the Census Office as a special agent and was Inspector of Population Enumerators in a Boston district before being made Chief of Division.

Counting and Sorting Division. — *Robert A. Warren, Chief.* The work of this division in the counting and sorting of the punched cards by machines preliminary to tabulation of the census data is described on page 31. It was the duty of the Chief of the Division under the direction of the Director and Deputy Director to draw up all machine report forms so that when the data were taken off, they would be comparable with former State and Federal censuses; and to prepare forms and card indices for the keeping of the records of the department. He also had to determine the priority of the various machine reports and the methods of sorting, and was custodian of all punched cards. He also did most of the minor repairing and was responsible for the condition of the machines. The adding and checking of the machine reports as they had been run on the machines, as well as the aggregation of the majority of the reports, was under his supervision. He came into the Census Office as an Inspector in charge of Population Enumerators in Waltham.

Division of Fisheries and Commerce. — *Charles Thompson, Chief.* This division was organized to have charge of the special canvass made for the Fisheries and Commerce Census, and was placed in charge of Mr. Thompson, who had been connected with the Bureau as a special agent since 1891, having been employed on censuses in the meantime both as an inspector of population enumerators and as a special agent on agricultural and fisheries and commerce censuses, and between censuses as a special agent in the collection of industrial data. He was transferred from the Bureau staff to the census in the autumn of 1914, being first engaged on important preparatory work, then as an Inspector of Enumerators in Lawrence, and finally being placed in charge of the Census of Fisheries and Commerce; and he was also called upon to have charge of editing and tabulating the information required for the preparation of the list of Civil War Veterans. On August 31, 1917, Mr. Thompson having been in the employ of the Bureau 26 years and being a veteran of the Civil War, 75 years of age, was retired on his own petition by the Governor in accordance with the provisions of the Veterans' Retirement Act, so-called.

Division of Aged Dependent Inquiry. — *Roswell F. Phelps, Chief.* This division was organized to have charge of the Special Aged Dependent Inquiry undertaken in accordance with the provisions of Chapter 120, Resolves of 1914. A large part of the information in connection with the inquiry was not obtainable through

the census, but had to be secured by means of a special canvass and conducted chiefly by correspondence, though certain basic data were derived from the census schedules. Mr. Phelps was placed in charge of this inquiry by virtue of his position as Chief of the Labor Division of the Bureau of Statistics. He had no direct connection with the regular organization of the census, except to take the data especially tabulated from the schedules for the purposes of the Aged Dependent Inquiry and adjust the same to the requirements of the inquiry. This brought him into close relations with the Census Office and by virtue of the fact that the additional clerical expense involved by the inquiry was paid from the census appropriation, he and the clerks working under him were classified for the time being as a division of the Census Office.

Division of Results. — *William G. Grundy, Chief; Annie L. Flynn and Robert A. Warren, Assistants.* This division was organized to have charge of the tabulations of data from the machine reports and the preparation of printer's copy for the published results of the census.

Division of Accounts. — *William W. Boardman, Chief.* The proper accounting for the expenses of the census and their classification, so that the cost of the various branches of the work could be independently ascertained at all times during the progress of the work and so that a definite basis might be had for estimating the cost of future censuses, made necessary the creation of a Division of Accounts. (See "The Census Finances," p. 29.) The Chief of the Division, Mr. Boardman, was selected from the staff of Examiners of Accounts, attached to the Municipal Division of the Bureau of Statistics, from which he was transferred on December 2, 1914, for a period of three years.

The following regular employees of the Bureau of Statistics not mentioned above were transferred to the Census Office from time to time for extended periods: —

Charles C. L. Moore, who had been for many years a special agent of the Bureau of Statistics, with experience on former censuses, was employed as a field agent in collecting preliminary information for the organization of the census, then as an Inspector of Population Enumerators, and again as a traveling special agent in the investigation of numerous questions arising from time to time in various parts of the State which required the service of some person of experience in census work to properly adjust. Mr. Moore having attained the age of 70, was retired from the service on August 21, 1916, under the retirement act.

Alice S. Gerrish was transferred from the Bureau to the Census Office for a period of practically a year, being engaged, by virtue of her experience on this branch of the work in former censuses, in assisting in the laying out and description of enumeration districts and in taking charge of the designation of interpreters and in keeping interpreters' records.

Lura E. Carlson, a regular stenographer of the Bureau, by virtue of her general proficiency and familiarity with census procedure, was transferred to the Census Office for the period September 1, 1914, to June 1, 1917.

Charles P. Sliney, a special agent in the Labor Division of the Bureau, was transferred to the Census Office and served from February 1, 1915, to September 1, 1916, being given entire charge of the shipment of schedules and their custody, a position requiring great aptitude for and appreciation of the importance of accuracy of detail in the keeping of records, so that in the case of the several million schedules, segregated into 2,100 parcels which were constantly changing hands, the location of the same could be told at all times.

PREPARATIONS FOR THE ENUMERATION.

Publicity.

A campaign of publicity is deemed necessary in connection with the census, in order that the public may be of a receptive mind concerning it and be prepared to furnish the enumerators with the desired information when the canvass begins. Somewhat more elaborate preparations were made and carried out in this respect in connection with the Census of 1915 than had been formerly done. Forty-five thousand copies of a leaflet embodying the questions to appear on the population schedules, with a brief statement of the object of the census, were sent to the membership of the women's clubs throughout the State; and 10,000 copies of a pamphlet entitled, "Why the Census is Taken," and embodying a brief sketch of the origin and development of census taking, were sent to various organizations, school teachers, and others in a position to distribute the same effectively. The Governor of the Commonwealth issued a proclamation[1] which was translated into seven languages, copies being printed in French, German, Italian, Polish, Swedish, Yiddish, and Portuguese, and these were distributed to churches, libraries, schools, and other organizations, arrangements being made to have the same read from the pulpits, and by teachers in the schools; and publication being secured in foreign language newspapers.

Census Office.

Owing to the fact that adequate office facilities for the census, which requires at the maximum approximately 200 clerical employees, cannot be furnished within the State House, it is necessary at each recurring census period to find suitable quarters elsewhere. For the purposes of the Census of 1915, accordingly, a former dwelling house was leased at 24 Mt. Vernon Street, in close proximity to the State House, being suitably re-arranged, equipped with the necessary shelving for the accommodation of some 5,000,000 schedules and 4,000,000 punch cards, so-called, and duly inspected for the strain to which the floors would be subjected by the installation of the machinery to be used in preparing for the tabulations.

Preparation of Schedules and Forms.

The act to provide for taking the Decennial Census of 1915 was approved by the Governor on June 20, 1914, and on July 7 a resolve making an initial appropriation of $15,000 for the work was signed. From that time the task of preparation and organization was prosecuted vigorously and as rapidly as possible, the specific inquiries to be asked on the population schedules, as devised by the Director of the Bureau of Statistics, being officially approved by the Governor and Council, in accordance with the provisions of the act, on July 15.

---

[1] See Appendix D.

The matter of determining the precise form of the schedules was the subject of considerable preliminary study. The Massachusetts Population Census has been taken for several decades by means of card schedules; that is to say, the information obtained for each individual and each family was entered by the enumerator on a separate card (a supplementary card schedule being used for obtaining certain special information regarding veterans of the Civil War), the cards for males, females, and families being of different, distinctive colors (male, blue; female, red; family, yellow; veterans, white), and this method having been found to lend itself more conveniently to the office processes of editing, classifying, and tabulating than a schedule, such as is used by the United States, consisting of a single sheet on which the information for a large number of individuals is entered, it was again adopted for the Census of 1915. Since it is desirable that the cards be of a size convenient both for carrying in the enumerator's pocket and for handling in the office, it is necessary to condense the inquiries, with the spaces provided for the answer to each, into the smallest possible compass consistent with affording opportunity for clear and legible entries. The dimensions of the schedules for the Census of 1915 were, accordingly, $3\frac{7}{8}$ by $6\frac{7}{8}$ inches.[1]

The next most important form to be prepared is the Enumerator's Instruction Book, and although the process of taking a census has, from long experience, become in its general aspects standardized, and the procedure followed both by the United States and by Massachusetts for the field canvass is substantially the same, certain variations and modifications in matters of detail, partly due to changing conditions and partly to improved methods suggested by experience, have always been found necessary at each census, so that a careful, minute revision of the instruction book must be made in preparing for each new enumeration. This book for the Census of 1915 consisted of 43 pages of text, together with facsimiles of the schedules.

A memorandum book, styled the Enumerator's Street Book, is also found to be necessary for the purpose of checking the enumerator's work as to completeness of the canvass. In this book the enumerator is instructed (1) to make a record of each house, apartment building, or other dwelling place at which he did not secure on the occasion of his first visit all the information required to be entered on the population schedules, thus necessitating a second visit; (2) to account for each closed house or apartment; (3) to account for each house, public building, business building, shop or manufacturing establishment, whether consecutively numbered or not, for which there are no residents to be returned; (4) to account for each vacant lot or public square which, in the consecutive order of numbering on any street or avenue, represents house numbers for which no entries of population can be made; (5) to account for new streets, avenues, etc., for which there are no residents to be returned; also streets,

[1] For facsimile of the schedules, see Appendix E.

avenues, etc., having houses on one side of the thoroughfare only. Thus, by means of the street book and the population schedules combined, the enumerator is expected to account for each and every building or space within the limits of his district, whether inhabited or not, so as to provide the means for judging as to the thoroughness of his house-to-house canvass and, in general, the completeness and accuracy with which his work is performed.

In addition to the preparation of the schedules and the enumerator's instruction and street books, there also had to be devised for the use of the enumerators and special agents, and in keeping the various records required by the clerical and mechanical processes of the office and for tabulating purposes a total, for the Census of 1915, of some 164 printed forms.

Division of the State into Enumeration Districts.

Of fundamental importance in preparing for the taking of a census is the division of the State into geographical units, termed enumeration districts, and the assignment of each of these districts to a canvasser, styled an enumerator, whose duty it is to perambulate his district and list or "enumerate" each person in the population thereof upon schedules furnished him for the purpose, the enumerators in the cities and large towns being under the immediate direction of inspectors appointed for areas composed of a convenient number of enumeration districts.

The enumeration district is the basic, physical unit of the entire census from the first field work through the final tabulation, and it is therefore of the utmost importance that these districts be laid out with great care and their boundaries be determined with absolute accuracy, not only by lines drawn on maps, but by written descriptions in language so explicit that there can be no question as to the precise area included in each of the several units; and while the same general method of procedure is followed in this respect at each census, a new division of the State into enumeration districts must, nevertheless, be made in preparing for each recurring census, since increasing and shifting population, changes in boundary lines of political sub-divisions (such as wards, precincts, etc.), the laying out of new streets, changes in street names, etc., render useless the enumeration districts as laid out for any one census for the purposes of a subsequent enumeration.

The fact that it is absolutely essential to a complete and intelligent enumeration, not only for the guidance of the enumerator in the field, but to enable the office to properly check his work, makes necessary the accumulation in advance of a considerable amount of information which can only be acquired by sending agents over the State. In preparing for the Census of 1915, this work was performed during the autumn of 1914 by the Deputy Director and three agents assigned for the purpose. The most recent maps were first collected through correspondence from as many municipalities as could furnish the same, by purchase from map

makers, and by making photographic copies of topographical survey maps in the possession of the Harbor and Land Commission. The latter showed only main highways and even for these no names appeared; they formed, however, an excellent basis to work upon and were taken by the agents direct to the local authorities, who were requested to furnish a list of streets and highways laid out and names which did not show on the maps, and to indicate where such highways should be drawn; whereupon they were inserted with pen and ink and the names inked in. This process was also followed with reference to city maps, including those of quite recent date, it being particularly important that the names and proper location of principal thoroughfares which might be bounding lines of wards and precincts should be brought strictly up to date.

In every census one of the most fruitful causes of confusion is the transgression by enumerators, through carelessness or misreading or misunderstanding of instructions, of the boundary lines of their districts and their enumeration of population in adjoining territory to which other enumerators have been assigned, thus creating complications and difficulties almost without number, which must be rectified in order to avoid duplications in the count and to insure that each political sub-division has returned for it its proper population and no more. A greater amount of preliminary work in the preparation of adequate maps, which had to be made in duplicate and sometimes in triplicate, was undertaken in preparing for the Census of 1915 than had been done for any previous census, and with results which were quite justified, since the maps supplied the enumerators throughout the State for the Census of 1915 were more complete and correct in detail than at any previous census, and there were, as a consequence, fewer difficulties in the actual taking of the census because of the transgressing of boundaries by enumerators than ever before.

Maps for each of the 353 cities and towns having been obtained and supplemented with the necessary collateral memoranda by correspondence and field agents, the division of the Commonwealth into enumeration districts is then undertaken, the bounding lines of the districts being indicated on city and town maps and determined in accordance with certain necessary rules and recognized principles of census procedure, a description of which in some detail may be found on the files of the Bureau. The area embraced within each district must then be made the subject of a text description, which for approximately 2,100 districts, and involving careful comparison of the descriptions with the maps, is slow, tedious, monotonous work; but there is no single process in the whole organization of the census of greater importance, since the slightest error in describing a boundary line is likely, either to leave an area unassigned, with the result that the population may be omitted from the enumeration, or, by overlapping, may result in a duplication of the canvass of certain streets or blocks and create a confusing situation involving delay and expense to straighten out. The total number of enumeration districts into which

the Commonwealth was divided for the Census of 1915 was 2,099. This number included 104 so-called "institution districts," — the larger public institutions, and certain private institutions containing a more or less constrained or permanent population living on the premises, being segregated from the population of the area in which the institution is located and the superintendent or some person designated by him being appointed an enumerator therefor; it also included 62 "x" districts, so-called, *i.e.*, extra districts resulting from the sub-division of a regular enumeration district owing to sickness, death of enumerators, or the necessity of speeding up the field work.

Enumeration of Boston by the "Block System."

By Section 3, Chapter 692, Acts of 1914, the Director of the Bureau was given authority to enumerate the population of any city "in such manner as to show the number of inhabitants and legal voters in each street, square, or avenue, or in such blocks or squares of the city as may be designated." Boston was the only city which took advantage of this provision and the City Council on October 26, 1914, — responsive to the representations of the Chamber of Commerce, the Planning Board, and others interested in intensive studies of local economic conditions — passed the following order which was approved by the Mayor on October 28: —

> *Ordered:* That, in taking the coming Decennial Census, the Director of the Bureau of Statistics be hereby requested to make an enumeration of the City of Boston, giving the number of inhabitants in each of the Assessors' Blocks established by the Assessors of the City of Boston.

Generally speaking, an assessors' block is a parcel of land bounded by public thoroughfares or physical boundary lines; and the city of Boston in 1915 was plotted into 4,582 such blocks. The system of designating these blocks by numbers and letters which has grown up in the Boston assessors' office over a long period of years is extremely complicated and involved a great amount of expert clerical work upon original records before maps and descriptions could be made of each of the 4,582 blocks in order that the enumerators might be properly instructed to make the canvass of their respective districts in such a manner that the schedules for these small units could be segregated and their population reported separately. The principal purpose served in a tabulation of population for such a small unit as the assessors' block is to enable studies to be made of the movement of population from one section to another, its decline in the business areas, increase in residential areas, and also to trace changing real estate values and social conditions. The assembling of such small units can also be readily made into various combinations to obtain the population of any desired area, such as precincts, — which the City Council may

establish at will, — judicial districts, postal districts, etc. A return of the population of Boston by assessors' blocks was filed with the City Clerk May 17, 1917.

Selection of the Field Force.

By Section 2, Chapter 692, Acts of 1914, authority was given for the appointment of enumerators, inspectors, and special agents " in accordance with such rules and tests as the Director may, with the approval of the Civil Service Commission, devise for this purpose; provided, however, that enumerators shall be, so far as practicable, residents of the cities and towns for which they are appointed." A form of test was accordingly devised for determining the qualifications of such appointees, which was approved by the Civil Service Commission September 29, 1914. This test consisted of a series of questions accompanied by facsimiles of the population schedules and a narrative history of an imaginary family such as was calculated to elicit from applicants for these positions their practical qualifications for securing and entering upon the schedules the required information in accordance with a pamphlet of instructions prepared and furnished them in advance.

Candidates for the position of special agent and inspector were examined at the Census Office on January 12, 1915, 83 participating in the test, as a result of which 43 appointments were made, the examination being the same as that to which candidates for enumerators' positions were subsequently subjected, but being supplemented by conferences at which the agents and inspectors were given verbal instructions by the Director and Deputy Director and permitted to ask questions as to their duties. The distinction between *special agents* and *inspectors* consisted in the fact that the latter were appointed with a view to having personal supervision over the enumerators of a given territory and were required to inspect their schedules from time to time for the purpose of testing the enumerators' understanding of their duties and to act, in general, as representatives of the Census Office in particular territory assigned. Usually inspectors were appointed only for city districts, although in some cases groups of towns presenting especially difficult local conditions, or towns immediately adjacent to a city, were placed under the supervision of an inspector; but it was not deemed practicable to appoint inspectors for large areas embracing several towns having only one enumerator each, since it would be impossible for an inspector in such a district to assemble, or keep in personal touch with, the enumerators; the enumerators in the greater portion of the State, outside the cities, therefore, were subject only to such supervision as could be provided directly from the Census Office or by a visitation from a special agent where peculiar difficulties were encountered. The *special agents* were supposed to have a more intimate knowledge of census procedure than the inspectors and were not assigned to particular districts, but were kept engaged on special assignments in territory where

there were no inspectors, the special agents being, with a few exceptions, recruited by transfer from the regular force of the Bureau of Statistics or from persons in the community who had had similar experience in former censuses.

Beginning in the autumn of 1914 and continuing practically up to the date of enumeration, April 1, 1915, the office was constantly in receipt of applications for enumerators' positions, although every effort was made to have as many applications as possible filed by the end of January. There were approximately 2,100 such positions to be filled, for which there were 8,184 applicants, of whom, however, only 4,567 actually took the examination. The surplus of not much more than an average of two to a district, while in some localities it was sufficient to afford a good margin for selection, was offset by a deficiency in other communities; yet because of the expense and temporary character of the work, it was not feasible to shift enumerators to assignments in other communities than those in which they resided. In all localities in which the applications were sufficiently numerous to justify the holding of a group examination, the candidates were so examined, but where such a group examination was not feasible, the applicants were permitted to take the examination at home by filling out the blanks and returning them to the Census Office. Practically every candidate was thus required to submit to a written examination calculated to test, in some measure, the extent to which he had familiarized himself with the instructions as a basis for determining his qualifications for the work. A force of clerks certified from the regular eligible lists of the Civil Service Commission was employed during February and March in marking and grading the papers.

Appointments were then made upon the basis of the ratings of the applicants, though in some cases it was necessary to depart from the strict ranking order of those who had passed the test and, in the interest of as efficient and economical a canvass as possible, to take into account the age and sex of the applicant, the language spoken by the population in certain localities, or other wholly impersonal considerations. This work of designating enumerators and assignment to districts is one of the most arduous and difficult of any connected with the census, and for this reason it was performed personally by the Director with the assistance of the Deputy Director; it involved consulting the maps and descriptions of each district, a careful scrutiny of the test papers and application forms showing age, sex, and nationality of the applicants, and in many cases the office records of enumerators on former censuses, and in preparing for the Census of 1915 it had to be done almost entirely at night, that is, between 5 P.M. and 12 midnight and often later, over a period of several weeks, for the reason that the regular office hours during the day were devoted to other equally imperative duties. One enumerator was appointed in 1915 for each enumeration district, but in numerous cases when an enumerator had finished the canvass of his first district, he was appointed for another for

which no suitable person had been found. The number of separate enumeration districts and the total number of enumerators[1] employed on this census are shown by the following statement: —

Enumeration Districts as originally laid out, exclusive of institutions		1,933
Enumeration Districts set off from the original districts after the enumeration had begun		62
Total field enumeration districts		1,995
Institution districts		104
Total enumeration districts		2,099
Number of enumerators, exclusive of institutional, appointed for one district only	1,847	
Number of enumerators, exclusive of institutional, assigned to more than one district (including two enumerators, each of whom had one regular district and one institution district)	72	
		1,919
Number of institutional enumerators, appointed for one district only	62	
Number of institutional enumerators appointed for more than one district	17	
		79
Total number of enumerators		1,998

THE ENUMERATION: SUPERVISION AND CHECKING OF FIELD WORK.

As above stated, 43 inspectors were appointed whose duties were to meet and verbally instruct the enumerators of certain defined areas in their duties in advance of the enumeration, to check the canvass during its progress by a limited examination of the schedules, correct misunderstandings or misinterpretations of instructions, supplement faulty work of enumerators by enumerating omitted population and, in general, act as intermediaries between the Census Office and the field. Only the cities and, in certain cases, adjoining towns, and certain groups of towns presenting special problems due to congested or exceptionally cosmopolitan population, were set off as inspection districts, the largest number of enumeration districts or enumerators over which any inspector had jurisdiction being 58, and the smallest, 21. These districts, the number of

[1] Of the 1,919 individual enumerators of territory outside of institutions, 1,499 were males and 420 females; 1,905 were white, 11 were colored, one was an Indian, one a Chinaman, and one a half-breed; 135 were under 20 years of age, 932 were 20 to 29 years of age, 800 were 30 to 60 years of age, and 52 were over 60 years of age; 1,752 were native and 167 foreign born. Of the native, 1,511 were natives of Massachusetts; of the foreign born 43 were natives of England, 38 of Canada, 26 of Russia, 25 of Ireland, while 12 other countries were represented by from one to nine enumerators each. Four hundred and thirty-seven occupations were represented among the enumerators.

enumerators under supervision in each case, and the inspector in charge were as follows: —

Districts	Number of Enumeration Districts	Inspectors
No. 1, Boston, Wards 1 and 2;[1] Winthrop	36	William S. Forster.
No. 2, Boston, Wards 3 and 4; Somerville, Wards 1, 2, and 4	38	Frank F. Morse.
No. 3, Boston, Ward 5	43	Philip Davis.
No. 4, Boston, Wards 7 and 8	41	Frederick W. Ringdahl.
No. 5, Boston, Wards 6, 9, and 10	55	Charles C. Lee.
No. 6, Boston, Wards 12, 13, and 14	47	Thomas F. Dolan.
No. 7, Boston, Wards 15, 16, and 22	38	Bernard L. Gorfinkle.
No. 8, Boston, Wards 11, 17, and 18	38	Albert C. Sawyer.
No. 9, Boston, Wards 19, 20, and 21	31	John A. Sullivan.
No. 10, Boston, Wards 23 and 24	22	Thomas E. Clifford.
No. 11, Boston, Wards 25 and 26; Brookline	31	George A. Gerrish.
No. 12, Chelsea and Everett	35	John D. Smith.
No. 13, Revere, Saugus, and Lynn, Wards 6 and 7	29	Fred J. C. Brady.
No. 14, Lynn, Wards 1 to 5, inclusive	35	Herbert A. Caswell.

No. 16, Waltham and Woburn	26	Robert A. Warren.
No. 17, Cambridge, Wards 1 to 8, inclusive	39	Edwin A. Holmes.
No. 18, Cambridge, Wards 9, 10, and 11; Arlington and Belmont	23	George H. Jennings.
No. 19, Newton and Watertown	27	William H. Rand.
No. 20, Somerville, Wards 3, 5, 6, and 7; Medford	38	John H. Thomas.
No. 21, Quincy, Braintree, and Weymouth	32	Alfred M. Richardson.
No. 22, Brockton and Whitman	34	Walter H. Gilday.
No. 23, Taunton, Attleboro, and North Attleborough	36	Dwight M. Miner.
No. 24, Fall River, Wards 1, 2, 3, 7, 8, and 9	42	Harry F. Downs.
No. 25, Fall River, Wards 4, 5, and 6; New Bedford, Wards 1 and 2	38	Henry A. Stone.
No. 26, New Bedford, Wards 3 to 6, inclusive	33	Charles E. Hardy.
No. 27, Salem, Peabody, and Marblehead	30	Frank A. Williams.
No. 28, Newburyport, Amesbury, Newbury, Rowley, and Ipswich	21	Charles I. Somerby.
No. 29, Gloucester, Rockport, and Beverly	27	Elliott Adams.
No. 30, Haverhill and Methuen	33	Frank E. Mahon.
No. 31, Lawrence	46	Charles Thompson.
No. 32, Lowell	58	Alexis F. Fecteau.
No. 33, Fitchburg, Leominster, and Clinton	37	Timothy J. Cahill.
No. 34, Marlborough, Framingham, Natick, and Milford	27	Charles F. McCarthy.
No. 35, Worcester, Wards 4 to 8, inclusive	42	Timothy F. Larkin.
No. 36, Worcester, Wards 1, 2, 3, 9, and 10	41	Frederick W. Hurlburt.
No. 37, Springfield, Wards 1, 2, and 3; and Chicopee	36	Chester W. Allen.
No. 38, Springfield, Wards 4 to 8, inclusive; and West Springfield	34	William H. Trowbridge.
No. 39, Northampton, Amherst, Easthampton, Greenfield, and Montague	30	Prof. F. Stuart Chapin.
No. 40, Holyoke, Westfield, and South Hadley	42	Michael H. Toomey.
No. 41, North Adams, Adams, and Pittsfield	39	James W. Maher.
No. 42, Islands in Boston Harbor (exclusive of Institutions), tug boats, and other craft, Boston fishermen, Special District	–	Abram H. Nelson.
No. 43, Southbridge, Charlton, Auburn, Oxford, Dudley, Webster, and Douglas	23	C. Hawley Moore.

[1] Except the islands in the harbor, which were enumerated by a special agent separately assigned for the purpose.

The enumerators in the remainder of the State not embraced within the inspection districts were supervised directly from the Census Office by correspondence through a system of daily reports, supplemented by visitations of special agents in cases of particular difficulty. During the period of the enumeration the daily mail of the office is of great magnitude and must be handled expeditiously. The incoming reports, cards and letters are accordingly first sorted by enumeration districts and distributed among "correspondence clerks," of whom for the Census of 1915 there were seven, each in charge of approximately 300 districts. Where possible to segregate inquiries, or where the answer to an inquiry was considered such that all enumerators should have the benefit of it, form letters were prepared, but in a majority of cases, the proper answer to the inquiry could be found by consulting the instruction book and in such cases the original inquiry was returned to the writer with the phrase "See Paragraph —, Instruction Book" stamped across the face, — there being no time to dictate and have

written out a more formal reply. In case the correspondence clerk could not answer the inquiry, she passed it on to the head of the division, an experienced expert in census procedure, who, with an assistant, was kept occupied answering especially troublesome inquiries, many of which required rulings from the Director. Correspondence pertaining to employment of interpreters was delivered to the head of the Correspondence Division who had general charge of this part of the work and kept the necessary records. Requests for interpreters in districts under the supervision of inspectors were received directly from the inspectors and all correspondence pertaining thereto was handled through the inspector; in districts not under supervision of inspectors, the arrangements were made by correspondence direct between the Census Office and the enumerator.

In 62 cases in the Census of 1915, owing to various conditions, such as a district being found to be too large or an enumerator making too slow progress, it was found necessary to sub-divide the original enumeration district. This required careful and accurate consideration of the work already performed and a clear understanding of what was necessary to be done in order to define the boundaries of the extra or "x" district, so-called. Wherever it was impossible for the originally appointed enumerator to continue with the work, it was necessary to obtain through the medium of the inspector a list of all of the "back calls" and unenumerated territory so that the new appointee could be thoroughly instructed and not duplicate any of the work of enumeration; and then to set off the unenumerated territory as a new district. This district had to be described, a map made for the same, and a description and map of the old territory modified, so that the work of enumeration in both the "x" district and that part of the original district remaining would not conflict. All this work required very close supervision and records, so that the work when received in this office could be properly handled and checked in order to determine the fact that the entire original enumeration district had been properly enumerated.

The schedules from some of the smaller districts begin coming into the office within a few days after the enumeration begins, but it is usually about three months before the last returns are made,[1] delays being due to various causes, — such as failure to find, prior to the census day, competent enumerators willing to take the position; inability of enumerators in some cases, even though appointed by the census day, to begin work immediately or to give all their time continuously to it; sickness, negligence, etc. Unfortunately, only in extreme cases of clear malicious neglect of duty, and where there is available material from which to make another appointment, is it feasible to dismiss an enumerator after he has once started upon the canvass of his district, since to do so means either an entire re-canvass of that portion of the district already canvassed for the

[1] The first district from which returns were received in the Census of 1915 was that consisting of the town of Mount Washington, which reported April 12; the last to report was a district consisting of a part of the town of Southbridge, on July 2.

sake of insuring a complete canvass of the entire district, or a careful explanation by the deposed enumerator to his inspector of the condition of the work at the time it is turned over to the new appointee, — which, if the original enumerator is being dismissed for disciplinary reasons, is unlikely to be accomplished satisfactorily. In view, therefore, of the not infrequent unwillingness of enumerators, after finding that the duties expected of them are not as simple and easy as they had anticipated, to continue on the work, even though leaving it may mean forfeiture of pay, and the fact that the resulting confusion is likely to be more difficult to cope with than slow progress, the Census Office is confronted with a condition which it is obliged, by virtue of the peculiar character of the undertaking and the ephemeral nature of the employment, to tolerate as patiently as possible.

The tardiness of a certain percentage of enumerators, however, in sending in their returns does not interfere with the office organization necessary for the examination of the schedules, for the returns are invariably received more rapidly than the office staff can be trained to handle them, particularly in view of the census practice in Massachusetts of subjecting the enumerators' returns to careful checking for the purpose of determining omissions of population, which necessitate re-canvassing either by the enumerator on orders from the office under penalty of having his compensation withheld, or by special agents assigned for such duty in districts where it may be apparent that the enumerator cannot be depended upon to go over the territory again. The Census of 1915 was taken as of April 1; the returns from the last of the 2,099 enumeration districts were received July 2; and the supplementary canvassing necessitated by omissions disclosed through re-checking and investigations following complaints from certain communities, was extended for about three months longer, it being definitely determined that no further enumeration on account of alleged omissions could be made after October 15, 1915.

The following extract from a statement prepared for newspaper publication under date of June 2, 1915, explains the condition with which the office is called upon to deal at this period of the census procedure: —

> In all censuses there are a certain number of persons who are not at home when the enumerator calls, even when a second or third call is made, and who are thus likely to be omitted from the count, however faithful the census taker may be; and in each census the difficulty of procuring the desired information with respect to certain classes increases, such as persons living in apartments, "kitchenettes," etc., and the floating population of foreign birth whose place of abode is constantly changing. This year the latter class has been inclined, in some instances, to be more suspicious and elusive of the census enumerator than usual because of the fear, notwithstanding it is groundless, that the information sought may in some way be furnished to the foreign nations at war.
>
> Because of these conditions and notwithstanding the enumerators have, on the whole, rendered conscientious service, every means possible is being utilized to check up the canvass. Judging by inquiries made for population figures almost as soon as the returns are made the Census Office, many persons seem to be of

the impression that the office merely counts the names turned in by the enumerators and should then be able to announce the population of a given city or town; but the determination of the population is by no means so simple as this. Enumerators' schedules are subjected to critical examination in comparison with the maps of their districts and the assessors' lists of polls, — and in Boston with the police listing of April 1, — to make certain that all blocks and streets have been duly canvassed and all buildings properly accounted for either by population being returned for them or a satisfactory explanation made, if no population is returned. This, of course, takes time and necessarily proceeds somewhat more slowly at the outset when the new clerks taken fresh from the Civil Service lists are acquiring training and experience in the task; and this work, absolutely essential to make the census as efficient as possible, explains why the final results cannot usually be announced in any census year until some months after the actual field work is substantially completed. Moreover, while the examination of the enumerators' schedules is in progress, thousands of returns are made by individuals through the mail or are obtained by other means direct by the Census Office and added to those sent in by the regularly commissioned enumerators.

To meet these conditions an intensive office organization is necessary, the ramifications of which it is impossible to describe in completeness of detail, for the reason that the work is conducted under such high pressure and each succeeding step in the procedure follows its predecessor so closely that the duties of the various groups of clerks sometimes change rapidly and not infrequently overlap.[1] During this period countless letters of inquiry are being sent out to enumerators, or memoranda placed in the hands of special agents, calling attention to omissions, discrepancies, etc., such as street numbers for which assessors' lists show population when the enumerator has returned none, failure to account for certain house numbers, streets on the map of the district for which no population has been returned, and no adequate explanation made of the omission, etc. The answers received from these inquiries are recorded on the schedules by blue pencil (in order to distinguish the added information from that obtained by the enumerator in the original canvass), and after all changes have been made, the letters and memoranda are filed by enumeration district numbers for future reference, the name of the clerk who made the entries on the schedules, and the date thereof being recorded on the "correction letter," so-called. This work requires a trained office force and proceeds somewhat slowly at the outset until the clerks become familiar with the enumerator's instruction book and the rules and regulations of the office.[2]

[1] A more complete description of the office procedure with respect to the examination and editing of schedules for tabulation has, however, been prepared and placed on the files of the Bureau of Statistics.

[2] In other states taking censuses the enumerators' returns are, I believe, usually accepted as final, but this has never been the case in Massachusetts, and the supplemental field work after the enumerators had completed their labors in the Massachusetts Census of 1915 resulted in the addition of upwards of 40,000 to the population above the aggregate number returned in the first instance by the enumerators. This fact, however, should not be taken as indicating any exceptional dereliction on the part of enumerators, for while in all censuses to which that of 1915 was no exception, a certain portion of the enumerators are negligent and lacking in a proper sense of responsibility in the performance of their duties, the great majority are unquestionably faithful to their trust and industrious in its performance, and their failure in some cases to make an entirely satisfactory canvass on their first rounds is quite as likely to be due to conditions and circumstances over which they have no control as to any fault of their own. — C. F. G.

In the Census of 1915 after all feasible corrections and re-enumerations had been made and omissions supplied, a preliminary count of the population was taken from the enumerator's voucher and a verified hand-count made of the family, male, female, and veteran schedules in order to ascertain the amount due the enumerators for services, since payment was by the rate-per-name method. A second count was then made, care being taken that each enumeration district was counted by a different clerk from the one who counted it the first time, and the head of the room compared the two counts; if they were found to disagree, a third count was made by another clerk. The two counts that agreed were accepted as the correct count and the record forwarded to the Auditing Division. These counts, however, were made only for the purpose of determining the amounts due enumerators for their services and by no means took account of all the population actually enumerated, since additional material was being constantly received in the office after the verified count for the payment of enumerators had been completed. Consequently, a subsequent and absolutely independent hand-count of all the population schedules was necessary (this being done by districts and the results then assembled and aggregated for cities, towns, counties, and the Commonwealth) to determine the population of the State (which was thus established as 3,693,310) for the official report to be made under the law to the Secretary of the Commonwealth and which was rendered December 23, 1915, the return of the number of legal voters, as similarly required, being made at the same time.[1] This count brought out the fact that the enumerators were entitled to pay for some of the subsequent material.

After the examination, editing, and correction of the schedules, it was necessary in the Census of 1915 to code those for males and females by entering certain symbols in the several information spaces on the schedules as a necessary preliminary to preparing corresponding punch cards, so-called, by machinery for the counting and sorting process. Preliminary to the actual coding of the male schedules, however, they were subjected to re-examination and scrutiny for the purpose of verifying the original editing so far as entries relating to political condition were concerned, and any errors found were corrected by the coding clerk, who then proceeded to code the schedules for *political condition only,* the coding of the remaining points on the male schedules being deferred to a later time. This division of the coding of the male schedules into two parts done at different times instead of completing the coding for all points on the schedules at one time, thereby necessitating the handling of the 1,813,713 male schedules twice for the coding process, had its obvious disadvantages; on the other hand, it seemed necessary for two important reasons, — first, because the proper coding for political condition as the basis of the ultimate determination of the number of legal voters on which representation in the Legislature, under the Constitution, depends, was of such fundamental importance that it was felt that the

[1] House Document 1169 (1916).

clerks should be required to concentrate their thought upon it to the exclusion of other matters and not be obliged, while coding for political condition, to remember the code symbols and affix them properly for other inquiries on the schedule which had no bearing on political condition; second, because the time element was also of vital importance, for it seemed doubtful whether if it were attempted to completely code the male schedules at one operation, the legal voter schedules could be segregated, counted, and the count verified in season to file the return with the Secretary of the Commonwealth by January 1. The division of the coding of the male schedules in the manner described was amply justified by the results: — The concentration of the attention of the coding clerks upon the inquiries relating to political condition not only developed expertness and incidentally made for speed, but notwithstanding the method adopted, it was December 23 before the official return of population and legal voters could be filed.[1]

CARD PUNCHING, VERIFICATION, COUNTING AND SORTING.

The sorting of the population card schedules incident to the segregation of various classes of data recorded thereon and the determination of the number of persons in each group to be statistically classified had hitherto always been done by hand in Massachusetts censuses, but the great progress in the development of mechanical devices for performing these processes of the tabulating procedure in recent years and their successful use by the United States Census Office and corporations having large statistical tasks resulted, after very careful consideration, in the decision to utilize them in compiling the results of the Census of 1915. The product of the Powers Accounting Machine Company seemed best adapted to this purpose, and a contract was therefore made in accordance with which the requisite number of punch, verifying, and counting and sorting machines were leased for various periods as the work demanded, and with entirely satisfactory results. A description in detail of the operation of these machines would be too technical in this connection, it being sufficient to explain that the data entered on the population schedules which it was proposed to tabulate were transferred to a specially prepared card, called a "punch card," by means of perforations made by the "punch machine," so-called, the punching of the cards being then subjected to verification by means of the "verifying machine," and the punched cards finally run through the "counter and sorter," which automatically sorted the cards and segregated them in accordance with the various classes of related facts to be tabulated, the process greatly facilitating the final preparation of the tabulations, and making easily possible numerous correlations of data such as were not feasible under the old hand methods except at great expense.

[1] The coding process including the rules governing the same has been described in detail for the records of the Bureau of Statistics.

The machines were operated by electric power, each being in charge of an operator who was paid a minimum flat day rate, plus a bonus based upon actual performance.[1] The Chief of the Punching and Verifying Division kept records of the work of the punching and verifying of the cards of each of the enumeration districts, showing the clerks who performed the various processes and the time consumed by each one. This simultaneously supplied a record of the performance of the machines and, in conjunction with the record of the verifying machines, which disclosed any errors made in the punching, — an efficiency record of the punch machine operators which, in turn, furnished the basis for determining compensation under the bonus system of payment adopted for this branch of the census work. All errors in punching as disclosed by the verifying machine were corrected by re-punching. A specimen record over a period of 13 months for a clerk whose performance represents substantially the average attainment of the best grade of operators of punch machines is appended: —

Month	Average Number of Cards Punched per Hour during the Month	Per Cent of Errors per 100 Cards as Disclosed by Verifying Machine
1915		
October	343.1	1.6
November	365.7	1.9
December	375.0	1.5
1916		
January	378.0	1.2
February	391.6	1.2
March	426.4	1.5
April	422.9	1.3
May	461.5	1.1
June	474.4	1.0
July	491.3	1.3
August	519.1	0.9
September	531.2	1.1
October	555.9	1.1

Certain operators of these machines developed a much higher standard of efficiency measured both by speed and accuracy than is above shown. For example, the highest record made was by a clerk[2] who, during a period of 106 hours, 35 minutes, punched a total of 69,661 cards, with an aggregate of 622 errors, or an average number of cards punched per hour of 653.58 (nearly 11 per minute) and an average number of errors of 0.9 per 100 cards. Per contra, one of the lowest records was by a clerk who punched an average for a certain month of only 68.3 cards per hour, with a percentage of errors per 100 cards of 2.8, her best record being a monthly average per hour of 287.9 cards, with a percentage of errors per 100 cards of 1.3; this clerk, after four months' trial on the punch machines, was transferred to the verifying machines, where her best average monthly record of cards verified per hour was 288.7.

[1] See p. 31.

[2] Miss Etta R. Weinberg.

The verification process which is intrinsically slower than the punching ran as follows for a verifying clerk who represented a fair average for the best grade of such clerks: —

Month	Average Number of Cards Verified per Hour
1916	
February	175.5
March	224.4
April	259.2
May	303.4
June	333.8
July	350.7
August	398.5
September	412.9
October	394.4

The highest record on verifying was 45,871 cards verified in 111 hours, 5 minutes, or an average of 412.9 cards per hour.

When the aggregations for the various units had been completed, such data as it was decided to publish were condensed for this purpose, the original charts, machine report forms, and aggregation sheets being permanently filed for reference and for use in the compilation of special tabulations from time to time.

SPECIAL TABULATIONS.

The Aged Dependent Inquiry.

Following the count of the male schedules and determination of legal voters, the natural order of procedure in the compilation of the results of the Population Census of 1915 had to be interrupted for the purpose of complying with the provisions of the resolve "To Provide for Securing in Connection with the Decennial Census Certain Information Relative to Aged and Dependent Persons" (Chapter 120, Resolves of 1914).[1] This necessitated a special tabulation of the population 65 years of age and over and the classification of this special group by nativity and length of residence in the Commonwealth, and involved the segregation of the schedules for males and females 65 years of age and over from the total number of male and female schedules. After counting the schedules and making a record of the same by enumeration districts, they were sorted into three classes, — (1) native, born in Massachusetts; (2) native, born in other than Massachusetts; and (3) foreign born. Each of these classifications had then to be counted and recorded, and each nativity classification sorted and counted as to length of residence. The data thus secured from the census schedules were correlated with certain other information obtained by correspondence, special agents, and from official sources outside the Bureau of Statistics, and formed the basis of a special report made to the Legislature under date of December 15, 1916.

[1] See Appendix B.

Information for the Commission for the Blind.

By the provisions of Section 6 of the Census Act (Chapter 692, Acts of 1914) and of Chapter 385, Acts of 1906, it was necessary to furnish the Commission for the Blind with certain information regarding blind persons obtained in the census; and accordingly an inquiry was inserted on the schedule for the purpose of enabling the desired information to be supplied. This involved, for the Census of 1915, an independent handling of the 3,693,310 population card schedules for the purpose of ascertaining which of them represented blind persons and whenever such a schedule was found, the clerk made a copy of the same, and the copied schedules were forwarded to the Commission.

List of Veterans of the Civil War.

By the provisions of Chapter 25, Resolves of 1915, the Director of the Bureau of Statistics was required to transmit to the Department of Massachusetts, Grand Army of the Republic, 300 copies of "an alphabetical list by cities and towns of those persons recorded by the Bureau in the Decennial Census of 1915 as having served in the Army, Navy, or Marine Corps of the United States during the Civil War." Whenever, therefore, an enumerator found a male person who was a veteran of the Civil War, he, in addition to recording him as such in the space provided on the regular blue male population schedule, proceeded to obtain certain additional information on the white veteran's schedule, so-called. These "veteran" schedules were found to number 15,212, the examination and editing of which was placed in charge of a regular employee of the Bureau, Mr. Charles Thompson, who was a veteran of the Civil War familiar with army and navy designations and with the census procedure and who made every effort to insure the list of names, addresses and designations being as complete and accurate as possible, the lists as returned by the enumerators being checked to names on the local assessors' lists of the various cities and towns of veterans exempt from taxation and also with the official records of the Grand Army of the Republic.

The Census of Fisheries and Commerce.

Section 8 of the 1915 Census Act provided for the taking of a Census of the Fisheries and Commerce of the Commonwealth. This was organized independently of the Population Census, though paid for from the general census appropriation. The maximum number of special agents employed on this work at one time was six, and of clerks, four, besides the chief of the division, a regular employee of the Bureau of Statistics having training and experience in similar census work who was transferred to the census organization partly for this purpose, who personally did considerable field work and who had personal charge of all the preliminary work.

The schedule used in the Census of 1915 for obtaining Ocean and Coastwise *Fisheries* (approved, with the schedules for the Census of Commerce, by the Governor and Council February 17, 1915) was prepared after conference by the chief of the division with prominent persons engaged in the industry both in Gloucester and Boston, for the purpose of obtaining first hand information as to the proper method of recording the quantity and value of the catch of fish, so as to eliminate as far as possible duplication of product through the manufacture of by products. The returns for fisheries on this census pertained only to the quantity and value of the fish caught, the same being classified for tabulation by the following order: (1) Fish, (2) Mollusks, and (3) Crustaceans.

The Boston Chamber of Commerce and large shipping concerns were interviewed prior to the preparation of the *Commerce* schedule and before the same was finally accepted by the office, a rough draft was personally submitted to leading concerns for their approval. The returns on commerce embrace the quantity of freight, the number of passengers, and the amount for all transportation entering or leaving the ports of the Commonwealth.

The canvasses for the Fisheries and for Commerce were made, so far as practicable, simultaneously. Special agents visited the several Custom Houses in the Commonwealth, first to ascertain the names of all vessels registered which were owned or controlled by Massachusetts residents specifically engaged in Fisheries, and those engaged in Commerce, — both Coastwise and Ocean. These records gave the name of the vessel, the owner's name and address, the captain's name and address, and several other means of identifying the vessel, and also the name of the port from which and to which the vessel sailed, — information necessary as a basis for the correction of the schedules by special agents and also, so that duplications might be eliminated, a check list on the vessels engaged and the various trips made during the census year (*i.e.*, the year ending December 31, 1914). But in addition to the information for the larger registered vessels, it was necessary to procure data for boats of smaller tonnage than those required under the law to register, by personal visits to their respective owners. For certain classes of large vessels engaged in coastwise fishing information also had to be obtained from fishermen, whose names were obtained from the records of local authorities with which fishermen engaged in catching shell fish must register for the purpose of obtaining a permit to fish.

Upon the receipt of the schedules in the office they were carefully scrutinized and edited, all omissions and corrections being made by personal visits or correspondence with the individuals or firms supplying the information, and after proper editing, were tabulated.

THE CENSUS FINANCES.

Appropriations and Organization of Accounting Division.

By the terms of the Census Act (Section 11), the Director of the Bureau of Statistics was authorized to expend a sum not exceeding $400,000 in carrying out its provisions, exclusive of the cost of paper. Of this amount $15,000 was made available by appropriation during the year ending November 30, 1914, the first expenses being incurred as of July 1 in that year; $250,000 was appropriated in 1915; $70,000 in 1916; $50,000 in 1917; and the final $15,000 in 1918. To take charge of the accounts, make records of all financial transactions, prepare pay-rolls, and make purchases of supplies, etc., an Accounting Division was organized, of which an experienced accountant, transferred from the staff of Examiners of Accounts of the Municipal Division of the Bureau, was made Chief. A time-book was kept of all office employees, numbering at the maximum 200, the monthly pay-roll being made up from the same after checking the record in the time-book to the time reports rendered daily and required from all employees. All requisitions for supplies had to be O.K.'d by the Accounting Division and the amount of supplies charged off to the particular branch of the work upon which they were used, so that upon the completion of the census a statement of functional costs could readily be prepared. Individual card ledger accounts were kept for the 2,099 enumeration districts showing in detail the compensation and expenses for each district, also records of the compensation and expenses of approximately 63 special agents and inspectors. A careful record of the cost, not only by enumeration district units, but of each branch of the work was kept, the information being currently available at all times. This division required the services of from 4 to 14 clerks, being at its maximum during the period when enumerators' accounts were being settled.

Field Employees: Rates and Method of Payment.

By the provisions of Section 2 of the Census Act, the Director of the Bureau was authorized to pay enumerators, interpreters, inspectors, and special agents "such rates of compensation as may be fixed by him, subject to the approval of the Governor and Council, except that in extreme emergencies or in districts in which suitable enumerators and interpreters cannot be obtained at the rate of compensation fixed as aforesaid, the Director may fix a rate which, in his judgment, is reasonable under the circumstances"; it was further provided by Section 3 that "no allowance shall be made to any enumerator or interpreter for traveling or other expenses in addition to the fixed rate of pay, except in extreme cases, when in the opinion of said Director such extra allowance would secure economy in the enumeration."

On December 16, 1914, the Governor and Council approved, as sub-

mitted by the Director, a rate for inspectors and special agents of not to exceed $5 a day, and a schedule for enumerators divided into classes composed of groups of cities and towns based upon density of population and other local conditions which it appeared necessary to take into account as determining factors. The maximum of $5 allowed by the Council for the payment of special agents and inspectors was, however, not availed of except in five instances for a brief period, a flat rate of $4 a day being fixed by the Director as a standard rate for this class of service, though in a few instances lower rates were paid. The rates submitted to and approved by the Council for enumeration districts ranged from 2½ cents to 11 cents per name for each person enumerated, one cent for each family schedule returned, and one cent for each veteran's schedule returned. The standard rate for interpreters was fixed at 30 cents per hour, which it was necessary in but a few cases to exceed. These rates for enumerators were adhered to for 1,991 districts out of a total of 2,099, but in order to obtain suitable enumerators in certain cases, it was necessary to take advantage of the clause in the act which permitted the Director, in emergencies, to fix a rate which, in his judgment, might be reasonable under the circumstances, and accordingly in 108 instances the original rate was increased. In fixing rates of pay of enumerators allowance was made for the necessity imposed upon them in many rural districts to hire conveyances or to pay car fares, and in order to avoid the immense amount of detail and expense which would have been involved in auditing expenditures for these items, the enumerators were required, as a rule (to which exceptions were made in certain cases), to pay such expenses and their rates were adjusted so as to permit a fair net compensation. The largest single item of expense in the taking of any census is for compensation of enumerators, which in the Massachusetts State censuses has always, prior to 1915, been by the per diem method, a uniform rate of $3 a day being paid in 1905, when the aggregate amount paid to enumerators was about $160,000. In 1915 the method of piece payment, or a certain rate per card schedule returned, was adopted for the first time in a State census, with a resulting aggregate cost on account of this item of but a little more than $107,000 (including traveling expenses), or a saving of over $50,000 from the cost in 1905.

Office Employees: Rates and Method of Payment.

The Census Act (Section 2) provided that the compensation of clerks, stenographers, and other employees should be determined "in the same manner as that of the regular employees of the Bureau of Statistics"; that is, by the Director, except as the same might be subject to the classification and grading act, so-called. The latter not being applicable to temporary employees, and since the census was a temporary undertaking, notwithstanding its prospective continuance over a period of more than three years and also because the length of service of individual employees could not be determined in advance, it was decided to classify all em-

ployees (except a few transferred from the Bureau who were trained experts in census procedure) as temporary. The compensation of all clerks thus employed was fixed at the beginning of their service at the uniform rate of $1.50 a day, with the understanding that as individuals acquired proficiency and experience, the rate would be increased from time to time, and this was done in most cases when the clerk remained in the service for several months, to $1.65 a day; in certain other cases to $1.75 and $2 a day; and in rarer cases where supervisory duties or exceptional expertness was involved, to $2.25 or $2.50 a day. Certain exceptions were made with respect to machine operators because of the peculiarly exacting and physically fatiguing character of their work, though these employees were obtained for the most part from the regular Civil Service clerical list. These established rates of office employees were augmented by overtime payments at the regular rates, this being especially authorized by the Census Act, for the reason that a great amount of continuous overtime is unfortunately necessary in every census by virtue of the immense volume of work which must be performed within a limited time. No overtime work was necessary for the operators of punching and verifying machines, but it was found desirable to standardize this work, in view of the fact that with respect to the same, unlike purely clerical work, *actual performance could be measured definitely* and recorded. Hence, in order to insure a certain uniformity in progress and just compensation for work performed, a bonus system was put into effect as follows: —

	Per Day
Punching Machine Operators: —	
Four hundred cards and over punched per hour with not over 1.5 per cent of errors, rate	$2.00
Three hundred but less than 400 cards per hour, with not over 1.5 per cent of errors, rate	1.75
Two hundred but less than 300 cards per hour, with not over 1.5 per cent of errors, rate	1.65
Verifying Machine Operators: —	
Three hundred cards and over verified per hour, rate	2.00
Two hundred and fifty but less than 300 cards per hour, rate	1.75
Two hundred but less than 250 cards per hour, rate	1.65

Lease of Punching, Verifying, and Counting and Sorting Machines.

For the purpose of reducing the data as returned on the population schedules to proper form for tabulation, the Standard Commercial Punching Machines of the Powers Accounting Machine Company were leased at the rate of $10 per month, and the verifying machines at $10 per month, the same being equipped with a device to manipulate the enumeration schedules, and the Standard Counting and Sorting Machines at the rate of $35 per month, equipped with twelve four ring box counters, one five ring sub-total counter, and one five ring grand total counter, with sorting racks. A special card printed to conform to the desired information to be

obtained from the schedules had also to be obtained from the Powers Company for use with the machines, the 2,000,000 blue cards (male) and the 2,100,000 red cards (female) costing at the rate of $1.05 per thousand. The company, under the contract, opened a branch office in Boston and furnished without charge instruction in the operation of the machines and a certain amount of care by their own mechanics.

CONCLUSION.

The results of the Census of 1915 are not published in this volume in as great detail as has been done in former censuses, partly because of the expense and delay which would have been involved in so doing, and partly because it is believed that the census can be made to serve the practical purpose of investigators of social conditions who may require tabulations in considerable detail for particular localities or special correlations for intensive studies, by making the same available on the files of the office, and by retaining the original work sheets of material for the tabulation of which there is no immediate general demand. Nor have elaborate analytical studies of census data, such as would have materially postponed the making of the general results available to the public, been attempted in conjunction with the publication of the regular census report.

The census in its completed form is the result of the combined labor of many hundreds of field and office employees, all of which is exacting and much of it undertaken and carried through under great physical strain, and while it is not possible to mention here all those members of the staff who have performed especially meritorious service, I desire to express my particular obligations in this connection to Mr. William G. Grundy, the very efficient deputy director of the Bureau of Statistics, and to Miss Annie L. Flynn, whose intimate knowledge of census procedure, born of long experience, have rendered their services in the organization and completion of the Census of 1915 invaluable.

CHARLES F. GETTEMY,
Director, Bureau of Statistics.

State House, Boston, March 14, 1918.

GENERAL POPULATION TABLES.

In this part of the presentation of the results of the Decennial Census of 1915, the population of the cities and towns of the Commonwealth is shown by various political and other sub-divisions.

Population and Legal Voters.

TABLE 1 presents both the population of the State, shown to be 3,693,310, and the number of legal voters, aggregating 775,889, of cities (by wards) and towns, arranged by counties, as returned to the Secretary of the Commonwealth, pursuant to the provisions of Articles XXI and XXII of the amendments to the Constitution and of Section 7, Chapter 692, Acts of 1914.

The population and number of legal voters enumerated at each State census since the adoption of the census amendments to the Constitution in 1857, with the increase during each census period, are given below:

Census Year	Population	Increase as Compared with Previous Census		Legal Voters	Increase as Compared with Previous Census	
		Number	Per Cent		Number	Per Cent
1857	–	–	–	210,716	–	–
1865	1,267,031	–	–	246,182	35,466	16.8
1875	1,651,912	384,881	30.4	351,113	104,931	42.6
1885	1,942,141	290,229	17.6	442,616	91,503	26.1
1895	2,500,183	558,042	28.7	560,802	118,186	26.7
1905	3,003,680	503,497	20.1	674,174	113,372	20.2
1915	3,693,310	689,630	23.0	775,889	101,715	15.1

It thus appears that during the half-century which elapsed between 1865 and 1915, the population of the Commonwealth nearly trebled, increasing by 191.5 per cent, while the number of legal voters increased during the same period by 215.2 per cent. It is of interest to note that between 1905 and 1915, there was a very marked drop, amounting to 5 per cent in the rate of increase of legal voters from the preceding decade, notwithstanding a slight increase in the rate of population growth. But one need not look far to discover the cause of this fact; it may obviously be accounted for, — first, by the enormous increase in immigration between 1905 and 1915 over the decade 1895–1905 of peoples largely from the Levant, Western Asia, and countries of Europe who have not taken as readily to American citizenship as did the immigrants of former generations from Western and Northern Europe; and second, to a less degree, by the outbreak of the European War, which, between August 1, 1914, and the date of the census, April 1, 1915, probably attracted naturalized citizens and their sons, to some extent, to emigrate for enlistment.

Population by Sex.

TABLE 2 shows the population of each city and town of the Commonwealth, classified by sex, for 1915 compared with 1910 and 1905, the totals and percentage of increase being as follows:

Year	Total Population	Increase		Males	Increase		Females	Increase	
		Number	Per Cent		Number	Per Cent		Number	Per Cent
1905	3,003,680	-	-	1,461,589	-	-	1,542,091	-	-
1910	3,366,416	362,736	12.1	1,655,248	193,659	13.2	1,711,168	169,077	11.0
1915	3,693,310	326,894	9.7	1,813,713	158,465	9.6	1,879,597	168,429	9.8

Increase and Decrease — Growth of Urban Population.

TABLE 3 shows the increase or decrease in population of the cities and towns between the last preceding State Census of 1905 and the Census of 1915, both in number and percentage, the arrangement being in order of population rank by the Census of 1915. Segregating the population as shown by these tables so as to show the same by size groups, and presenting comparatively the corresponding population for each group for 5, 10, 25, 40, and 50-year periods, we have the following presentation:

Places of —	1915	1910	1905	1890	1875	1865
(1) 100,000 or over	1,462,266	1,146,999	829,277	448,477	341,919	192,318
Per cent of total	39.6	34.1	27.6	20.0	20.7	15.2
50,000 or over	1,858,286	1,699,649	1,385,866	810,981	341,919	192,318
Per cent of total	50.3	50.5	46.1	36.2	20.7	15.2
30,000 or over	2,398,489	2,074,455	1,735,192	1,078,269	632,671	253,363
Per cent of total	64.9	61.6	57.8	48.2	38.3	20.0
10,000 or over	2,937,267	2,606,380	2,255,142	1,478,806	910,171	539,647
Per cent of total	79.5	77.4	75.1	66.0	55.1	42.6
5,000 or over	3,300,208	2,949,211	2,574,809	1,728,856	1,111,891	749,797
Per cent of total	89.4	87.6	85.7	77.2	67.3	59.2
2,500 or over	3,476,484	3,125,367	2,766,293	2,003,854	1,382,832	989,369
Per cent of total	94.1	92.8	92.1	89.5	83.7	78.1
(2) 50,000 but under 100,000	396,020	552,650	556,589	362,504	-	-
Per cent of total	10.7	16.4	18.5	16.2	-	-
(3) 30,000 but under 50,000	540,203	374,806	349,326	267,288	290,752	61,045
Per cent of total	14.6	11.1	11.6	11.9	17.6	4.8
(4) 10,000 but under 30,000	538,778	531,925	519,950	400,537	277,500	286,284
Per cent of total	14.6	15.8	17.3	17.9	16.8	22.6
(5) 5,000 but under 10,000	362,941	342,831	319,667	250,050	201,720	210,150
Per cent of total	9.8	10.2	10.6	11.2	12.2	16.6
(6) 2,500 but under 5,000	176,276	176,156	191,484	274,998	270,941	239,572
Per cent of total	4.8	5.2	6.4	12.3	16.4	18.9
(7) Under 2,500	216,826	241,049	237,387	235,089	269,080	277,662
Per cent of total	5.9	7.2	7.9	10.5	16.3	21.9
Total population of State	3,693,310	3,366,416	3,003,680	2,238,943	1,651,912	1,267,031

The attempt is frequently made to divide the population more or less rigidly into two great classes based upon the degree of congestion which may characterize the living conditions of the people, and to measure the same with a statistical yard stick with a view to showing the actual number and proportion of persons living under what are euphoniously termed "urban" and "rural" conditions. That this cannot be done through the use of population totals only, owing to the fact that urban and rural conditions are frequently found to exist side by side in the same community, is very often overlooked. There are, for example, numerous communities in Massachusetts, as every one familiar with the geographical characteristics of our cities and towns well knows, in which the mere aggregate population can by no means be accepted as indicating the presence of congested conditions, with the evils usually assumed to be incident thereto, nor does it follow that congestion is absent from communities arbitrarily classified as rural, simply because they have a population below a certain number.

All that such a table as is here given can be accepted as showing, therefore, is the actual and relative number of persons living in places above a certain specified population size at each census; and without undertaking to draw further deductions from the presentation, it is, of course, significant to note that whereas 50 years ago, only a little more than 15 per cent of the total population of Massachusetts was to be found in communities of 100,000 or over, 39.6 per cent are now living in places of this size; and that while the relative proportion of those living in communities of 100,000 or over, respectively, remained substantially unchanged during the 15-year period between 1875 and 1890, there has been a steady increase during the 25-year period since 1890, in the tendency of places of 100,000 or over, to increase at the expense of smaller communities. It is correspondingly of interest to note that whereas nearly 22 per cent, or more than one-fifth of the total population of the State, were, in 1865, living in communities having a population of less than 2,500, somewhat less than 6 per cent of the total population in 1915 was found in these smaller communities. That the drift of population away from the small communities has been, moreover, — viewing the same for the 50-year period, — to the largest population group rather than to intermediary groups, would seem to be indicated by the second section of the above table, it being observed that the percentage of the total population classified as Group 1, with a very slight apparent decrease between 1875 and 1890, shows a practically continuous and substantial increase between 1865 and 1915, whereas Groups 4, 5, and 6 (with the exception of a slight apparent increase in Group 4 between 1875 and 1890), have been steadily growing proportionately smaller, and Group 3, which shows a large accelerated growth between 1865 and 1875, has declined in its proportion to the total since the census of the latter year.

All of the cities in the State show an increase in population in 1915 over 1905, except Salem, Gloucester, and North Adams, but Gloucester and North Adams increased slightly in population between the United States Census of 1910 and the State Census of 1915. The population of Salem increased from 37,627 in 1905 to 43,697 in 1910, the large falling-off noted for 1915 being due to an entirely abnormal circumstance having no bearing upon natural conditions which determine population, namely, the disastrous conflagration which wiped out a large portion of the city, June 25, 1914.

Of the 318 towns, 89 show a decrease in population since the State Census of 1905, but as compared with the United States Census of 1910, there were 70 which showed a decrease.

The total population of the 35 cities of the Commonwealth on April 1, 1915, was 2,563,634, an increase of 499,438, or 24.2 per cent, over the total population for the same places in 1905, and 217,804, or 9.3 per cent in 1910.

The total of the population for the 318 towns (exclusive for 1905 and 1910 of Hyde Park, Attleboro, and Revere) of the Commonwealth on April 1, 1915, was 1,129,676, an increase of 190,192, or 20.2 per cent, over the total population for the same places in 1905, and 109,090, or 10.7 per cent in 1910.

Brookline, with a population of 33,490, remains the largest town in the Commonwealth, exceeding in population each of 13 cities (Medford, Waltham, Chicopee, Revere, Gloucester, Beverly, North Adams, Northampton, Attleboro, Melrose, Woburn, Newburyport, and Marlborough); Peabody, the next largest town, exceeds in population each of five cities (Attleboro, Melrose, Woburn, Newburyport, and Marlborough); the towns of Westfield and Leominster are each larger than Melrose, Woburn, Newburyport, and Marlborough; Watertown is larger than the cities of Woburn, Newburyport, and Marlborough; and Gardner and Framingham are each larger than Newburyport and Marlborough. The town of New Ashford in Berkshire County continues the smallest town of the Commonwealth, with a population of 92.

There were 40 towns having less than 500 population on April 1, 1915; in 1910 there were 39 towns in this class; in 1905 there were 36; and in 1900 there were 37.

The largest city in the Commonwealth, Boston, having a population of 745,439, remains in a class by itself, no other city approaching it. The second city in the Commonwealth is Worcester, with a population of 162,697. There were in 1915 seven cities having a population of more than 100,000, namely, Boston, Worcester, Fall River, New Bedford, Cambridge, Lowell, and Springfield, Cambridge and Lowell having passed the 100,000 mark during the past decade, and New Bedford and Springfield having passed into the 100,000 group since 1910. The aggregate population of the seven cities having over 100,000 in 1915 was 1,462,266, or 39.6 per cent of the total population of the State. The population of Boston alone was 20.2 per cent of the total, as compared with 19.9 per cent in 1910 and 19.8 per cent in 1905.

Population of Various Political or Geographical Sub-divisions.

TABLES 4 to 10, inclusive, are self-explanatory and require no analysis. They are presentations respectively of the population by sex and number of families for cities and towns, having wards and precincts (Table 4); the population of counties (Table 5); the population of congressional districts (Table 6); the population of judicial districts (Table 7); the population of fire, water, and light districts (Table 8); the population of Metropolitan Boston (Table 9); and the population of Boston by geographical sub-divisions (Table 10).

Living Conditions of the Population.

TABLES 11, 12, and 13 reflect the living conditions of the population expressed in various terms of density and kinds of dwellings. For the first time in any Massachusetts census, it is possible to make a presentation (TABLE 11) showing density of population on the basis of net land area in square miles, the number of families to a square mile, and the number of habitations to a square mile for each city and town, arranged by counties. The net land area of Massachusetts is 7,876.3 square miles [1] and the population to a square mile in 1915 was 468.9; accepting the same number of square miles as the area of the State for former census-taking periods, the increasing density of population during the past quarter-century is shown by the following table:

Year	Total Population	Population to a Square Mile	Per Cent of Increase in Population
1890	2,238,943	284.3	–
1895	2,500,183	317.4	11.7
1900	2,805,346	356.2	12.2
1905	3,003,680	381.4	7.1
1910	3,366,416	427.4	12.1
1915	3,693,310	468.9	9.7
Increase for the period	1,454,367	184.7	65.0

[1] The net land areas accepted for the purpose of computing density of population as presented in this volume were as determined for this office by Mr. Henry B. Wood, Assistant Engineer of the State Commission on Waterways and Public Lands. The method adopted was as follows:

In computing the "net land areas" of the various cities and towns of the State, the "gross areas," or areas within the city and town boundary lines as published by the Harbor and Land Commissioners (Boston excepted) in their 37th annual report for the year 1915, were used. From each of these values the water areas of rivers, lakes and great ponds within the exterior boundary lines were deducted. Areas of rivers were measured from the best obtainable plans on file in this office, made from actual survey, using also, in some cases, various plans on file in other State departments. Plans of lakes and great ponds were measured from surveyors' large scale plans where obtainable, many being furnished by various city and town officials. Some, notably water supply reservoirs, were obtained from information on file with the State Department of Health or from local engineers. All other ponds were measured as shown on the original plane table sheets of the State topographical map, scale 1: 30,000, or four times the area of the State maps themselves. Ponds crossed by town lines were divided in the proper proportions. Brooks and small ponds were not considered, except in a very few scattering instances, where population was very small. In the case of cities and towns along the coast, basic gross areas are taken to high-water line only, and in tidal streams to the first bridge from the mouth of the same.

The sum of the areas as thus determined for the several cities and towns, viz., 7,876.2528 square miles, was then taken as the area of the State. This figure differs from that used by the United States Census Office, which gives the land area of Massachusetts as 8,039 square miles, according to which the population per square mile by the Census of 1915 would be 459.4 instead of 468.9, the figure resulting from using 7,876.3, which we have adopted, as the divisor. The discrepancy in the square-mile area figures for Massachusetts adopted by the United States Census and by this office is due to the use of different maps not drawn on the same scale rather than to a difference in method of computing.

Thus it appears that during the quarter-century 1890–1915 the population of Massachusetts has increased 65 per cent, and since the area has remained the same, the number of persons per square mile of area shows a similar increase. By the same method, *i.e.*, using the areas of the cities as established for 1915 by the presentation of Table 11 the population to a square mile for 1890, 1905, and 1915, and the percentage of increase or decrease in density of population for the several cities for the 10-year period 1905–1915 and the 25-year period 1890–1915 is shown in the following table, the arrangement being in order of size by the Census of 1915:

Cities	1915		1905		1890		Per Cent of Increase (+) or Decrease (—) in Density	
	Total Population	Population to a Square Mile	Total Population	Population to a Square Mile	Total Population	Population to a Square Mile	10-year period 1905–1915	25-year period 1890–1915
Boston	745,439	16,980.4	595,380	13,562.2	448,477	10,215.9	+25.2	+66.2
Worcester	162,697	4,373.6	128,135	3,444.5	84,655	2,275.7	+27.0	+92.2
Fall River	124,791	3,793.0	105,762	3,214.7	74,398	2,261.3	+18.0	+67.7
New Bedford	109,568	5,766.7	74,362	3,913.8	40,733	2,143.8	+47.3	+169.0
Cambridge	108,822	17,401.2	97,434	15,715.2	70,028	11,294.8	+11.7	+55.4
Lowell	107,978	8,058.1	94,889	7,081.3	77,696	5,798.2	+13.8	+39.0
Springfield	102,971	3,248.3	73,540	2,319.9	44,179	1,393.7	+40.0	+133.7
Lynn	95,803	9,124.1	77,042	7,337.3	55,727	5,307.3	+24.4	+71.9
Lawrence	90,259	13,381.4	70,050	10,455.2	44,654	6,664.8	+28.8	+102.1

TABLE 12 is a comparative presentation for cities (by wards) and towns, arranged alphabetically, of *population* living in (*a*) dwelling houses and (*b*) all other habitations; the number of families living in (*a*) dwelling houses and (*b*) all other habitations; and the number of occupied rooms, the average number of persons to a family, the average number of rooms to a family, and the average number of persons to a room in the 524,911 *occupied* dwelling houses (see Table 13) in the State. By the Census of 1905 there were 660,053 families in the State living in all kinds of habitations; in 1915 there were 826,490, an increase of 166,437, or 25.2 per cent. The average size of the family was, by the Census of 1915, 4.5 persons; in 1905 it was 4.6; in 1895 it was 4.6; in 1885 it was 4.6; and in 1875 it was 4.6. It is, therefore, clearly appar-

ent from the census figures that the average size of the family in Massachusetts has remained practically the same since 1875, notwithstanding the increase in population and the changes that have taken place in the composition of the population, the most important of which are due to immigration. Indeed, it may, perhaps, be fairly assumed that it is the additions to the population caused by the immigration of large families of foreign born which have helped to maintain the family in Massachusetts at an average size, which has been normal for 40 years, and prevented any appreciable decrease, although this factor does not appear to have been so influential as is probably generally believed, since it is to be noted that the average size of the family by the Census of 1915 for the city of Lawrence, which had the largest percentage of foreign-born population (45.8 per cent), was 4.9 persons, while the average size of the family for the city of Melrose, which had the largest percentage of native population (80.8 per cent), was 4.1 persons.

In considering the number of families as given in census presentations it is well to bear in mind the fact that in the census the term "family" is used in a somewhat different and broader sense than is ordinarily implied by the word; although the distinction affects only negligibly the average size of the family when the whole number for the State is taken into account. This fact was clearly brought out in the analysis of the family presentations for the State Censuses of 1885 and 1895, and from the latter the following may be appropriately quoted here: [1] —

> In conducting the census enumeration, every aggregation of individuals living under one roof, or related directly to one head, either arbitrarily or otherwise, is considered a family. This interpretation of the term "family" varies somewhat from that ordinarily given to the word, and it follows, of course, that the census family is not exactly identical with the normal family. For instance, a number of people living together in a hotel is considered a single family, the proprietor being taken as the head. In the same way, a penal or reformatory institution is considered a single family, the superintendent being the head. In 1885, however, it was shown by a careful analysis of the different families enumerated under this plan that, eliminating the families coming under an artificial designation, such as we have explained, the average size of the actual normal family in the State was 4.45, and, therefore, that the influence upon the average by including the artificial or arbitrary families, so classed for census purposes, was immaterial, so far as the State taken as a whole was concerned, being but 0.13; and, as stated in that Census, "It makes but little difference, so far as great bodies of people are concerned, as, for instance, the population of the State, whether the families are considered on the basis of the actual normal family, or on the ordinary census basis, which includes all aggregations living under one roof, or having certain relations to one head."

The number of families, classified so as to distinguish those in private and all other groups, the corresponding aggregate population, and the average size of the family for these two principal groups for 1905 and 1915 are shown comparatively in the following table:

[1] Census of 1895, Vol. I, p. 444.

Census Year	Families			
	Kind	Number	Population	Average Size
1905	Private	653,094	2,911,950	4.5
	All other	6,959	91,730	13.2
	Total	660,053	3,003,680	4.6
1915	Private[1]	818,575	3,596,937	4.4
	All other	7,915	96,373	12.2
	Total	826,490	3,693,310	4.5

Incidentally this table would appear to verify and confirm the conclusion based upon the analysis of the family presentations of the Censuses of 1885 and 1895 above referred to, to the effect that the average size of the family for the State is not materially affected by including the arbitrary census families. It may, furthermore, be noted that the number classed as private families in the Census of 1905 comprised 98.9 per cent of the whole number, and in the Census of 1915, 99 per cent. But while the average size of the family for the State as a whole is not substantially affected by the census definition of the term, this statement does not, of course, apply in the same degree to certain large towns which happen to be the seats of large institutions, as, for example, Bridgewater, Concord, Danvers, Medfield, Tewksbury, and Westborough.

Of the total population in 1915 (3,693,310), there were 3,596,937, or 97.4 per cent, living in dwelling houses, and 96,373, or 2.6 per cent, living in all other habitations.[2] The total number of rooms occupied in all habitations in 1895 was 3,568,385; in 1915 the number was 5,088,129, — an increase of 1,519,744, or 42.6 per cent for the 20-year period.[3] The average number of persons to a room in all habitations in 1895 was less than one, viz., 0.7; in 1915 it was the same, — that is to say, for the State as a whole there were, on the average, 10 rooms in each habitation for each family group of seven persons, and assuming that in each unit of 10 rooms two should be deducted for kitchen, dining-room and purposes other than for sleeping, there were, on an average, for the State eight sleeping-rooms available for each seven persons of the population,

[1] For the purposes of this table, persons found to be living in dwelling houses in the Census of 1915 are classed as private families, the distinction being relatively unimportant when dealing with aggregates.

[2] All other habitations include hotels (this does not mean apartment houses and so-called kitchenette apartments), business blocks and stores in which population was reported as living, club-houses, camps or shanties, (such as temporary settlements of laborers employed on railroads or public works and living together in a single community), vessels, boats, stables, garages, penal and reformatory institutions, religious institutions and associations, public or private institutions, hospitals and asylums, boarding-schools, colleges, academies, and government stations that report the population living on the premises.

[3] It was not deemed feasible to include in Table 12 a presentation as to the occupancy of habitations other than dwelling houses, such as is given in the third section of the table for dwelling houses, for the following reasons: — Each cell in a jail, prison, or other penal institution and each private room, administrative and living room in a hospital was tabulated as a room, but wards in hospitals and dormitories in institutions, boarding-schools, academies and colleges were not included in the tabulation of rooms (*e.g.*, if a hospital was returned as having 30 administrative and living rooms and 20 private rooms, four wards and two dormitories, it was tabulated as 50 rooms, the four wards and two dormitories not being included in the number of rooms in the institution). Consequently as all of the rooms in hospitals and institutions were not considered as living rooms, it would not give a correct average number of persons to a room to divide the population reported as living in all habitations other than dwelling houses by the number of rooms tabulated.

or 1.1 rooms to a person, both by the Census of 1895 and that of 1915; but this average is, of course, not maintained for the cities and towns when separately considered, the degree of congestion being less than this in some instances and greater in others, being exceeded in the more densely populated portions of Boston and other cities.[1]

TABLE 13 shows dwelling houses and other habitations (occupied, unoccupied and under construction) by material of which constructed, and the population for all cities (by wards) and towns, arranged alphabetically. The total number of *occupied habitations* in the State in 1895 (including not only dwelling houses but hotels, institutions, camps, boats, stables, etc.) was 397,633; in 1915 it was 532,327, — an increase of 134,694, or 33.9 per cent. The average *number of persons* to a *habitation* of any kind in 1895 was 6.3; in 1915 it was 6.9. The total number of occupied habitations of all kinds in 1895 (397,633) was 92.8 per cent of the total number of habitations occupied or unoccupied (but not including houses under construction) of all kinds; while in 1915 it was 532,327, or 91.3 per cent. The following table shows the number of *habitations* classified according to material of construction in 1895 and 1915:

Material of which Habitations are Constructed	Total		Occupied		Unoccupied		Per Cent of Aggregate	
	1915	1895	1915	1895	1915	1895	1915	1895
The State	**582,801**	**428,494**	**532,327**	**397,633**	**50,474**	**30,861**	**100.0**	**100.0**
Wood	541,305	394,745	492,636	365,933	48,669	28,812	92.9	92.1
Brick	35,555	27,472	34,206	26,041	1,349	1,431	6.1	6.4
Stone	860	915	788	815	72	100	0.1	0.2
Cement	3,941	46	3,664	44	277	2	0.7	– [2]
All other[3]	1,140	5,316	1,033	4,800	107	516	0.2	1.3

Following these tabular presentations is an exhaustive alphabetical list by municipalities and counties of unincorporated villages and sections of cities and towns having distinctive designations prepared especially for the Census of 1915, after much research; a compendium of notes, with statutory citations on annexations, changes in boundary lines, place names, etc., since 1900; and a statement relative to the median point and center of population.

[1] Conclusions as to the degree of congestion of population and living conditions, based upon the number of rooms in occupied dwelling houses as returned in a census, should not ignore the difficulty of enumerators in determining what constitutes a "room" when entering the number on the schedule, the definition of which may not always have been the same from census to census. The enumerators in the Census of 1915 were specifically advised, in reporting the number of rooms, to exclude bath-rooms, storerooms not habitable, and laundry rooms.

[2] Less than one-tenth of one per cent.

[3] All other includes wood and brick, wood and cement, wood and stone, etc., and not stated.

NOTE. — A revision of ward lines was made in the cities of Boston, Pittsfield, Springfield, and Worcester during the year preceding the taking of this Census, but the new wards thus established not having been divided into precincts prior to April 1, 1915, the date as of which the Census was taken, the population of the precincts of these cities could not be shown in this table. None of the wards of the following cities are divided into precincts: — Beverly, Fitchburg, Marlborough, Newburyport, North Adams, Northampton, Revere, Woburn.

TABLE 5. — POPULATION OF COUNTIES, 1880–1915, ARRANGED ALPHABETICALLY.

[1] By Boston Proper is meant the territory of Boston, independent of all annexations.

[2] For the separate islands, as follows: 1880 — Breed's, 152; Deer, 851; Gallop's, 5; Rainsford, 187; Long, 49; Lovell's, 5; Spectacle, 53; Thompson's, 106; Fort Independence, 13; Fort Warren, 112; Fort Winthrop, 12. 1885 — Breed's, 348; Deer, 1,145; Gallop's, 6; Rainsford, 204; Long, 81; Lovell's, 7; Spectacle, 61; Thompson's, 122; Fort Independence, 11; Fort Warren, 129; Fort Winthrop, 25. 1895 — Breed's (included in East Boston); Deer, 1,620; Gallop's, 6; Rainsford, 83; Long, 612; Lovell's, 3; Spectacle, 94; Thompson's, 119; Fort Independence, 2; Fort Warren, 164; Fort Winthrop, 3. 1900 — Breed's (included in East Boston); Deer, 1,081; Rainsford, 132; Long, 707; Spectacle, 78; Thompson's, 117; Fort Warren, 152; forts not specified, 11. 1905 — Apple, 9; Breed's (included in East Boston); Castle, 4; Corinthian Rocks, 4; Deer, 1,487; Gallop's, 4; George's, 231; Long, 949; Lovell's, 8; Rainsford, 190; Spectacle, 97; Thompson's, 122. 1910 — Figures for the separate islands not available. 1915 — Breed's (included in East Boston); Castle, 5; Deer, 934; Gallop's, 4; George's, 256; Governor's, 8; Long, 1,676; Lovell's, 30; Rainsford, 152; Spectacle, 114; Thompson's, 124.

[3] Estimated.

[4] By the census of May, 1840, the population of Boston was 84,401. Mr. Lemuel Shattuck, in his report on the census of Boston for 1845, shows clearly that the United States Census of 1840 was incorrect.

[5] Included also in the population of Dorchester in this year. After 1855 Washington Village is included in South Boston.

[6] The population of East Boston (*i.e.*, the present wards 1 and 2), *as usually given* in census tables, includes that of the islands in the harbor, but is here given separately, so that it should be understood that the total population of wards 1 and 2, popularly referred to as "East Boston," includes the figures for both these columns.

[7] The territory of Roxbury and Dorchester was not kept intact by ward boundaries in the ward division of 1875: it is difficult, therefore, to give the exact population of each district by the Census of 1880. The figures given are the result of very careful study of the population by census enumeration districts, of which there were 208 in Boston for the United States Census of 1880.

[8] Population of the islands included in that of East Boston.

[9] The figures presented for South Boston, Dorchester, Roxbury, and West Roxbury are carefully made up to cover the geographical area originally belonging to each sub-division. The lines enabling this to be done were not exactly observed in the censuses of 1875, 1880, 1885, 1890, or 1895. In each of these years, therefore, the population of the sub-divisions, as stated in the table, is approximate only, inasmuch as the area considered under each head was approximate. But while it is a mechanical impossibility to so lay out the enumeration districts as to enable a presentation to be made of the exact population of these sub-divisions following their original boundary lines, in view of the greater obligation to present the population by wards and precincts whose boundaries do not conform to the original boundaries of the sub-divisions in question, the tabulations for these sub-divisions are presented with much greater accuracy for the censuses of 1900, 1905, 1910, and 1915 than for preceding censuses. Comparisons of the figures between 1875 and 1915 are somewhat affected, therefore, by this fact. As these several sub-divisions, moreover, have no political significance, not being represented as such in the frame of government, and have what may be termed an artificial existence only, the tabulations as given above for each census may be accepted for all practical purposes as representing as approximately accurate a presentation as it is possible to give.

TABLE 11. — DENSITY OF POPULATION: POPULATION, NET LAND AREA IN SQUARE MILES, POPULATION AND FAMILIES TO A SQUARE MILE, AND HABITATIONS TO A SQUARE MILE, OF THE CITIES AND TOWNS, ARRANGED BY COUNTIES.

Counties, Cities, and Towns	Population	Net Land Area in Square Miles	Population to a Square Mile	Families to a Square Mile	Habitations to a Square Mile

NOTES, WITH STATUTORY CITATIONS, ON ANNEXATIONS, CHANGES IN BOUNDARY LINES, PLACE NAMES, ETC., SINCE 1900.

The following notes, relative to the establishment of boundary lines and changes in extent of territory or of place names, are complete from 1900 through April 1, 1915. For notes of changes prior to 1900, see Census of Massachusetts, 1905, Vol. I.

Andover, boundary between North Reading and, established. Chapter 250, Acts of 1904, approved April 22.

Boundary between Tewksbury and, established. Chapter 373, Acts of 1903, approved May 21.

Arlington, boundary between SOMERVILLE and, established. Chapter 221, Acts of 1910, approved March 16.

Boundary between CAMBRIDGE and, established. Chapter 405, Acts of 1911, approved May 5.

ATTLEBORO incorporated as a city. Chapter 680, Acts of 1914, approved June 17.

Auburn, boundary between Oxford and, established. Chapter 302, Acts of 1908, approved March 27.

Belmont, part of CAMBRIDGE annexed to, and boundary between CAMBRIDGE and, readjusted. Chapter 77, Acts of 1906, approved February 16.

Part of Watertown annexed to, and part of boundary between Watertown and, established. Chapter 378, Acts of 1903, approved May 23.

Part of boundary between Watertown and, established. Chapter 362, Acts of 1911, approved April 29.

Berlin, boundary between Clinton and, established. Chapter 359, Acts of 1905, approved May 1.

Boundary between Hudson and, established. Chapter 358, Acts of 1905, approved May 1.

Boundary between MARLBOROUGH and, established. Chapter 357, Acts of 1905, approved May 1.

BOSTON, part of boundary between CAMBRIDGE and, established. Chapter 312, Acts of 1910, approved March 29.

Town of Hyde Park annexed to. Chapter 469, Acts of 1911, approved May 24; Chapter 583, Acts of 1911, approved June 22.

Boxborough, boundary between Harvard and, established. Chapter 484, Acts of 1906, approved June 14.

Boundary between Littleton and, established. Chapter 492, Acts of 1906, approved June 15.

Boxford, boundary between Georgetown and, established. Chapter 253, Acts of 1904, approved April 22.

Boundary between Middleton and, established. Chapter 252, Acts of 1904, approved April 22.

Boundary between North Andover and, established. Chapter 147, Acts of 1904, approved March 12.

Boundary between Rowley and, established. Chapter 148, Acts of 1904, approved March 12.

Boylston, boundary between West Boylston and, established. Chapter 360, Acts of 1905, approved May 2.

Braintree, boundary between Holbrook and, established. Chapter 149, Acts of 1903, approved March 11.

Brookfield, boundary between North Brookfield and, established. Chapter 240, Acts of 1910, approved March 18.

Boundary between West Brookfield and, established. Chapter 510, Acts of 1910, approved May 13.

Brookline, boundary between NEWTON and, established. Chapter 249, Acts of 1907, approved March 28.

CAMBRIDGE, part of, annexed to Belmont, and boundary between Belmont and, readjusted. Chapter 77, Acts of 1906, approved February 16.

Part of boundary between BOSTON and, established. Chapter 312, Acts of 1910, approved March 29.

Boundary between Arlington and, established. Chapter 405, Acts of 1911, approved May 5.

Carlisle, part of boundary between Concord and, established. Chapter 379, Acts of 1903, approved May 23.

Carver, part of boundary between Wareham and, established. Chapter 394, Acts of 1901, approved May 16.

Charlton, boundary between Oxford and, established. Chapter 92, Acts of 1907, approved February 11.

Boundary between Southbridge and, established. Chapter 96, Acts of 1907, approved February 11.

Cheshire, boundary between New Ashford and, established. Chapter 670, Acts of 1912, approved May 8.

Clarksburg, boundary between Florida and, established. Chapter 482, Acts of 1913, approved April 10.

Clinton, boundary between Berlin and, established. Chapter 359, Acts of 1905, approved May 1.

Colrain, boundary between Leyden and, established. Chapter 327, Acts of 1911, approved April 24.

Concord, part of boundary between Carlisle and, established. Chapter 379, Acts of 1903, approved May 23.

Dana, boundary between Greenwich and, established. Chapter 401, Acts of 1911, approved May 4.

Dartmouth, part of, annexed to NEW BEDFORD. Chapter 256, Acts of 1911, approved April 6.

Douglas, boundary between Sutton and, established. Chapter 426, Acts of 1907, approved May 16.

Dover, boundary between Medfield and, established. Chapter 389, Acts of 1903, approved May 27.

Boundary between Walpole and, established. Chapter 146, Acts of 1904, approved March 12.

Dudley, boundary between Southbridge and, established. Chapter 97, Acts of 1907, approved February 11.

Easthampton, boundary between NORTHAMPTON and, established. Chapter 395, Acts of 1914, approved April 21.

Enfield, boundary between Greenwich and, established. Chapter 572, Acts of 1910, approved May 26.

Essex, boundary between Hamilton and, established. Chapter 151, Acts of 1904, approved March 12.

Florida, boundary between Clarksburg and, established. Chapter 482, Acts of 1913, approved April 10.

Foxborough, part of boundary between Norfolk and, and boundary between Walpole and, established. Chapter 380, Acts of 1903, approved May 23.

Gardner, boundary between Westminster and, established. Chapter 410, Acts of 1908, approved April 17.

Boundary between Winchendon and, established. Chapter 409, Acts of 1908, approved April 17.

Georgetown, boundary between Boxford and, established. Chapter 253, Acts of 1904, approved April 22.

Gloucester, boundary between Manchester and, located and defined. Chapter 379, Acts of 1902, approved May 6.

Grafton, boundary between Shrewsbury and, established. Chapter 93, Acts of 1907, approved February 11.

Boundary between Westborough and, established. Chapter 94, Acts of 1907, approved February 11.

Boundary between Worcester and, established. Chapter 90, Acts of 1907, approved February 11.

Greenwich, boundary between Enfield and, established. Chapter 572, Acts of 1910, approved May 26.

Boundary between Dana and, established. Chapter 401, Acts of 1911, approved May 4.

Groveland, boundary between West Newbury and, established. Chapter 249, Acts of 1904, approved April 22.

Hamilton, boundary between Essex and, established. Chapter 151, Acts of 1904, approved March 12.

Boundary between Ipswich and, established. Chapter 150, Acts of 1904, approved March 12.

Boundary between Wenham and, established. Chapter 356, Acts of 1905, approved May 1.

Hanson, part of boundary between Pembroke and, established. Chapter 194, Acts of 1903, approved April 3.

Harvard, boundary between Boxborough and, established. Chapter 484, Acts of 1906, approved June 14.

Boundary between Littleton and, established. Chapter 483, Acts of 1906, approved June 14.

Hinsdale, boundary between Peru and, established. Chapter 169, Acts of 1912, approved February 28.

Holbrook, boundary between Braintree and, established. Chapter 149, Acts of 1903, approved March 11.

Holden, boundary between Paxton and, established. Chapter 157, Acts of 1906, approved March 13.

Holyoke, part of Northampton annexed to. Chapter 480, Acts of 1909, approved June 9.

Hopkinton, boundary between Milford and, established. Chapter 423, Acts of 1907, approved May 16.

Boundary between Upton and, established. Chapter 424, Acts of 1907, approved May 16.

Hudson, boundary between Berlin and, established. Chapter 358, Acts of 1905, approved May 1.

Boundary between Stow and, established. Chapter 441, Acts of 1905, approved May 24.

Hyde Park, town, annexed to Boston. Chapter 469, Acts of 1911, approved May 24; Chapter 583, Acts of 1911, approved June 22.

Ipswich, boundary between Hamilton and, established. Chapter 150, Acts of 1904, approved March 12.

Part of boundary between Rowley and, established. Chapter 162, Acts of 1904, approved March 19.

Lancaster, boundary between Leominster and, established. Chapter 363, Acts of 1906, approved May 7.

Boundary between Sterling and, established. Chapter 429, Acts of 1908, approved April 21.

Leominster, boundary between Lancaster and, established. Chapter 363, Acts of 1906, approved May 7.

Leyden, boundary between Colrain and, established. Chapter 327, Acts of 1911, approved April 24.

Littleton, boundary between Boxborough and, established. Chapter 492, Acts of 1906, approved June 15.

Boundary between Harvard and, established. Chapter 483, Acts of 1906, approved June 14.

Longmeadow, part of, annexed to SPRINGFIELD. Chapter 639, Acts of 1914, approved June 6.

LOWELL, part of Tewksbury annexed to. Chapter 335, Acts of 1906, approved April 30.

Lynnfield, boundary between Reading and, established. Chapter 361, Acts of 1905, approved May 2.

Boundary between Saugus and, established. Chapter 407, Acts of 1901, approved May 17.

MALDEN, part of boundary between MEDFORD and, established. Chapter 612, Acts of 1910, approved June 10.

Manchester, boundary between GLOUCESTER and, located and defined. Chapter 379, Acts of 1902, approved May 6.

Marion, part boundary between Wareham and, established. Chapter 126, Acts of 1909, approved March 1.

MARLBOROUGH, boundary between Berlin and, established. Chapter 357, Acts of 1905, approved May 1.

Part of boundary between Southborough and, established. Chapter 393, Acts of 1901, approved May 16.

Mashpee, part of Sandwich annexed to, and part of boundary between Sandwich and, established. Chapter 306, Acts of 1905, approved April 20.

Medfield, boundary between Dover, Norfolk, and Walpole and, established. Chapter 389, Acts of 1903, approved May 27.

MEDFORD, part of boundary between MALDEN and, established. Chapter 612, Acts of 1910, approved June 10.

MELROSE, boundary between Wakefield and, established. Chapter 376, Acts of 1906, approved May 9.

Middleton, boundary between Boxford and, established. Chapter 252, Acts of 1904, approved April 22.

Boundary between North Andover and, established. Chapter 251, Acts of 1904, approved April 22.

Milford, boundary between Hopkinton and, established. Chapter 423, Acts of 1907, approved May 16.

Boundary between Upton and, established. Chapter 422, Acts of 1907, approved May 16.

Millbury, boundary between Oxford and, established. Chapter 95, Acts of 1907, approved February 11.

Boundary between Sutton and, established. Chapter 425, Acts of 1907, approved May 16.

Montgomery, boundary between Russell and, established. Chapter 614, Acts of 1914, approved June 3.

New Ashford, boundary between Cheshire and, established. Chapter 670, Acts of 1912, approved May 8.

New Bedford, part of Dartmouth annexed to. Chapter 256, Acts of 1911, approved April 6.

New Braintree, boundary between North Brookfield and, established. Chapter 330, Acts of 1911, approved April 24.

Boundary between West Brookfield and, established. Chapter 332, Acts of 1911, approved April 24.

Newbury, part of boundary between Rowley and, established. Chapter 219, Acts of 1905, approved March 27.

New Salem, boundary between Prescott and, established. Chapter 340, Acts of 1911, approved April 27.

Newton, boundary between Brookline and, established. Chapter 249, Acts of 1907, approved March 28.

Norfolk, part of boundary between Foxborough and, established. Chapter 380, Acts of 1903, approved May 23.

Boundary between Medfield and, established. Chapter 389, Acts of 1903, approved May 27.

North Adams, part of Williamstown annexed to. Chapter 262, Acts of 1900, approved April 25.

Northampton, part of, annexed to Holyoke. Chapter 480, Acts of 1909, approved June 9.

Boundary between Easthampton and, established. Chapter 395, Acts of 1914, approved April 21.

North Andover, boundary between Boxford and, established. Chapter 147, Acts of 1904, approved March 12.

Boundary between Middleton and, established. Chapter 251, Acts of 1904, approved April 22.

Boundary between North Reading and, established. Chapter 149, Acts of 1904, approved March 12.

Northbridge, boundary between Uxbridge and, established. Chapter 408, Acts of 1908, approved April 17.

North Brookfield, boundary between Brookfield and, established. Chapter 240, Acts of 1910, approved March 18.

Boundary between New Braintree and, established. Chapter 330, Acts of 1911, approved April 24.

Boundary between West Brookfield and, established. Chapter 331, Acts of 1911, approved April 24.

North Reading, boundary between Andover and, established. Chapter 250, Acts of 1904, approved April 22.

Boundary between North Andover and, established. Chapter 149, Acts of 1904, approved March 12.

Oak Bluffs, name of Cottage City changed to. Chapter 27, Acts of 1907, approved January 25.

Oxford, boundary between Auburn and, established. Chapter 302, Acts of 1908, approved March 27.

Boundary between Charlton and, established. Chapter 92, Acts of 1907, approved February 11.

Boundary between Millbury and, established. Chapter 95, Acts of 1907, approved February 11.

Palmer, boundary between Ware and, established. Chapter 471, Acts of 1910, approved April 29.

Paxton, boundary between Holden and, established. Chapter 157, Acts of 1906, approved March 13.

Pembroke, part of boundary between Hanson and, established. Chapter 194, Acts of 1903, approved April 3.

Peru, boundary between Hinsdale and, established. Chapter 169, Acts of 1912, approved February 28.

Phillipston, boundary between Templeton and, established. Chapter 407, Acts of 1908, approved April 17.

Plainville incorporated from part of Wrentham. Chapter 255, Acts of 1905, approved April 4.

Prescott, boundary between New Salem and, established. Chapter 340, Acts of 1911, approved April 27.

Reading, boundary between Lynnfield and, established. Chapter 361, Acts of 1905, approved May 2.

Revere incorporated as a city. Chapter 687, Acts of 1914, approved June 19.

Rowley, boundary between Boxford and, established. Chapter 148, Acts of 1904, approved March 12.

Boundary between Ipswich and, established. Chapter 162, Acts of 1904, approved March 19.

Boundary between Newbury and, established. Chapter 219, Acts of 1905, approved March 27.

Russell, boundary between Montgomery and, established. Chapter 614, Acts of 1914, approved June 3.

Sandwich, part of, annexed to Mashpee and part of boundary between Mashpee and, established. Chapter 306, Acts of 1905, approved April 20.

Saugus, boundary between Lynnfield and, established. Chapter 407, Acts of 1901, approved May 17.

Shrewsbury, boundary between Grafton and, established. Chapter 93, Acts of 1907, approved February 11.

Boundary between Westborough and, established. Chapter 91, Acts of 1907, approved February 11.

Somerville, boundary between Arlington and, established. Chapter 221, Acts of 1910, approved March 16.

Southborough, part of boundary between Marlborough and, established. Chapter 393, Acts of 1901, approved May 16.

Southbridge, boundary between Charlton and, established. Chapter 96, Acts of 1907, approved February 11.

Boundary between Dudley and, established. Chapter 97, Acts of 1907, approved February 11.

Springfield, part of Longmeadow annexed to. Chapter 639, Acts of 1914, approved June 6.

Sterling, boundary between Lancaster and, established. Chapter 429, Acts of 1908, approved April 21.

Stow, boundary between Hudson and, established. Chapter 441, Acts of 1905, approved May 24.

Sutton, boundary between Douglas and, established. Chapter 426, Acts of 1907, approved May 16.

Boundary between Millbury and, established. Chapter 425, Acts of 1907, approved May 16.

Templeton, boundary between Phillipston and, established. Chapter 407, Acts of 1908, approved April 17.

Tewksbury, boundary between Andover and, established. Chapter 373, Acts of 1903, approved May 21.

Part of, annexed to Lowell. Chapter 335, Acts of 1906, approved April 30.

Upton, boundary between Hopkinton and, established. Chapter 424, Acts of 1907, approved May 16.

Boundary between Milford and, established. Chapter 422, Acts of 1907, approved May 16.

Uxbridge, boundary between Northbridge and, established. Chapter 408, Acts of 1908, approved April 17.

Wakefield, boundary between MELROSE and, established. Chapter 376, Acts of 1906, approved May 9.

Walpole, boundary between Dover and, established. Chapter 146, Acts of 1904, approved March 12.

Boundary between Foxborough and, established. Chapter 380, Acts of 1903, approved May 23.

Boundary between Medfield and, established. Chapter 389, Acts of 1903, approved May 27.

Ware, boundary between Palmer and, established. Chapter 471, Acts of 1910, approved April 29.

Wareham, part of boundary between Carver and, established. Chapter 394, Acts of 1901, approved May 16.

Part of boundary between Marion and, established. Chapter 126, Acts of 1909, approved March 1.

Watertown, part of, annexed to Belmont and part of boundary between Belmont and, established. Chapter 378, Acts of 1903, approved May 23.

Part of boundary between Belmont and, established. Chapter 362, Acts of 1911, approved April 29.

Wenham, boundary between Hamilton and, established. Chapter 356, Acts of 1905, approved May 1.

Westborough, boundary between Grafton and, established. Chapter 94, Acts of 1907, approved February 11.

Boundary between Shrewsbury and, established. Chapter 91, Acts of 1907, approved February 11.

West Boylston, boundary between Boylston and, established. Chapter 360, Acts of 1905, approved May 2.

West Brookfield, boundary between Brookfield and, established. Chapter 510, Acts of 1910, approved May 13.

Boundary between New Braintree and, established. Chapter 332, Acts of 1911, approved April 24.

Boundary between North Brookfield and, established. Chapter 331, Acts of 1911, approved April 24.

Westminster, boundary between Gardner and, established. Chapter 410, Acts of 1908, approved April 17.

West Newbury, boundary between Groveland and, established. Chapter 249, Acts of 1904, approved April 22.

Williamstown, part of, annexed to NORTH ADAMS. Chapter 262, Acts of 1900, approved April 25.

Winchendon, boundary between Gardner and, established. Chapter 409, Acts of 1908, approved April 17.

WORCESTER, boundary between Grafton and, established. Chapter 90, Acts of 1907, approved February 11.

Wrentham, part of, incorporated as Plainville. Chapter 255, Acts of 1905, approved April 4.

THE MEDIAN POINT AND CENTER OF POPULATION.

The Median Point. — The geographical distribution of the population as it changes from time to time is always a matter of interest, and is, in a measure, reflected at each census by the determination of what is known as the median point and the center of population, two terms which have quite a different meaning. In fixing the former, it is necessary to ascertain the location of two median lines, namely, a longitudinal line drawn so as to divide the population evenly east and west of the line, and a latitudinal line drawn so as to divide the population evenly north and south of the same. To do this, one must first assume trial median lines, determine how they divide the population, and ascertain the magnitude of errors, so that the proper corrections may be obtained. When the median line passes through a city or town, as is likely to be the case, ward and enumeration district units must be used to divide and distribute the population as accurately as possible.

The meridian of longitude drawn in this manner for Massachusetts cuts the northern boundary of the State in Haverhill about two miles west of the center of the city and passes through Somerville, Cambridge, Boston, and Brookline, finally crossing the shore line in the southern part of the State in the town of Westport at a place very near the Rhode Island–Massachusetts line. The parallel of latitude in the west crosses the New York–Massachusetts line in the town of West Stockbridge, touching the northernmost corner of the city of Worcester and terminating in Boston Harbor at South Boston. The meridian of longitude for 1915 is midway between the corresponding lines for 1895 and 1905, while the parallel of latitude is south of that for 1905 by about the same distance as the one for that year was south of the line for 1895.

It is readily seen that a large movement of the population in the vicinity of Worcester to Pittsfield would have no effect upon the meridian of longitude because both of the districts mentioned are west of the line; if, however, a relatively small number of people were to remove from the eastern part of Boston to the western part of Brookline, or even to the western part of Boston, such a movement would cause a shifting of the median line to the west. It must not be assumed that each of the four sections into which the State is apparently divided geographically by the median lines, as would be shown on the map, contains the same amount of population, since the meridian of longitude bisects, as it were, the *population* of the *State as a whole;* that is, it does not bisect, in terms of population figures, the sections north and south of the latitudinal lines as separate units of area independent of each other, and hence the population of the two sections north of the latitudinal line are not equal; similarly, of course, the population of the two sections south of the latitudinal line are not equal. But it is obvious that the population of the

four sections, when added, must be the population of the entire State; hence it follows that the population of the sections which are diagonally opposite each other are in each case equal. The diagram on page 179 indicates the relative position of the median lines, the median point, and also the center of population.

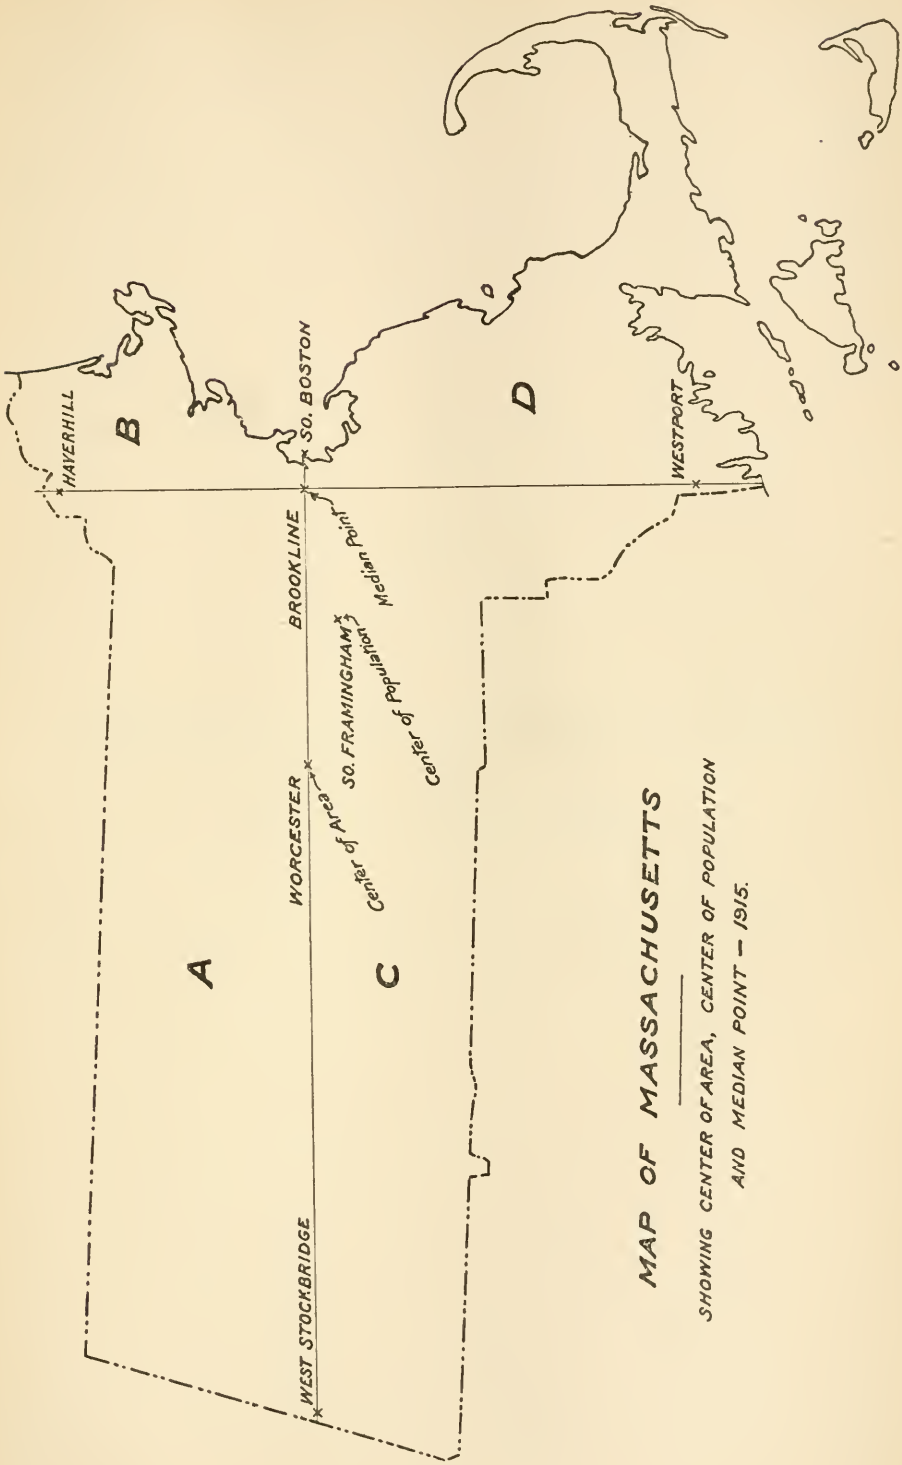
The median point is that at which the two median lines (that is, the meridian of longitude and latitude), drawn as above described, cross. In 1895 the median point was located in Cambridge near the corner of River Street and Putnam Avenue; during the next decade it moved southwest, and was located in Boston near the corner of Commonwealth and Brighton Avenues; and in 1915 it was in Brookline, on Stearns Road near the corner of St. Paul Street, which was southwest of its location in 1895 and southeast of its location in 1905.

But this point is not, properly speaking, the center of population, though likely to be confused with it, since it reflects as it shifts from census to census only the difference in the growth of population, respectively, east and west and north and south of it, — two different and independent factors which must be reconciled in some manner in order to establish the actual center of population, if it be desired to show the trend of the movement of population from census to census.

The Center of Population. — If we consider the surface of the State as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity, and that is the point properly referred to by the term "center of population." It is easily seen that any movement of population affects the location of this point, unlike the median point or the median lines. The method of locating the center of population for the State is to assume two axes of rotation, one perpendicular to the other, entirely without the State boundary as shown on a conveniently sized map. A parallel of latitude and a meridian of longitude are the axes used. Definite points are assumed to be the centers of population for each city or town, and measurements are taken from an axis to each of these predetermined points. The distance measured to a point multiplied by the population of the city or town represented by the point gives the moment of that particular city or town about the axis used for the measurement. The sums of the moments of every city and town about each axis are ascertained and these are divided by the total population of the State, giving as results the moment arms from each axis of the center of gravity or center of population. Lines are drawn parallel to, and a distance equal to the resultant moment arm from, each axis. The intersection of these two lines is the center of population.

The center of population for 1915 as determined by the method above described is in the eastern part of the town of Framingham very near the Natick boundary, and is only one mile from that of 1905, when the center was also in Framingham. During the decade the center of population has moved southeast, in the same general direction as the median point. It may be noted that between 1905 and 1915 the center moved one and a half times as far south as it did east. This location may be compared with that of the center of gravity of the *area* of the State, which is in Worcester near the business section. If the population were evenly distributed over the entire State, the latter would also be the center of population.

NOTE. — This description of the method of determining the median point and center of population is taken from Volume I of the Reports of the Thirteenth Census of the United States modified so as to apply to Massachusetts.



MAP OF MASSACHUSETTS

SHOWING CENTER OF AREA, CENTER OF POPULATION AND MEDIAN POINT – 1915.

PART II

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

TABLE 14 is a *summary* of the principal census data relating to the Composition and Characteristics of the Population, and gives by sex for the State, and for the cities and towns, arranged alphabetically: —

(A) The number of native and foreign born.

(B) The number of *white* persons classified by native of native parentage, native of foreign or mixed parentage, and foreign born; the number of *colored* persons, classified by native and foreign born; the number of all other persons (including Chinese, Japanese, Indian, and all other), classified by native and foreign born.

(C) The number and per cent of *illiterates 10 years of age and over;* the number and per cent of *native, foreign-born, white,* and *colored* illiterates 10 years of age and over; and the total number of illiterates *21 years* of age and over.

(D) The number of *persons of voting age* (*i.e.*, 21 years of age and over), classified by native and foreign born.

(E) The number of *foreign-born white males,* classified by alien, naturalized, unqualified and unknown.

(F) The number of persons in each of 21 specified age periods.[1]

(G) The number of persons 14 years of age and over engaged in gainful occupations as distributed among the following general classes:

(1) Agriculture, forestry, and animal husbandry.
(2) Extraction of minerals.
(3) Manufacturing and mechanical industries.
(4) Transportation.
(5) Trade.
(6) Public service (not elsewhere classified).
(7) Professional service.
(8) Domestic and personal service.
(9) Clerical.

This table is followed, in Parts III and IV, by a series of presentations in greater detail, giving the data for the foreign born by country of birth and accompanied by a brief text analysis.

---

[1] The number of persons of any specified age in any city or town of the Commonwealth is obtainable from the files of the Bureau of Statistics.

TABLE 14.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION, BY SEX.

[NOTE.—"Unqualified" includes paupers, persons under guardianship, and persons whose period of residence "All other" includes Chinese,

PART III

NATIVITY, COLOR OR RACE, ILLITERACY, POLITICAL CONDITION, AGES, AND CONJUGAL CONDITION

EXPLANATORY NOTES.

Note 1. The distribution of the foreign born by country of birth is presented in these tabulations for the State for 24 principal political or geographical divisions, with, in certain cases, their important sub-divisions; and for cities and towns by principal divisions. All figures add *up*, not down; *i.e.*, the population given for the sub-divisions when added up gives the total for the country or general geographical division, and the population given for the various countries or general geographical divisions when added up gives the total for the foreign born. For example, in Table 15, the number of persons in the total population of the State, 3,693,310, is the total of the native, 2,541,265, and the foreign born, 1,152,045; the number of foreign born is the total of the 24 *principal* countries or geographical divisions, including "All Other Foreign Countries"; the number of persons born in Canada, namely, 263,786, is the total of the sub-divisions New Brunswick, Nova Scotia, Prince Edward Island, and Canada, n. o. c.

The abbreviation "n. o. c." means *not otherwise classified.* *Austria, n. o. c.*, means all persons returned as born in those parts of Austria other than Bohemia, Hungary, and Austrian Poland, the population of each of which is given separately. All persons returned as born in Canada, whether of English or French descent (except the specified provinces of New Brunswick, Nova Scotia, and Prince Edward Island, the population of each of which is given separately), are included under the classification of *Canada, n. o. c.; Poland, n. o. c.*, means all persons returned as born in "Poland" without specification as to whether they were natives of Austrian, German, or Russian Poland, the population of each of which is given separately; *Russia, n. o. c.*, means all persons returned as born in those parts of Russia other than Finland, Lithuania, and Russian Poland, the population of each of which is given separately; *Turkey, n. o. c.*, means all persons returned as born in those parts of Turkey not accounted for as born in Armenia, Syria, other Asiatic Turkey, and European Turkey, the population of each of which is given separately.

The terms, "Other Native" and "Other Foreign Countries," possess a slightly different signification from "not otherwise classified." They may include natives of states or countries (*a*) not classified in the first instance for the purpose of tabulation for the reason that such countries were represented by a negligible number in our population, and also (*b*) natives of certain countries for which a classification and tabulation was made and for which, therefore, information is available on the files of the Census Office, but which are represented in such small numbers in the several cities and towns, and not at all in many of them, that it has not been deemed advisable to present the figures by cities and towns. The total for the State of all countries *tabulated* is, however, shown in Table 15, of which the classification in Tables 18 and 19 for the cities and towns is a condensation accomplished by making certain combinations. These combinations, the figures for each component country of which are shown for the State in Table 15, are as follows: —

Austria, exclusive of Austrian Poland, is composed of Bohemia, Hungary, and Austria, not otherwise classified.
Portugal, including island possessions, is composed of Portugal proper, Western Islands, and other island possessions.
Turkey is composed of Turkey in Asia other than Armenia and Syria, Turkey in Europe, and Turkey, not otherwise classified.
West Indies is composed of Cuba and West Indies, n. o. c.
Other Foreign Countries includes Belgium, China, Denmark, Japan, Netherlands, Roumania, Serbia, South America, Central America, Mexico, Spain, Switzerland, and all other foreign countries, and born at sea of foreign parents.

Note 2. In the State Census of 1905, American citizens born abroad, persons born in the outlying possessions of the United States prior to the transfer of sovereignty (Hawaii, the Philippines, and Porto Rico), and persons born at sea of American parents were classified as foreign born; in the Census of 1915, following the tabulation rules of the United States Census, these groups have been classified as native born and in the table here presented the totals of native and foreign born for 1905 have been adjusted accordingly. The designation "Other Native" includes United States, not otherwise classified, persons of unknown country of birth, all persons born in the outlying possessions of the United States, and persons born at sea of American parents.

Note 3. In the Census of 1905, the enumerators were not required to distinguish between Austrian Poland, German Poland, and Russian Poland; therefore, all Poland recorded by the enumerators was credited to Poland. If a schedule was received marked "Germany (Pol.)," it was tabulated as Germany. If it was received as "Poland (Ger.)," it was tabulated as Poland. This was also true for "Poland (Aus.)," and "Poland (Russ.)," and *vice versa.* The number of Austrians, Germans, and Russians as recorded in the Census of 1905 was probably somewhat greater by this method of editing than they would have been under the method used in the Census of 1915, inasmuch as in the latter census in all cases where the enumerator simply returned "Poland" as the country of birth, without differentiating between Austrian, German, and Russian, in accordance with instructions, the Census Office compared the entry with the answer given the inquiry as to ability "to read and write English; if not what language?" and the answer to this inquiry was used to determine whether the persons enumerated were natives of Austrian Poland, German Poland, or Russian Poland. By the method of enumeration and tabulation followed in the Census of 1905 the number of persons born in "Poland" as shown for that census was 21,490. This figure is obviously not comparable with the number 1,895, entered for 1915 on the line "Poland, n. o. c.," in Table 15, since the latter only represents those persons returned merely as "Poles" or in such a way as to make it impossible to accurately segregate and distribute them.

Note 4. The figure for Russia, *n. o. c.*, 1905 (49,304), includes Lithuania, and to a certain extent also Russian Poland, and is, therefore, not comparable with the corresponding figure for 1915 on this line (96,357), which strictly represents natives of Russia proper, exclusive of natives of Finland, Lithuania, and Russian Poland, these being separately shown.

Note 5. In compiling the tabulation of the Census of 1915 it has not been deemed essential to attempt a distribution of foreign-born persons to their respective countries of birth in as great detail as was done in 1905, *i.e.*, in cases where such persons were found in very small numbers; there is, therefore, for 1915 a total of 1,051 foreign born not classified by country of birth, together with those born at sea of foreign parents. The term "Other Foreign Countries" as used in this connection comprises for 1905 persons born at sea of foreign parents (415), Bulgaria (51), Asia, *n. o. c.* (165), Africa (134), and foreign born, *n. o. c.* (7).

NATIVITY.

The presentations immediately following, Tables 15–19, inclusive, deal with the classification of the population by Native and Foreign Born and Parent Nativity; Table 20, with Color or Race; Table 21, with Illiteracy; Tables 22–24, inclusive, with Political Condition; Table 25, with Ages; and Table 26, with Conjugal Condition.

Native and Foreign Born.

There is no subject for which the census is a source of information of greater public interest than that of the composition of the population as respects nativity, and none for which the demand for data is greater or more insistent. This has perhaps always been true, but it is more so now than ever by virtue of the steadily increasing appreciation of the importance of the problem of Americanizing the foreign born and their education for citizenship. The first question naturally asked in this connection is: What is the proportion of the foreign born in the total population, — is it increasing or decreasing? And the second is: From what countries do the foreign born chiefly come?

TABLE 15 shows the aggregate native population of the Commonwealth, classified by the New England States and New York, and the foreign born, classified by country of birth, with comparisons for 1905 and 1915, and the increase or decrease in number and percentage.

Number of Foreign Born Living in Massachusetts in 1915.

From this table the following summary has been drawn in which the various countries of birth of the foreign born are arranged in accordance with the number of persons contributed by each to the population in 1915, and the percentage which each such group was of the total foreign-born population of the State. In this arrangement the usual census classification of countries has been followed with respect to the several parts of the British Empire making the principal contributions; *i.e.*, England, Scotland, Ireland, Newfoundland, New Brunswick, Nova Scotia, Prince Edward Island, and Canada, not otherwise classified, are shown separately, by which method of presentation Ireland heads the list with 210,166, or 18.2 per cent of the foreign-born population of the State. If, however, Canada (including New Brunswick, Nova Scotia, and Prince Edward Island) be regarded as a unit by itself properly comparable with England, Scotland, and Ireland, the total population of Massachusetts to be credited as natives of that country would be 263,786, or 22.9 per cent of the total foreign born, with the natives of Ireland next in order.

Country of Birth	Total Foreign Born	Per Cent	Country of Birth	Total Foreign Born	Per Cent

Increase of the Foreign Born.

The gradually increasing proportion of the foreign born in the population of the Commonwealth within the last two generations, *i.e.*, during the 65-year period 1850–1915, is reflected in the following summary table:

Census Year	Total Population	Native	Foreign Born	Per Cent of Total Population	
				Native	Foreign Born
1850	994,514	830,490	164,024	83.5	16.5
1855	1,132,369	887,106	245,263	78.3	21.7
1860	1,231,066	970,960	260,106	78.9	21.1
1865	1,267,031	1,001,545	265,486	79.0	21.0
1870	1,457,351	1,104,032	353,319	75.8	24.2
1875	1,651,912	1,233,008	418,904	74.6	25.4
1880	1,783,085	1,339,594	443,491	75.1	24.9
1885	1,942,141	1,415,274	526,867	72.9	27.1
1890	2,238,943	1,581,806	657,137	70.6	29.4
1895	2,500,183	1,735,253	764,930	69.4	30.6
1900	2,805,346	1,959,022	846,324	69.8	30.2
1905	3,003,680	2,092,501	911,179	69.7	30.3
1910	3,366,416	2,307,171	1,059,245	68.5	31.5
1915	3,693,310	2,541,265	1,152,045	68.8	31.2

It will thus be noted that the proportion of the foreign born to the total population has almost doubled during this period as a whole, though the rate of increase has shown a tendency to slow down during the last 20 years or since 1895, being, in fact, less in 1915 than in 1910. It is, however, of interest to note the actual increase in the two groups, native and foreign born, in number and percentage during the last decade 1905–1915:

Nativity	1915	1905	Increase in 1915 as Compared with 1905	
			Number	Per Cent
Total	**3,693,310**	**3,003,680**	**689,630**	**23.0**
Native born	2,541,265	2,092,501	448,764	21.4
Foreign born	1,152,045	911,179	240,866	26.4

From the United States Census of 1900 to the State Census of 1905, there was an increase in the native born of 133,479, or 6.8 per cent; in the next five-year period from 1905 to 1910, the native born increased by 214,670, or 10.3 per cent; and in the last five-year period from 1910 to 1915, this class increased by 234,094, or 10.1 per cent. On the other hand, the increase in the foreign born from 1900 to 1905 was 64,855, or 7.7 per cent; from 1905 to 1910, it was 148,066, or 16.2 per cent; and from 1910 to 1915 it was 92,800, or 8.8 per cent. The falling off in the percentage of increase in the foreign born since the United States Census of 1910 is doubtless to be accounted for, in large part, by the virtually absolute stoppage of immigration at the outbreak of the European War, which occurred some eight months before the taking of the census on April 1, 1915, and also by the departure of considerable numbers of foreign born to their native lands during this period to participate in the war.

The largest increase in the *number* of persons born in any one foreign country which can be computed on a comparable basis in the 10-year period 1905–1915 was in the natives of Italy, — 71,571 (*i.e.*, from 50,558 to 122,129), or 141.6 per cent increase; the natives of Greece increased during the same period from 4,672 to 18,163, or 288.8 per cent. It is impossible to state accurately the increase during the decade in natives of Russia, *i.e.*, for the whole empire, for the reason that the census figures for Russia in 1905 included Lithuania, and, to a certain extent also, Russian Poland.

No effort was made in the State Census of 1905 to differentiate between the Poles according to country of birth of their political allegiance, so that only the total can be shown for that year, but in the United States Census of 1910, this was attempted through the effort to learn the "mother-tongue" of the population, and in the State Census of 1915, the distinction by political country of birth was also made. The following table may, therefore, be of interest as showing the rapid growth of this element in the population of Massachusetts:

NUMBER OF PERSONS OF POLISH BIRTH

	1915	1910	1905
Total	**83,373**	**58,273**	**21,490**
Born in:			
Austrian Poland	33,311	28,905	–
German Poland	1,172	1,595	–
Russian Poland	46,995	27,594	–
Poland, n. o. c.	1,895	179	–

It thus appears that the natives of what was once Poland, before its partition between Austria, Germany, and Russia, in the population of Massachusetts increased between 1905 and 1910 by 36,783, or 171.2 per cent, and between 1910 and 1915 by 25,100, or 43.1 per cent.

The Turks constitute another foreign-born element which has been increasing at a remarkable rate in our population in recent years. There were 8,263 natives of Turkey and the various countries under its dominion returned in the Census of 1905; in 1915, the number was found to be 21,986, an increase in 10 years of 13,723, or 166.1 per cent. The Armenians alone increased from 2,855 to 6,374, or 123.3 per cent, and the Syrians from 3,381 to 7,771, or 129.8 per cent. Of the total number reported for 1915, 17,576 were from Asiatic Turkey and 2,184 from European Turkey, the remainder, 2,226, not being distributed as between Asia and Europe. The natives of Turkey in the population of Massachusetts for the Census of 1910 were 16,138.

The increase in the population of Portuguese birth is also noteworthy, rising from 27,937 in 1905 to 52,133 in 1915, — an increase of 86.6 per cent.

The largest single overseas foreign-born element in the population of Massachusetts, as has been the case since the first immigration of peoples other than English, was the Irish, but it is significant that the absolute number of persons born in Ireland has been steadily decreasing since 1890. In that year the number of such persons was 259,902; in 1915 it had dropped to 210,166, a decline of 19.1 per cent, the difference being due to decreased immigration. This was not particularly marked in the Census of 1895, when there were 258,247 Irish-born reported, a decrease of only 1,655, or 0.6 per cent; but in the next five-year period the number dropped to 249,916, or 3.2 per cent; in 1905, it was 236,373, a five-year decrease of 5.4 per cent; by 1910 there was another drop to 222,867, or 5.7 per cent; during the last five-year period the number decreased to 210,166, or 5.7 per cent. For the 10-year period since the State Census of 1905, with which comparisons are made in the accompanying table, the decrease was 11.1 per cent. The largest foreign-born element in our population next to those of Irish birth were the natives of Russia, — including those born in Finland and Lithuania, but excluding those born in Russian Poland, — numbering 123,450, and the next largest were the Italians, who, as already noted, have increased 141.6 per cent in 10 years and now number 122,129.

Distribution of the Foreign Born.

TABLE 16 is a new feature in Massachusetts census presentations, showing the distribution of the foreign born by leading countries of birth represented in the population. It is self-explanatory, but it is of interest to note that Boston led the cities and towns of the State in the number of persons born in the following countries: — Ireland, 64,455; Italy, 42,932; Austria, (exclusive of Austrian Poland), 3,107; England, 14,003; France, 1,091; Germany, (exclusive of German Poland), 8,402; Lithuania, 2,683; New Brunswick, 7,651; Newfoundland, 4,876; Norway, 2,132; Nova Scotia, 20,989; Poland (including Austrian, German, and Russian

Poland), 9,445; Prince Edward Island, 5,057; Russia, n. o. c., 41,669; Scotland, 6,134; Syria, 1,960; Turkey, n. o. c., 1,315; Wales, 292; West Indies, 726. The city next to Boston having the largest Irish-born population was Worcester, with 9,928; Cambridge was next, with 9,846. Next to Boston, the city having the largest number of English was New Bedford, with 10,586; Fall River was next, with 9,772. Next to Boston in Polish population was Worcester, with 5,741; Chicopee had 4,808. The largest number of Russians, outside of Boston, was found in Chelsea, with 9,217; the largest number of Italians, outside of Boston, was in Lawrence, with 8,587. The largest number of Lithuanians, outside Boston, was found in Brockton, with 2,071, and the largest number of Syrians, outside Boston, was in Lawrence, with 1,936.

Parent Nativity.

TABLE 17 is a classification by sex of: (1) the Native; (2) the Foreign Born by country of birth; (3) the Native according to the country of birth (*a*) of the father, (*b*) the country of birth of the mother, and (*c*) the country of birth of the parents when both parents were born in the same foreign country. This table must be very carefully read or entirely erroneous and misleading deductions are likely to result. The first section of the presentation appearing on the left-hand page is sufficiently clear and self-explanatory. The second section, appearing on the right-hand page and having to do with parent nativity, has, indeed, no essential relation to the first section, and, moreover, the three sub-divisions of the parent nativity section have no relation to, and should be considered independently of, each other. The confusion which is certain to arise in any attempt to analyze the table as a whole, on the assumption that its several columns are component parts of one presentation, might possibly have been avoided had the three classifications reflecting parent nativity been separately presented; to have done this, however, would have necessitated four separate tables with a repetition for each of the list of countries. In the interest, therefore, of economy in the matter of space, but more particularly to facilitate comparisons of data pertaining to cognate aspects of the same subject, it was decided to compress them within the scope of a single presentation.

As above stated, extreme caution must be used in reading this table. Thus the two general divisions of the population as classified in lines 2 and 3 of the first section of the table, on the left-hand page, into "native" and "foreign born," respectively, when added, make the total population of the State as given on line 1. But while the words "native" and "foreign born" qualify and apply also to the figures entered on lines 2 and 3 of the second, *i.e.*, the parent nativity section, of the table, on page 325, their signification is modified by the fact that this section of the table relates to *native persons only*, as the box heading extending across the top of the page indicates. That is to say, the word "native" and the figures

entered opposite it on *line 2* of page 324 represent the total number of persons of native birth, enumerated in the census, but while the same figures appear on page 325, they are entered, not on line 2, but on *line 1*, since the data on this page are not inclusive of the entire population of the State but relate only to the *native born*. Similarly, the term "foreign born" and the figures opposite it on line 3 of page 324 mean the *total* foreign-born population of the State, but the term "foreign born" when applied to the figures on line 3 of page 325 does not mean foreign born at all,—it means the number of *native* persons having *foreign-born parents*.

The (1) aggregate number of persons of foreign birth is a definitely ascertainable quantity, so also is the (2) number whose fathers are foreign born, (3) whose mothers are foreign born, and (4) both of whose parents are foreign born and of the same foreign country. Similarly, the (1) aggregate number of native born, the (2) native born having native fathers, the (3) native born having native mothers, and the (4) native born having both parents native are also definitely ascertainable quantities. With this understanding of the negative significance of the table so far as the relation of its four parts to each other is concerned, let us see what of interest may be drawn from it. First, we may note that of the total 2,541,265 native born, there were 1,191,655 both of whose parents were native born, and 863,926 both of whose parents were foreign born of the same foreign country, leaving 485,684, of which 375,037 were of mixed parentage, *i.e.*, one native and one foreign born, and 110,647 of mixed foreign parentage, *i.e.*, both parents foreign born of different foreign countries. We do not present statistics in the Census of 1915 showing the parent nativity of the *foreign born*, assuming that the number of foreign-born persons whose parents were not also foreign born and of the same foreign country was negligible; therefore, if we assume that both parents of all the foreign born were also foreign born and of the same foreign country, we may say that the foreign-born persons of pure foreign stock (whose parents were both born in the same foreign country),[1] represented 1,152,045 and the native persons of pure foreign stock were 863,926, making a total of 2,015,971 persons of pure foreign stock, while the pure native stock (*i.e.*, native persons of native parentage) numbered 1,191,655; we thus have a total of 3,207,626 persons representing pure native and pure foreign parentage, and if we assume that these two classes represented the irreducible minimum of the pure foreign and the pure native stock, respec-

[1] The census obviously cannot classify, according to descent in a strict genealogical sense, the millions of persons enumerated, since it is not feasible to undertake to ascertain the nativity of ancestors further back than the parents (in the State Census of 1905 information as to grandparent nativity was collected but with results that did not justify repetition of the effort). The term "*pure* foreign stock" in this connection is used, therefore, with a somewhat restricted meaning, carrying the implication that it must be assumed, for practical purposes, that the country of birth of the parents determines the "stock." It is doubtful, however, whether there is any considerable number of persons both of whose parents were born in a given foreign country who are not likewise descended through more than one generation from persons born in the same country; for example, the number of persons both of whose parents were born in Ireland but of whom it might be said, could the facts be ascertained, that one or more of their four grandparents or one or more of their eight great grandparents may have been born in some other country and that, therefore, they cannot properly be described as of "pure" Irish stock, — is probably negligible.

tively, in the population of Massachusetts, it appears that the former was 54.6 per cent and the latter 32.3 per cent of the total population of the State; there then remains 485,684, or 13.1 per cent of the total population, which by this deduction represented the number of native born of mixed parentage, 375,037 (*i.e.*, one parent native and one foreign born), and of mixed foreign parentage, 110,647 (*i.e.*, both parents foreign born, but of different foreign countries). This analysis is expressed in tabular form below:

Native born, both of whose parents were native born	1,191,655
Foreign born, both of whose parents it is assumed were foreign born	1,152,045
Native born, both of whose parents were foreign born of the same foreign country	863,926
Native born, one of whose parents was native and one foreign born (375,037), and both foreign born but of different foreign countries (110,647)	485,684
Total population	3,693,310

Now, if we add the last three groups of the above table we shall have a total of 2,501,655, which may be said to include all persons of foreign birth and all persons of native birth, one or both of whose parents were foreign born, and if we choose to designate the new group thus created as comprising the "foreign" element, — *i.e.*, persons of foreign blood not more than one generation removed, — we may do so and say that this element constituted 67.7 per cent of the total population of the State, while the native element constituted 32.3 per cent. To do this, however, must be seen to be somewhat arbitrary; for why should the 375,037 native-born persons, one of whose parents was native born and one foreign born, be arbitrarily classified with a so-called foreign element? In fact, being themselves native born, ought they not with greater propriety be classified with the native born? If, therefore, it be desired for any reason to classify the population broadly into but two groups based upon a combination of nativity and parent nativity factors, the following is suggested as the most logical division that can be made:

Native born, one or both of whose parents were native born	1,566,692
Foreign born, and native born both of whose parents were foreign born	2,126,618
Total population	3,693,310

By this method of classification, it appears that 42.4 per cent of the total may be regarded as of native and 57.6 per cent as "foreign" stock. The predominant countries represented in the Census of 1915 by the 2,126,618 foreign born and the native born, both of whose parents were foreign born, were Canada, n. o. c., England, Germany, Ireland, Italy, New Brunswick, Nova Scotia, Poland (including Austrian, German, and Russian Poland), Portugal, Russia (exclusive of Russian Poland), Scotland, and Sweden.

TABLE 18 presents by cities and towns having a population of 2,500 or more, *by sex,* for certain selected countries of birth and sub-divisions, the same class of data given for the State in Table 17.

TABLE 19 is a presentation, similar to Table 18, for places of less than 2,500 population but without classification by sex. A sex classification for these smaller places is, however, obtainable from the files of the Census Office.

COLOR OR RACE.

TABLE 20 is a presentation for the State of the native and foreign born by *color or race,* and *sex.* This may be summarized as follows:

Nativity	Total	White	Colored	All Other
Total	**3,693,310**	**3,644,273**	**45,598**	**3,439**
Native	2,541,265	2,504,151	35,634	1,480
Foreign born	1,152,045	1,140,122	9,964	1,959

Thus it appears that of the total native population 98.5 per cent was white, 1.4 per cent was colored, and 0.1 per cent was Chinese, Japanese, Indian, and all other races; while of the total population, both native and foreign born, 98.7 per cent was white, 1.2 per cent was colored, and 0.1 per cent was of all other races.

The term "colored" as always used in Massachusetts censuses is not perhaps strictly scientific, but need cause no confusion in comparison with the United States census figures if it be understood that it is meant to apply only to persons of negro blood or an admixture thereof. The 9,964 classified as foreign-born colored are distributed as follows by principal countries of birth:

Total number of foreign-born colored	**9,964**
Portugal	4,948
Portugal proper	1,305
Island possessions	3,643
British possessions, n. o. c.	1,744
Nova Scotia	1,260
West Indies, n. o. c.	1,250
Canada, n. o. c.	195
New Brunswick	171
South and Central America and Mexico	87
England	60
Cuba	41
Prince Edward Island	34
Denmark	29
Netherlands	23
France	16
Ireland	14
Other foreign countries	92

The increase in the colored population by census years from 1790 to 1915 was as follows:

Census Year	Colored	Census Year	Colored	Census Year	Colored
1790	5,463	1855	9,767	1890	22,144
1800	6,452	1860	9,602	1895	26,540
1810	6,737	1865	10,167[2]	1900	31,974
1820	6,868	1870	13,947	1905	34,041
1830	7,049[1]	1875	15,484	1910	38,055
1840	8,669	1880	18,697	1915	45,598
1850	9,064	1885	18,335		

[1] Includes 128 "All other persons (except Indians not taxed)."
[2] This number includes the Indians in the State.

The number of colored for cities and towns having 100 or more persons of this race is shown in the following table in which the cities and towns are arranged in the order of the numerical strength of the colored population:

Boston	15,581	Bourne	224
Cambridge	5,181	Marion	219
New Bedford	3,431	Lawrence	191
Springfield	1,785	Barnstable	182
Worcester	1,319	Attleboro	163
Everett	1,134	Amherst	152
Wareham	1,017	Nantucket	152
Lynn	732	Freetown	139
Newton	672	Mashpee	136
Taunton	655	Lowell	130
Brockton	642	North Adams	119
Malden	579	Salem	118
Medford	503	Newburyport	117
Pittsfield	423	Williamstown	117
Haverhill	394	Andover	116
Fall River	384	Melrose	114
Falmouth	366	Oak Bluffs	113
Carver	352	Great Barrington	112
Harwich	348	Rochester	112
Brookline	345	Middleborough	111
Chelsea	338	Fairhaven	108
Plymouth	333	Duxbury	103
Somerville	280	Sheffield	103
Winchester	274	Greenfield	102
Woburn	264		

ILLITERACY.

TABLE 21 shows the number of illiterates in the population 10 years of age and over by native and foreign born (native white by parent nativity and foreign-born white by country of birth), color or race, and age periods (10 and over but under 21 years, and 21 years and over,

including age unknown) by sex, for the State. Similar information for cities and towns is obtainable from the files of the Census Office. The determination of literacy or illiteracy by means of the census is wholly a matter of deduction, since obviously the question of literacy is not one that can be categorically answered on a schedule. Some test must be taken as a basis, and in the nature of the case this must be very simple. Moreover, the test is not necessarily applied by the enumerator in person to the person enumerated, — it is the result, probably, oftener than otherwise, of questions asked by the enumerator of some third person, — that member of the family who gives him all the other data he enters on his schedule. The inquiry bearing on the question of literacy which is asked on the census schedule elicits answers which enables the Census Office in the process of tabulation to determine whether the person enumerated is:

(1) Able to read and write English.
(2) Able to read English but cannot write it.
(3) Able to write English but cannot read it.
(4) Able to read English and write some other language.
(5) Able to write English and read some other language.
(6) Able to read some other language but cannot write it.
(7) Able to write some other language but cannot read it.
(8) Able to read and write some other language but not English.
(9) Able neither to read nor write any language.

For the practical purposes of a tabulation of "illiterates," it becomes necessary to determine upon as simple a definition as possible, and in this respect we have adopted that used by the United States Census Office as follows, namely, *persons unable to write regardless of ability to read are classified as illiterate,* which would comprise all persons classified in the categories 2, 6, and 9, above. The total of such persons in the Census of 1915 was 128,563, or 4.3 per cent of the population of Massachusetts 10 years of age and over; by censuses since 1890 the number and percentage were as follows:

Year	Population 10 Years of Age and Over	Number of Illiterates	Per Cent
1890	1,839,607	114,468	6.2
1895	2,040,417	127,655	6.3
1900	2,267,048	134,043	5.9
1905	2,459,264	126,348	5.1
1910	2,742,684	141,541	5.2
1915	2,994,158	128,563	4.3

Of the 128,563 illiterates in 1915, 6,184, or 4.8 per cent, were native and 122,379, or 95.2 per cent, foreign born; 125,307, or 97.5 per cent, were white. Of the foreign-born illiterates, 22.9 per cent were natives of Italy; 16 per cent, of Portugal; 13 per cent, of Canada (including the

Provinces); 13 per cent, of Poland (including Austrian, German, and Russian Poland); 11.8 per cent, of Russia (exclusive of Russian Poland); and 6.9 per cent, of Ireland.[1]

POLITICAL CONDITION.

TABLES 22, 23, and 24 deal with the Political Condition of the male population of the Commonwealth taken as a whole. On page 33 (Part I) the population and number of legal voters are shown in comparison by years for the 50-year period, 1865–1915, from which it appears that during the half-century the population of the Commonwealth nearly trebled, increasing by 191.5 per cent, while the number of legal voters increased during the same period by 215.2 per cent. In considering this subject it is necessary that the term "legal voters" should be clearly understood and particularly that legal voters be not confounded with registered voters, since with the latter the census is not concerned. As was said on a preceding page:[2]

> While the Constitution requires a census of "legal voters" to be taken, it nowhere specifically defines the term, nor is it defined in any statute of the Commonwealth. It accordingly devolves upon the census-taking authority to determine what constitutes a "legal voter," and this has always been done by giving the most feasible interpretation to the several qualifications laid down in the Constitution, the possession of which seemed to be intended by that instrument as conditions prerequisite for the exercise of the franchise. From these provisions it appears that a legal voter may be defined as a *native male 21 years of age or over or a foreign-born male 21 years of age or over who has been naturalized either by his own act or that of his father, provided such person, whether native or foreign born has resided in Massachusetts one year and in the city or town six months and can read and write the English language and is not a pauper or under guardianship.*
>
> The number of legal voters in the State and in each city and town is, therefore, a matter of deduction, being the number of persons in the entire population who can respond to these several qualifications. It should be noted that the term "legal voter" has within this interpretation a technical meaning quite different from the term "registered voter." A "legal voter," in other words, is a person who is a *potential* voter, that is, he possesses the qualifications necessary, under the Constitution, to enable him to register for voting purposes; but while he may thus be, in a constitutional sense, a legal voter, he can, of course, have no legal right to exercise the act of voting without conforming to an additional requirement imposed by a statute of the Legislature, namely, that of registration.

Table 22 shows the total number of males in the State of voting age, *i.e.*, 21 years and over including age unknown, by color or race, by native

[1] For a more complete analysis of and comment upon the illiteracy statistics of the Census of 1915, the reader is referred to a bulletin issued by the Department of University Extension of the State Board of Education entitled "The Problem of Immigrant Education in Massachusetts," for which data were prepared and furnished by this office showing for each city and town in the Commonwealth the total population, the total foreign born, the number of foreign-born persons from non-English speaking countries, the number of native and foreign-born persons who cannot read and write English, and the percentage of the foreign born who cannot read and write English.

[2] P. 5, Part I, General Introduction.

and foreign born, and the aliens classified by length of residence in the United States. Summarizing the total it may be presented as follows:

Legal Voters:				
Native			579,755	
Foreign born			196,134	
Total legal voters				775,889
Non-Legal Voters:				
Aliens:				
(*a*) Less than one year resident in the United States		5,284		
(*b*) Resident 1 year and over but less than 6 years		91,606		
(*c*) Resident 6 years and over		200,586		
(*d*) Period of residence unknown		1,896		
Total			299,372	
Unqualified only by not having resided in Massachusetts one year or the city or town six months:				
Native		21,226		
Foreign born		3,845		
Total			25,071	
Native illiterates	2,915			
Native under guardianship	10,405			
		13,320		
Foreign born under guardianship		7,644		
Total			20,964	
Unknown political condition:				
Native		164		
Foreign born		48		
Total			212	
Total non-legal voters				345,619
Total males 21 years of age and over				1,121,508

The male population from the standpoint of voting potentiality on the ground of age is composed of two classes, — those 21 years of age and over including age unknown, who may be referred to as males of voting age, and those under 21 years of age. With the latter group we are not especially concerned, except that it may be of passing interest to note that the proportion of the two groups to the total male population was substantially the same in 1915 as in 1905, — the 905,583 males of voting age in 1905 composing 62 per cent of the total number of males, 1,461,589; while in 1915 this group, which numbered 1,121,508, was 61.8 per cent of the total number of males. Of greater significance is the proportion of legal voters to the male population of voting age, and the distribution of the total population of voting age between the sexes. This is shown below for the State Censuses of 1865–1915, inclusive, it being assumed that 21 would be the voting age for women were they possessed of the franchise.

Year	Population of Voting Age					Legal Voters	
	Both Sexes	Males		Females			
		Number	Per Cent of Total	Number	Per Cent of Total	Number	Per Cent of Males of Voting Age
1865	745,835	343,688	46.1	402,147	53.9	246,182	71.6
1875	965,341	455,861	47.2	509,480	52.8	351,113	77.0
1885	1,179,504	555,969	47.1	623,535	52.9	442,616	79.6
1895	1,559,966	748,645	48.0	811,321	52.0	560,802	74.9
1905	1,884,040	905,583	48.1	978,457	51.9	674,174	74.4
1915	2,306,238	1,121,508	48.6	1,184,730	51.4	775,889	69.2

When we sub-divide the males of voting age into native and foreign born, it is seen that the relation of these two to the total number of males of voting age appreciably changed in the decade:

Males of Voting Age	1915	1905	Per Cent of Increase	Per Cent of Distribution	
				1915	1905
Total	**1,121,508**	**905,583**	**23.8**	**100.0**	**100.0**
Native	614,465	520,049	18.2	54.8	57.4
Foreign born	507,043	385,534	31.5	45.2	42.6

It thus appears that the percentage of native males of voting age of the whole number of males of voting age declined from 57.4 to 54.8, and the percentage of foreign-born males of the whole number of males of voting age increased correspondingly from 42.6 to 45.2. These percentages, however, represent merely static conditions. Their real significance as bearing upon the future does not appear unless we consider them in conjunction with the rate at which the two groups increased during the decade. Thus, while the native males of voting age actually increased 18.2 per cent from 1905 to 1915, the foreign-born males of voting age increased 31.5 per cent.

Having noted the proportion of native and foreign born among the males of *voting age,* let us examine, how these are distributed according to their actual potential voting power. Thus of 614,465 native males of voting age, 579,755, or 94.4 per cent, were legal voters,—the remainder, 34,710, were unqualified because of (*a*) not having resided in the State a full year or in the city or town six months, (*b*) illiteracy or being under guardianship, (*c*) persons whose political condition was not ascertainable. Of the 507,043 foreign-born males of voting age, however, only 196,134, or 38.7 per cent, were legal voters, while there remained 310,909 aliens and others not conforming to the specifications of a legal voter. The following comparisons between the Censuses of 1905 and 1915 are, however, significant:

Nativity	Legal Voters		Per Cent of Males of Voting Age		Per Cent of Distribution	
	1915	1905	1915	1905	1915	1905
Total	775,889	674,174	69.2	74.4	100.0	100.0
Native	579,755	489,162	94.4	94.1	74.7	72.6
Foreign born	196,134	185,012	38.7	48.0	25.3	27.4

It thus appears that while the proportion, which the number of native legal voters was of the total native males of voting age, remained practically the same in 1915 as in 1905, — approximately 94 per cent, — the proportion of the foreign-born males who were qualified as legal voters decreased from 48 per cent in 1905 to 38.7 per cent in 1915. There was, however, a slight increase in the number of native legal voters proportionately to the whole number, since they comprised 74.7 per cent of the total number of legal voters in 1915 as against 72.6 per cent in 1905. The actual increase in the number of native legal voters between 1905 and 1915 was 90,593, or 18.5 per cent, as against an increase of 11,122, or 6 per cent, in the foreign born. In 1905 the number of male aliens was 192,344; by 1915 this group had increased 107,028, or 55.6 per cent, although the increase in the total foreign-born males of voting age, as already pointed out, was but 31.5 per cent, — showing the disinclination of large numbers of immigrants in recent years to take steps for qualifying as legal voters by becoming naturalized. This appreciation in the number of male aliens is in like manner reflected in the proportion which the aliens bore to the total number of foreign born; viewing the figures from this angle, we note that of the 385,534 foreign-born males of voting age in 1905, 192,344, or 49.9 per cent, were aliens, while of the 507,043 foreign-born males of voting age in 1915, 299,372, or 59 per cent, were aliens. From this analysis the fact stands out prominently that the *total* foreign-born male population increased from 1905 to 1915, 29.4 per cent, and the foreign-born males *of voting age*, 31.5 per cent, while the foreign-born *legal voters* only gained 6.0 per cent, but the male *aliens* increased 55.6 per cent. The actual figures for these increases were: — total, 130,820; voting age, 121,509; legal voters, 11,122; and aliens, 107,028.

Of the 196,134 foreign-born legal voters, 195,511 were white. This does not mean, however, that this was the total number of naturalized white males. An approximation only of such a number can be obtained by adding the foreign-born disqualified legal voters (naturalized, but not legal voters because not resident the required length of time in the city or town or the State) to the foreign-born legal voters. Among those under guardianship, there are no doubt many naturalized, but this fact was not obtainable in the census. Likewise the United States Census of 1910 lost many naturalized in their classification "Citizenship not reported." Bearing these facts in mind, a comparison of the returns for the

foreign-born white males 21 years of age and over between 1915 (based upon the aggregate of Table 23) and 1910 is of interest:

Foreign-Born White Males 21 Years of Age and Over	1915	1910	Increase (+) or Decrease (—) in 1915 as compared with 1910		Per Cent of Distribution	
			Number	Per Cent	1915	1910
Total	499,839	453,601	+46,238	+10.2	100.0	100.0
Naturalized	199,332	189,126	+10,206	+ 5.4	39.9	41.7
Aliens	292,922	242,049	+50,873	+21.0	58.6	53.4
All others	7,585	22,426	—14,841	—66.2	1.5	4.9

It will be noticed in the above table that while the total increase in the number of foreign-born white males 21 years of age and over was 46,238, the aliens increased by a larger number, namely, 50,873. This peculiarity is explained by the large decrease recorded in the group "all others," which doubtless contained a very large proportion of aliens.[1] Nevertheless, it is an indisputable fact that the aliens are forming a constantly increasing proportion of our adult foreign-born male population. Table 23, showing the distribution of the 499,839 foreign-born white males of voting age by country of origin, brings out that of the gross increase of 52,266 in the number of aliens, 16,776 came from Russia (including Russian Poland), 16,230 from Italy, 8,497 from Portugal, 4,076 from Greece, 3,295 from Turkey, and 3,392 from Austria. A study of the table, "Aliens by Length of Residence in the United States," shown later, brings out the fact that there were enough aliens to account for the increases from these countries, who had been here too short a time to become naturalized, *i.e.*, not over five years.

Table 24 segregates the naturalized foreign-born white males of voting age into legal voters and those unqualified for voting by virtue of insufficient length of residence in the State or city or town, showing distribution by country of origin, and segregates the aliens according to length of residence in the United States, also by country of origin; the table also shows the distribution by country of origin of those under guardianship and of unknown political condition. The most striking fact apparent in this table is that of the 292,922 alien white males, 196,434, or 67.1 per cent, had been in the United States six years or over, *i.e.*, more than long enough to have taken out their final papers and to have acquired thereby the potential right to vote, but who had not done so and remained unnaturalized. This would appear to indicate quite clearly the magnitude, so far as numbers are concerned, of the problem of the Americanization of our alien population. The table is, however, still further suggestive when examined in detail, for it then appears that the total number of foreign-born white males of voting age, approximately 500,000, was nearly equally divided between natives of English-speaking

[1] This recorded decrease may not have been real; *i.e.*, the segregation of the aggregate into the two principal classes, naturalized and alien, may have been more accurate in the State Census of 1915 than in the United States Census of 1910, leaving a proportionately smaller remainder to be covered in the "All other" class in 1915 than was the case in 1910.

countries[1] and those from non-English speaking countries, the former slightly predominating. Of the 252,938 natives of the various English-speaking countries, 107,483, or 42.5 per cent, were aliens, and of this number 84,088, or 78.2 per cent, had resided in the United States more than long enough to obtain naturalization. Of the 246,901 natives of non-English speaking countries, 185,439, or 75.1 per cent, were aliens, and of this number 112,346, or 60.6 per cent, had resided in the United States more than long enough to obtain naturalization. The field and opportunity for the assimilation of the foreign born by means of the naturalization process is thus seen to be very far from being limited to the aliens who have come to us from non-English speaking countries, of the 84,088 alien natives of English-speaking countries who had been in the United States six years or more, 50,505, or 60.1 per cent, were natives of the various Canadian provinces (including Canada, n. o. c.); 13,927 were natives of Great Britain proper (England, Scotland, and Wales), and 17,261 of Ireland. The 112,346 aliens from non-English speaking countries, who had resided in the United States six years or more, were distributed principally as follows:

Country	Number	Per Cent of Total
Total	**112,346**	**100.0**
Italy	31,839	28.3
Russia, exclusive of Russian Poland	24,703	22.0
Poland, including Austrian, German, and Russian Poland	20,600	18.3
Portugal	11,457	10.2
Sweden	5,223	4.7
Turkey	4,919	4.4
Greece,	4,493	4.0
Germany, exclusive of German Poland	2,628	2.3
Austria, exclusive of Austrian Poland	2,415	2.2
All other	4,069	3.6

AGES.

TABLE 25 is a presentation showing the number of persons in the State of each age from those under 1 year to 100 years, and also the number over 100 years of age and the number of unknown age, classified by native and foreign born, by sex, and the native and foreign born, classified by color or race, by sex. It may be deduced from this table that in the Census of 1915 the number of persons in the State of various age groups 65 and over was:

65 years of age and over	189,030
70 years of age and over	112,762
75 years of age and over	58,388
80 years of age and over	25,353
85 years of age and over	8,718
90 years of age and over	2,117
95 years of age and over	396
100 years of age and over	46
Age unknown	941

[1] This term is used somewhat broadly; it includes 48,278 French Canadians, so-called, many of whom cannot speak English.

The number of persons of certain age groups, namely, those 33 and over, 45 and over, 65 and over, 70 and over, and 80 and over, at censuses since 1875 is shown below, from which a gradual tendency to increasing longevity in the first group is clearly apparent. That is to say, 36 per cent of the population was found by the Census of 1875 to have attained at least the age of 33, while at the Census of 1915 the number in this class was 40 per cent of the population. There was likewise, during the same period, a similar increase in the population of those 45 years of age and over, the percentage rising from 20.5 to 22.4. The percentage of the total population attaining to the ages of 65, 70, and 80, respectively, remained, however, substantially the same, approximately 5 per cent reaching the age of 65, about 3 per cent the biblical age of three score and ten, and seven-tenths of one per cent attaining to the age of 80 or over. In the Census of 1915 there were 46 persons returned as 100 years old or over, the oldest person reported being 107 years of age.

Year	Total Population	Population 33 Years of Age and Over	
		Number	Per Cent of Total Population
1875	1,651,912	595,256	36.0
1885	1,942,141	737,748	38.0
1895	2,500,183	953,283	38.1
1905	3,003,680	1,199,460	39.9
1915	3,693,310	1,479,878	40.1

Year	Total Population	Population 45 Years of Age and Over	
		Number	Per Cent of Total Population
1875	1,651,912	338,915	20.5
1885	1,942,141	426,699	22.0
1895	2,500,183	535,161	21.4
1905	3,003,680	660,183	22.0
1915	3,693,310	828,694	22.4

Year	Total Population	Population 65 Years of Age and Over	
		Number	Per Cent of Total Population
1875	1,651,912	82,288	5.0
1885	1,942,141	107,386	5.5
1895	2,500,183	131,924	5.3
1905	3,003,680	161,918	5.4
1915	3,693,310	189,030	5.1

Year	Total Population	Population 70 Years of Age and Over	
		Number	Per Cent of Total Population
1875	1,651,912	49,450	3.0
1885	1,942,141	64,751	3.3
1895	2,500,183	79,521	3.2
1905	3,003,680	96,191	3.2
1915	3,693,310	112,762	3.1

Year	Total Population	Population 80 Years of Age and Over	
		Number	Per Cent of Total Population
1875	1,651,912	11,167	0.7
1885	1,942,141	15,516	0.8
1895	2,500,183	18,510	0.7
1905	3,003,680	22,838	0.8
1915	3,693,310	25,353	0.7

Persons in the Dependent and Productive Age Groups.

The following grouping showing the number of persons under 16, those 16 and over but under 65, and those 65 and over is intended to disclose the number of dependent persons, commonly so regarded, and the number included within the productive age. The latter, in 1905 (1,985,343), constituted 66.1 per cent of the total population in that year; in 1915, the number in this class (2,445,092) represented 66.2 per cent of the total population, there being an increase in this group in the 10-year period of 23.2 per cent; in the number under 16 years of 24.3 per cent, and in the number 65 years and over of 13.6 per cent.

Census Year	Total Population	Under 16 Years (Dependent)	16 and Over but under 65 (Productive)	65 Years and Over (including Age Unknown) (Dependent)
1905	3,003,680	851,092	1,985,343	167,245
1915	3,693,310	1,058,247	2,445,092	189,971

Persons of School, Militia, and Voting Age.

The following table, compiled from the age data as returned for the cities of the State, shows for each city the number of persons for certain important age groups, namely, those of school age (shown by sex), *i.e.*, 5 and over but under 21 years; males of militia age, 18 and over but under 45 years; and males of voting age, 21 years and over, including age unknown.

The State and Cities	School Age 5 and Over but Under 21 Years			Militia Age 18 and Over but Under 45 Years	Voting Age 21 Years and Over (including Age Unknown)
	Total	Males	Females	Males	Males
The State	**1,023,775**	**509,037**	**514,738**	**826,855**	**1,121,508**

CONJUGAL CONDITION.

Statistics of the conjugal condition of the population are presented only for persons 15 years of age and over, because marriages are seldom consummated until that age.[1] In nearly every country over one-half of the population 15 years of age and over is married. In Massachusetts, in the State Census of 1915, 55.5 per cent of the males and 51.7 per cent of the females 15 years of age and over were married; in the United States Census of 1910, the proportion was 54.7 per cent and 51.1 per cent, respectively. The larger proportion of married males is a characteristic of the population of New England, no other division of the United States showing similar conditions, due partly to the excess of females in the population 15 years of age and over and partly to the fact that remarriage is more common among men than among women;[2] hence the great excess of widows (11.8 per cent) over widowers (4.5 per cent). The excess of widows over widowers was also, without doubt, largely due to the fact that men usually marry at a later age than women, so that the marriage relation is more often broken by death of the husband than by death of

[1] Marriage statistics for 1914 show that only 16 persons (all females) under 15 years of age were married in that year, and of this number one was 13 years and 15 were 14 years of age. — *73rd Annual Report on Births, Marriages, and Deaths, 1914*, prepared by the Secretary of the Commonwealth of Massachusetts.

[2] Marriage statistics for 1914, *supra*, show that of the 32,588 males and females who were married in that year, 3,305, or 10.4 per cent, of the males were widowers and divorced, as compared with 2,714, or 9.3 per cent, females.

the wife. The following table shows the percentage of males and females 15 years of age and over who were single, married, widowed, divorced, or for whom conjugal condition was not reported, distributed by racial groups:

Racial Group	Number	Per Cent of Males 15 Years of Age and Over by Racial Groups					Number	Per Cent of Females 15 Years of Age and Over by Racial Groups				
		Single	Married	Widowed	Divorced	Conjugal Condition not reported		Single	Married	Widowed	Divorced	Conjugal Condition not reported
Total	**1,309,116**	**39.6**	**55.5**	**4.5**	**0.3**	**0.1**	**1,382,263**	**36.1**	**51.7**	**11.8**	**0.4**	–[1]

The Age Factor.

The distribution of the population by conjugal condition varies according to age, and the following table presents some very interesting differences between the sexes and shows the percentage of distribution, by sex, of the conjugal condition of the population 15 years of age and over, by the three age periods, 15 and over but under 45, 45 and over but under 65, and 65 and over, including age unknown.

Conjugal Condition	Males			Females		
	15 and Over but Under 45 Years	45 and Over but Under 65 Years	65 Years and Over (including Age Unknown)	15 and Over but Under 45 Years	45 and Over but Under 65 Years	65 Years and Over (including Age Unknown)
Total	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
Single	51.6	12.8	8.1	45.9	15.7	12.0
Married	47.1	78.5	61.4	51.0	61.7	27.7
Widowed	1.0	8.0	29.8	2.7	22.0	60.0
Divorced	0.2	0.6	0.4	0.4	0.6	0.3
Conjugal condition not reported	0.1	0.1	0.3	–[1]	–[1]	–[1]

[1] Less than one-tenth of one per cent.

At the age of 20 men begin to marry and at the age period, 25 and over but under 30, the proportion of married is about equal to the number who are still single (48.0 per cent single and 51.1 per cent married), while a few have already become widowed or divorced. From this age period the proportion of married as compared with the single is always greater, although from the age period, 40 and over but under 45, the absolute number begins to decline, due to deaths which reduce the number of married males to a greater extent than the marriages of the single and widowed can increase it. Females marry as a general rule about five years earlier

than males. In the age period, 25 and over but under 30, the married were over 50 per cent more numerous than the single; at the age period, 45 and over but under 65, the widowed were nearly one-third as numerous as the married; and from the age 65 and over, the ratio of widowed to married increased enormously. In the age period, 15 and over but under 20, the proportion of married among the females was over seven times as great as among the males. The proportion for the females exceeded that for the males for all age periods up to and including 30 and over but under 35. After this age period there were more married among the males. This was due to the fact that males postpone marriage to a later age and, as already stated, remarriage is more common among males than females. The proportion of married among the females reached the maximum between the age period, 35 and over but under 40 years, and for males, between the age period, 40 and over but under 45 years, although the proportion at 45 and over but under 65 years was nearly as great. At every age period the proportion of widowed was at least twice as great for the females as for the males. The following table shows the percentage of males and females 15 years of age and over, by age periods, distributed as to conjugal condition:

Age Period	Number	Per Cent of Males 15 Years of Age and Over, in Specified Age Periods					Number	Per Cent of Females 15 Years of Age and Over, in Specified Age Periods				
		Single	Married	Widowed	Divorced	Conjugal Condition not reported		Single	Married	Widowed	Divorced	Conjugal Condition not reported
Total	**1,309,116**	**39.6**	**55.5**	**4.5**	**0.3**	**0.1**	**1,382,263**	**36.1**	**51.7**	**11.8**	**0.4**	–[1]
15 and over but under 20	154,773	99.2	0.7	–[1]	–[1]	–[1]	159,741	94.6	5.3	–[1]	–[1]	–[1]
20 and over but under 25	171,961	81.0	18.7	0.2	–[1]	0.1	187,311	64.4	35.1	0.4	0.1	–[1]
25 and over but under 30	171,017	48.0	51.1	0.6	0.2	0.1	175,059	38.0	60.4	1.2	0.4	–[1]
30 and over but under 35	149,294	29.6	68.9	1.1	0.3	0.1	149,923	26.4	70.3	2.7	0.6	–[1]
35 and over but under 40	142,617	21.6	75.9	1.9	0.5	0.1	147,112	21.6	72.4	5.3	0.7	–[1]
40 and over but under 45	125,462	17.4	78.9	3.1	0.5	0.1	127,474	19.2	71.3	8.8	0.7	–[1]
45 and over but under 65	311,611	12.8	78.5	8.0	0.6	0.1	328,053	15.7	61.7	22.0	0.6	–[1]
65 years of age and over	81,797	7.8	61.6	30.0	0.4	0.2	107,233	11.9	27.7	60.1	0.3	–[1]
Age unknown	584	41.2	36.5	3.1	3.6	15.6	357	42.6	30.0	24.6	–[1]	2.8

[1] Less than one-tenth of one per cent.

The proportion of married females between the age period of 15 and over but under 20 years, to the total females of this age period furnishes a measure of the extent to which early marriages are contracted by the females of the different racial groups. Of the group of Chinese, Japanese, Indian, and all other races, 22.9 per cent between these ages were married. This group is followed in order by the foreign-born white with 10.9 per cent; the colored, with 9.5 per cent; the native white of native parentage, with 4.6 per cent; and the native white of foreign or mixed parentage, with but 3.4 per cent.

For males the proportion married between the age period of 20 and over but under 25 years, showed a somewhat different order. The foreign-born white had 22.9 per cent married; the colored, 21.3 per cent; the native white of native parentage, 18.9 per cent; the native white of foreign or mixed parentage, 14.5 per cent; and the Chinese, Japanese, Indian, and all other races, 11.4 per cent.

The colored population marry the earliest, a fact which was reflected in the large proportion of widowed among them; 17.1 per cent of the colored females were widows as compared with 11.7 per cent of the white females, and 4.7 per cent of the colored males were widowers as compared with 4.5 per cent of the white males.

Comparison for 25-Year Period.

A comparison of the distribution of the population according to conjugal condition for the 25-year period 1890–1915 shows some very interesting facts, namely, — an almost steady decrease in the proportion of single persons, both males and females; a general increase in the proportion of married persons, both males and females; a decrease in the proportion of widowed, and a slight increase in the proportion of divorced:

Census Year and Sex	Number						Per Cent				
	Total	Single	Married	Widowed	Divorced	Conjugal Condition not reported	Single	Married	Widowed	Divorced	Conjugal Condition not reported
1890	**1,647,379**	**655,003**	**843,200**	**142,786**	**3,878**	**2,512**	**39.8**	**51.2**	**8.7**	**0.2**	**0.1**

PART IV

OCCUPATIONS

OCCUPATIONS.

The data presented in this Part have reference to persons who were engaged in gainful occupations in the Commonwealth on April 1, 1915, the date as of which the general census of population was taken. The first attempt to secure comprehensive returns of this character in Massachusetts was made in 1875, and information of similar character was secured in the succeeding State Censuses of 1885, 1895, 1905, and the present census.

The occupational distribution of the people constitutes one of the most important and influential factors in their economic life and is, therefore, a subject with respect to which there is ample justification for the presentation, in considerable detail, of the census data relative to this important subject. The whole population is accordingly classified for this purpose into two general groups, — those engaged in gainful and those in non-gainful occupations. TABLE 27 of our presentations shows, by sex, the population of the State 14 years of age and over engaged in gainful occupations. TABLE 28 is a similar classification by sex, age periods, and color or race, and TABLE 29 shows the gainful occupations of foreign-born white persons classified by sex and country of birth.[1]

With reference to the enumeration in 1915, the following extracts from the instructions to enumerators relative to reporting the occupations and industries in which the persons enumerated were employed are here quoted, in order that the reader may be familiar with the general features of the enumeration:[2]

Importance of this Subject.—There are several hundred kinds of occupations and industries included in the scope of the census classifications when the data are finally tabulated for publication. Enumerators are asked to bear in mind the fact that there is no class of information obtained in the census with regard to which there is greater or more constant demand on the part of the public than with respect to the occupations of the people; and since the census authorities are obliged to accept as a basis for these publications the designations given to occupations by the census enumerators on the schedule, it is of the utmost importance that they be as specific as possible.

Description of Occupation and Industry. — In reporting the Occupation and Industry, make an effort to be as definite and specific as possible, asking questions of your informant for this purpose. . . . (Examples followed.)

Persons Retired or Unemployed on Account of Age or Invalidism, etc. — Care should be taken in making the return for persons who, on account of old age, permanent invalidism, or some other cause, are no longer following an occupation. Such persons may desire to return the occupations formerly followed, which would be incorrect. If living on their own income exclusively, the entry for occupation should be "own income"; if supported by other persons wholly, or in part, the entry should be "none."

---

[1] The same data for cities and towns are available for reference in the files of the Census Office.

[2] See "*Enumerator's Instruction Book*", pp. 27, 28, and 29.

Persons Temporarily out of Employment. — Persons who are out of employment when the enumerator calls and who do not fall within the classes mentioned in the preceding paragraph may state that they have no occupation, when the fact is that they have an occupation but merely happen to be idle or unemployed at the time of the visit. In such cases the entry for the occupation should be that at which the person is usually employed; such as carpenter, plumber, laborer, commercial traveler, etc.

Persons Having Two or More Occupations. — If a person has two or more occupations, return only that which appears the most important; that is, the one from which he gets the most money, and if you cannot ascertain this point, return the one at which he spends the most time, or which he regards as his principal occupation.

Women Doing Housework. — In the case of a woman doing housework in her own home without regular salary or wages and having no other employment, the occupation should be given as *Housewife*, but a woman working at housework for wages should be reported as a *housekeeper*, *servant*, *cook*, *chambermaid*, *parlor maid*, etc., as the case may be and the entry . . . should state the place she works, as private family, hotel, boarding-house, etc. If a woman, in addition to doing housework in her own home, *regularly* earns money by some other occupation, whether pursued in her own home or outside, that occupation is the one to be designated; for example, a woman who regularly takes in washing or sewing or who goes out as a washerwoman or seamstress should be reported as a *washerwoman* or a *seamstress*, as the case may be. The industry in all such cases should be returned as "at home" or "working out" as the case may be, except that for a person whose occupation is *Housewife* enter "X" for the industry.

While the enumerators were expected to obtain as accurately as possible the facts with reference to the occupations of the people, the tabulation of the returns was necessarily done in the Census Office. The classification of occupations used by the United States Bureau of the Census in 1910 was adopted without change as the classification to be used in tabulating the returns of the State Census of 1915; and while it differs materially from the classification used in prior censuses, both National and State, it was deemed preferable to have results of the present census comparable with those of the National Census in 1910, rather than to preserve comparability of the present returns with those obtained in the State Censuses of 1875, 1885, and 1895.

The occasion for the change in the classification of occupations is explained and the new classification is also briefly described in the following paragraphs[1] quoted from the report of the Thirteenth Census of the United States in 1910:

In the development of this new classification, each important industry, or service group,[2] was taken as a separate unit, and each of the specific occupations followed by the workers in it was listed thereunder so far as such occupation was indicated by the returns of the Twelfth Census enumerators. In this manner, each important occupation returned by the enumerators in 1900 was listed separately under its proper industry or service group,[3] and these industries and service groups were then divided into eight general divisions.

---

[1] See *Volume IV — Population — Occupation Statistics*, p. 17, §§ 3, 4.

[2] Public service, professional service, and domestic and personal service.

[3] The additional important occupations returned at the Thirteenth Census were added later.

Heretofore the United States classification of occupations has been rendered illogical and unscientific by the practice of forcing all industries and occupations into five general divisions, namely, agricultural pursuits, manufacturing and mechanical pursuits, trade and transportation, professional service, and domestic and personal service. As a result, accurate general statements often have been impossible, because some of these general divisions have contained distinct industrial and occupational groups. In the new classification, an effort has been made to remedy this defect by increasing the number of general divisions from five to eight. The title of the first general division of the old classification, "Agricultural pursuits," has been expanded to "Agriculture, forestry, and animal husbandry," and fishermen and oystermen have been transferred from "Manufacturing and mechanical pursuits" to this division. The mining and quarrying industries have been transferred from "Manufacturing and mechanical pursuits" to the new division, "Extraction of minerals." The title of the old division, "Manufacturing and mechanical pursuits," has been changed to "Manufacturing and mechanical industries." The old division, "Trade and transportation," has been separated into its two parts, "Trade" and "Transportation," and all public service occupations not elsewhere classified have been brought together under a new division, "Public service." Since the Federal Government, the states, the counties, and the cities employ persons in a great variety of occupations and in many industries, to attempt to classify all these employees under public service would require much duplication and necessitate the breaking up of numerous occupational groups. Therefore, under public service have been classified only those public employees who could not, occupationally, be better classified elsewhere.

As the new index of occupations prepared by the United States Bureau of the Census for use in classifying the returns of the National Census in 1910 was also used in classifying the returns of the State Census of 1915, the occupation statistics for Massachusetts in 1910 and 1915 are therefore directly comparable, except in one respect, namely; in the United States Census of 1910 all persons *10 years of age and over* were classified with respect to the occupations and industries in which they were gainfully employed, while in the State Census of 1915 all persons *14 years of age and over*, were so classified.

The principal data appearing in the detailed tables have been brought together in summary tables, and the more significant facts relative to the distribution by age, sex, color or race, and nativity of the persons engaged in gainful occupations are made the subject of a brief analysis, topically arranged as follows:

Percentages of the Population Engaged in Gainful Occupations in 1900, 1905, 1910, and 1915.
Comparison, 1910 and 1915, by Industries.
General Distribution by Age Periods and Sex.
General Distribution by Color or Race, and Nativity.
Principal Occupations Represented:
- Males.
- Females.
- Foreign-born White.
- Colored.

The "Day-Time" Population of Boston.
Married Women Engaged in Gainful and Non-Gainful Occupations in Principal Cities.

Percentages of the Population Engaged in Gainful Occupations in 1900, 1905, 1910, and 1915.

In order to determine whether or not there has been any marked change in the percentage of the total population who were engaged in gainful occupations during recent years, the following table has been compiled, from which it will be observed that in 1915, 44.4 per cent of the total population, 65.2 per cent of the total number of males, and 24.4 per cent of the total number of females were engaged in gainful occupations, and that corresponding percentages for the census years 1900, 1905, and 1910 showed only very slight variations from those for 1915. It therefore appears that during the period 1900 to 1915 there has been no definite tendency toward a larger or smaller representation of the total population in remunerative employment.

Census Year	Total Population			Number Engaged in Gainful Occupations			Per Cent Engaged in Gainful Occupations		
	Total	Males	Females	Total	Males	Females	Total	Males	Females
1900	2,805,346	1,367,474	1,437,872	1,208,407	879,374	329,033	43.1	64.3	22.9
1905	3,003,680	1,461,589	1,542,091	1,332,267	951,592	380,675	44.4	65.1	24.7
1910	3,366,416	1,655,248	1,711,168	1,531,068	1,086,767	444,301	45.5	65.7	26.0
1915	3,693,310	1,813,713	1,879,597	1,640,890	1,183,131	457,759	44.4	65.2	24.4

Comparison, 1910 and 1915, by Industries.

The following table shows the number of persons, classified by sex, engaged in the general divisions of gainful occupations, and the number of persons in non-gainful occupations, with corresponding percentages, for the State Census of 1915 as compared with the United States Census of 1910:

Classification	Total	Males	Females	Per Cent of Males to Total	Per Cent of Females to Total
Population *10 years of age and over*, 1910	2,742,684	1,340,517	1,402,167	48.9	51.1
Population *14 years of age and over*, 1915	2,751,299	1,339,232	1,412,067	48.7	51.3
Population *10 years of age and over* in non-gainful occupations, 1910	1,211,616	253,750	957,866	20.9	79.1
Population *14 years of age and over* in non-gainful occupations, 1915	1,110,409	156,101	954,308	14.1	85.9
Population *10 years of age and over* in gainful occupations, 1910	1,531,068	1,086,767	444,301	71.0	29.0
Population *14 years of age and over* in gainful occupations, 1915	1,640,890	1,183,131	457,759	72.1	27.9
Agriculture, forestry, and animal husbandry					
1910	74,666	71,873	2,793	96.3	3.7
1915	79,385	78,781	604	99.2	0.8
Extraction of minerals					
1910	2,681	2,679	2	99.9	0.1

Transportation					
1910	105,521	100,486	5,035	95.2	4.8
1915	117,455	110,048	7,407	93.7	6.3

Classification	Total	Males	Females	Per Cent of Males to Total	Per Cent of Females to Total
Trade					
1910	183,519	156,039	27,480	85.0	15.0
1915	201,098	172,644	28,454	85.9	14.1
Public service (not elsewhere classified)					
1910	26,888	26,417	471	98.2	1.8
1915	40,457	40,150	307	99.2	0.8
Professional service					
1910	77,829	40,560	37,269	52.1	47.9
1915	95,102	46,123	48,979	48.5	51.5
Domestic and personal service					
1910	176,329	55,749	120,580	31.6	68.4
1915	180,254	64,588	115,666	35.8	64.2
Clerical					
1910	109,237	61,131	48,106	56.0	44.0
1915	133,545	71,003	62,542	53.2	46.8

General Distribution by Age Periods and Sex.

The following table shows the distribution by age groups and sex of the persons engaged in gainful occupations, with corresponding percentages. Of the total number, 14.0 per cent were under 21 years of age, 60.6 per cent were 21 and over but under 45 years of age (including age unknown), 22.1 per cent were 45 and over but under 65 years of age, and 3.3 per cent were 65 years of age and over. A comparison of the distribution by age groups of the males with that of the females shows that a much smaller proportion of the males (10.7 per cent) than of the females (22.5 per cent) were under 21 years of age, and a slightly higher proportion of the females (61.4 per cent) than of the males (60.3 per cent) were in the age group 21 and over but under 45. On the other hand, in the age group 45 and over but under 65, the proportion of males (25.1 per cent) was much larger than that of females (14.5 per cent), and 3.9 per cent of the males were 65 years of age and over as compared with only 1.6 per cent of the females. In general, therefore, it may be concluded that the females enter gainful employment at an earlier age than the males but terminate their employment at an earlier age.

Age Period	Number			Per Cent		
	Total	Males	Females	Total	Males	Females
Total	**1,640,890**	**1,183,131**	**457,759**	**100.0**	**100.0**	**100.0**
14 and over but under 16 years	15,502	9,007	6,495	1.0	0.8	1.4
16 and over but under 18 years	62,909	34,906	28,003	3.8	2.9	6.1
18 and over but under 21 years	151,594	82,642	68,952	9.2	7.0	15.0
21 and over but under 45 years (including age unknown)	994,211	713,221	280,990	60.6	60.3	61.4
45 and over but under 65 years	363,307	297,112	66,195	22.1	25.1	14.5
65 years and over	53,367	46,243	7,124	3.3	3.9	1.6

On comparing the distribution by age groups of persons engaged in the several general divisions of occupations (as shown in table on page 493, for both sexes) it will be observed that 32.0 per cent of the persons

engaged in agriculture, forestry, and animal husbandry were 45 and over but under 65 years of age, as compared with 22.1 per cent for all persons in this age group, and 9.9 per cent of the persons engaged in this division of occupations were 65 years of age and over, as compared with only 3.3 per cent for all persons in this age group. In public service (not elsewhere classified) the percentages in these last two age groups were also relatively high, being, respectively, 37.4 and 7.3, as compared with 22.1 and 3.3 for all persons in these respective age groups. Other divisions of occupations showing relatively high percentages in any age group were: Transportation and professional service, in the age group 21 and over but under 45; domestic and personal service, in the age group 45 and over but under 65; and clerical occupations, in the first four age groups comprising the ages 14 and over but under 45 years of age. The divisions of occupations in which the percentages were relatively low in any age group were: Agriculture, forestry, and animal husbandry, in the two age groups comprising the ages 18 and over but under 45; transportation, in the first three age groups comprising the ages 14 and over but under 21; public service (not elsewhere classified), in the first four age groups comprising the ages 14 and over but under 45; professional service, in the first three age groups comprising the ages 14 and over but under 21; and clerical occupations, in the last two age groups comprising the ages 45 years and over.

Because of the great predominance of males over females in each of the first six general divisions of occupations, the distribution of the males by age groups in each of these divisions follows closely that of the males and females taken together, but in professional service and clerical occupations, where the representation of males and females was about equal, and in domestic and personal service, where the number of females far exceeded the number of males, the distribution of the males by age groups showed marked variations from that of the males and females taken together.

A comparison of the age distribution of males with that of females in the several divisions of occupations results in some very interesting conclusions. Thus, in agriculture, forestry, and animal husbandry, 47.7 per cent of the males were in the age group 21 and over but under 45 years of age, while only 41.2 per cent of the females were in this age group, and in the next age group, 45 and over but under 65, 32.0 per cent of the males and 39.2 per cent of the females were represented. In the manufacturing and mechanical industries the percentages in each of the first three age groups were uniformly higher for females than for males, while the percentages in the last three age groups were uniformly lower for females than for males, the difference in the case of the age group, 45 and over but under 65, being particularly large, only 11.4 per cent of the females having been in this age group as compared with 24.2 per cent for the males. In transportation the principal differences between the percentages for males and females were those in the third and fifth age groups, — 31.3 per cent of the females being in the age

group 18 and over but under 21 (large numbers of telephone operators being included in this group), as compared with only 5.1 per cent for the males, and only 1.9 per cent of the females being in the age group 45 and over but under 65, as compared with 23.5 per cent for the males. Practically none of the females 65 years of age and over were classified under transportation. In trade the principal variations were also in the third and fifth age groups, the comparative percentages for males and females being respectively, 6.8 and 17.0 in the third group and 26.5 and 12.3 in the fifth group. In public service (not elsewhere classified) 44.8 per cent of the males were 45 years of age and over, as compared with 37.5 per cent of the females. Of the females in professional service 74.9 per cent (including large numbers of teachers and nurses) were in the age group 21 and over but under 45 years of age, whereas in the case of the males in this age group the percentage was 64.1; the males, however, 45 years of age and over in professional service constituted 31.9 per cent of the total number of males in professional service, while for females the percentage was only 18.2. In domestic and personal service the distribution by age groups of the males did not vary in any marked degree from that of the females except that only 7.2 per cent of the males were under 21 years of age as compared with 12.3 per cent of the females. In clerical occupations the principal variations between males and females occurred in the fourth and fifth age groups; in the case of the males 59.4 per cent were 21 and over but under 45 years of age as compared with 69.8 of the females, while 14.4 per cent of the males were 45 and over but under 65 years of age, as compared with only 4.9 per cent of the females. Comparatively few of the females in clerical occupations were 65 years of age and over.

General Distribution by Color or Race and Nativity.

The following summary shows for both sexes and for each sex separately the distribution by color or race of the total population 14 years of age and over, and of those engaged in gainful occupations, with percentages:

Of the total number of persons 14 years of age and over, 59.6 per cent of the total number (both sexes), 88.3 per cent of the males and 32.4 per cent of the females were engaged in gainful occupations. The corresponding percentages for the native white persons, who constituted 59.1 per cent of the total, were 57.9 per cent for both sexes, 84.5 per cent for the males, and 33.5 per cent for the females, showing no marked deviation from the percentages for all persons engaged in gainful occupations. A comparison of corresponding percentages for the foreign-born white, colored, and all other (principally Chinese, Japanese, and Indian) with the above percentages shows that in the case of the foreign-born white the percentage engaged in gainful occupations (both sexes) was 61.9, or only slightly higher than for the native white, but for the colored it was 69.1 per cent and for all other it was 88.8 per cent. For males the percentages were: Native white, 84.5 per cent; foreign-born white, 93.7 per cent; colored, 91.3 per cent; and all other, 94.0 per cent. In the case of the females the percentage for the foreign-born white was 30.3 per cent, for all other, 24.9 per cent, for the native white, 33.5 per cent, but for the colored it was 46.8 per cent, which was much higher than for any of the other three classes named.

Color or Race	Total Number of Persons 14 Years of Age and Over			Total Number of Persons 14 Years of Age and Over Engaged in Gainful Occupations			Per Cent of Total Number Engaged in Gainful Occupations		
	Total	Males	Females	Total	Males	Females	Total	Males	Females
Total	**2,751,299**	**1,339,232**	**1,412,067**	**1,640,890**	**1,183,131**	**457,759**	**59.6**	**88.3**	**32.4**
White	2,712,742	1,318,586	1,394,156	1,613,627	1,164,194	449,433	59.5	88.3	32.2

Colored	35,363	17,693	17,670	24,427	16,161	8,266	69.1	91.3	46.8
All other	3,194	2,953	241	2,836	2,776	60	88.8	94.0	24.9

The distribution of the foreign-born white persons 14 years of age and over by countries of birth and nine general divisions of occupations is shown in the summary table on page 497. Similar information in much greater detail and showing the distribution also by specific occupations appears in Table 28, while a brief table showing the principal occupations in which foreign-born white persons are employed with accompanying text appears on page 500 for males and on page 501 for females.

The 12 countries, each of which contributed more than 10,000 white persons to the industrial population of Massachusetts, are shown in the table on page 497, and these countries are arranged in the order of the total number of white persons 14 years of age and over who were born therein and who were gainfully employed in Massachusetts at the time the census was taken. Canada (including the Provinces) furnished 149,717, or 22.2 per cent of the total number, leading all other countries in this respect; Ireland ranked second with 116,765, or 17.3 per cent; Italy ranked third with 73,231, or 10.9 per cent of the total; and Russia

(exclusive of Russian Poland) ranked fourth with 70,618, or 10.5 per cent.

The countries in which were born the greatest number of white persons considered in the above table, or, in other words, the countries which were the greatest sources of supply of foreign-born industrial workers in Massachusetts, were, for the several occupational divisions, as follows:

Agriculture, forestry, and animal husbandry — Canada, Ireland, Italy, Poland, and Portugal.
Extraction of minerals — Italy, Russia, Canada, and Sweden.
Manufacturing and mechanical industries — Canada, Italy, Poland, Ireland, Russia, and England.
Transportation — Ireland, Canada, and Italy.
Trade — Russia, Canada, Ireland, Italy, and England.
Public service (not elsewhere classified) — Ireland, Canada, Italy, and England.
Professional service — Canada, England, Ireland, and Russia.
Domestic and personal service — Ireland, Canada, Italy, England, Russia, and Sweden.
Clerical — Canada, Ireland, and England.

On reference to the percentages in the following table it will be observed that 57.8 per cent of the foreign-born white persons 14 years of age and over who were employed in gainful occupations in Massachusetts were engaged in manufacturing and mechanical industries, and that more than 50.0 per cent of the total number of persons from each country specified, with the single exception of Ireland (for which the percentage was only 37.3), were engaged in this division of occupations. The distribution among the several divisions of occupations varies considerably for the several countries named in the table. Thus, as compared with the corresponding percentages for all foreign-born white persons 14 years of age in gainful occupations, the percentages for the following countries and occupational divisions are relatively high:

Canada, England, and Scotland — Professional service and clerical occupations.
Ireland — Transportation, public service (not elsewhere classified), and domestic and personal service.
Italy — Agriculture, forestry, and animal husbandry, transportation, and extraction of minerals.
Russia — Trade and extraction of minerals.
Poland — Manufacturing and mechanical industries and agriculture, forestry, and animal husbandry.
Portugal — Agriculture, forestry, and animal husbandry and manufacturing and mechanical industries.
Sweden — Agriculture, forestry, and animal husbandry, domestic and personal service and extraction of minerals.
Germany — Professional service and agriculture, forestry, and animal husbandry.
Turkey — Manufacturing and mechanical industries, and trade.
Greece — Trade and domestic and personal service.

The above statement shows the industrial proclivity of the persons born in the several countries, in so far as their choice of occupation in

this country is concerned. It is of special interest to note in this connection that immigrants from English-speaking countries were represented in larger proportion in transportation, public service, professional service, and clerical occupations than were those from non-English speaking countries.

[1] Less than one-tenth of one per cent.

Principal Occupations Represented.

In this section of the analysis an endeavor has been made to bring together in summary form the data with reference to the occupations in which large numbers of persons were employed. The subject matter and summary tables have been presented under the following sub-divisions: Males; Females; Foreign-born White; and Colored.

Males.

In the following table the principal occupations have been arranged in the order of the number of males 14 years of age and over who were employed. Because of the very large number of semiskilled operatives

and laborers employed in the manufacturing and mechanical industries, further details for these two occupational groups have been shown in the table. Of the 1,183,131 males 14 years of age and over who were gainfully employed, 233,524, or 19.7 per cent, were semiskilled operatives in manufacturing and mechanical industries; 80,037, or 6.8 per cent, were laborers in the same group of industries. Particular attention may be called to the fact that of the 233,524 semiskilled operatives employed in the manufacturing and mechanical industries, 81,026 were employed in the textile industries and 54,402 were employed in shoe factories, and that of the 80,037 laborers employed in the manufacturing and mechanical industries, 33,828 were in the building and hand trades.

Principal Occupations Having 10,000 or More Males Represented	Number of Males 14 Years of Age and Over Engaged in Gainful Occupations	Per Cent of Total
All Occupations	**1,183,131**	**100.0**

Salesmen (stores)	54,220	4.6
Retail dealers	52,703	4.5
Machinists, millwrights, and tool makers	41,729	3.5
Clerks (except clerks in stores)	41,682	3.5
Carpenters	39,310	3.3
Farm laborers	28,576	2.4
Draymen, teamsters, and expressmen	24,413	2.1
Farmers	23,358	2.0
Painters, glaziers, varnishers, enamelers, etc.	22,852	1.9
Deliverymen (bakeries, laundries, and stores)	17,454	1.5
Foremen and overseers (manufacturing and mechanical industries)	17,018	1.4
Bookkeepers, cashiers, and accountants	15,740	1.3
Laborers (public service)	14,668	1.2
Manufacturers and officials	14,543	1.2
Chauffeurs	12,773	1.1
Servants	12,489	1.1
Commercial travelers	11,199	1.0
Plumbers and gas and steam fitters	11,085	0.9
All other occupations	413,758	35.0

Females.

The principal occupations in which females 14 years of age and over were gainfully employed are shown in the following table, and these occupations have been arranged in the order of the number employed, further details being given in the case of semiskilled operatives (manufacturing and mechanical industries) and in the case of servants.

Of the 457,759 females 14 years of age and over, who were gainfully employed, 145,741, or 31.8 per cent, were classed as semiskilled operatives in manufacturing and mechanical industries, and of these 145,741 semiskilled operatives, 81,791 were employed in the textile industries, and 25,456 were employed in shoe factories. Servants numbering 59,178

constituted 12.9 per cent of the total number of females 14 years of age and over who were gainfully employed, while in the order of numbers employed the occupations next in importance were: Bookkeepers, cashiers, and accountants, 23,723, or 5.2 per cent; stenographers and typewriters, 23,214, or 5.1 per cent; school teachers, 23,003, or 5.0 per cent, and saleswomen in stores, 22,510, or 4.9 per cent.

Principal Occupations Having 3,000 or More Females Represented	Number of Females 14 Years of Age and Over Engaged in Gainful Occupations	Per Cent of Total

[1] Does not include those employed in shoe and harness factories and sack sewers in fertilizer, salt, and sugar factories, and cement, flour, and grain mills.

Foreign-born White.

The principal occupations in which foreign-born white persons 14 years of age and over were gainfully employed are shown in the following table, and these occupations have been arranged, for each sex, in the order of the number employed, further details being given in the case of semiskilled operatives (manufacturing and mechanical industries) and in the case of laborers (males) and servants (females). In this analysis of the data relative to the foreign born who were engaged in gainful occupations, only white persons were considered, because the numbers of foreign-born colored and of other foreign born were relatively very small.

Males. — Of the 507,636 foreign-born white males considered in the following table, 124,103, or 24.4 per cent, were semiskilled operatives in manufacturing and mechanical industries, of whom 53,862 were in the

textile industries, 21,293 were in shoe factories, and 11,639 were in iron and steel industries. The next largest groups were: Laborers in manufacturing and mechanical industries, 57,268, or 11.3 per cent of the total; retail dealers, 25,050, or 4.9 per cent; and carpenters, 21,778, or 4.3 per cent. The number of foreign-born white males 14 years of age and over exceeded the corresponding number of native white males in a large number of occupations, of which the more important were semiskilled operatives in the textile industries, laborers and carpenters in manufacturing and mechanical industries, laborers in public service and in railroad transportation, tailors, servants, and barbers, hairdressers, and manicurists.

Females. — The number of semiskilled operatives in mechanical and manufacturing industries was 62,748, or 37.8 per cent of the 165,873 foreign-born white females 14 years of age and over, who were engaged in gainful occupations, and of these 62,748 semiskilled operatives, 45,681 were employed in the textile industries and 6,182 were employed in shoe factories. Servants, of whom there were 39,710, constituted 23.9 per cent of the total number, and of these 7,420 were cooks. In several of the occupations named in the above table the number of foreign-born females exceeded the corresponding number of native females, namely, semiskilled operatives in textile industries, servants, boarding and lodging-house keepers, charwomen and cleaners, waitresses, laundresses (not in laundry), and retail dealers.

Principal Occupations Having 5,000 or More Foreign-born White Males Represented	Number of Foreign-born White **Males** 14 Years of Age and Over Engaged in Gainful Occupations	Per Cent of Total

Stenographers and typewriters	1,594	1.0
Laundry operatives	1,510	0.9
Clerks (except clerks in stores)	1,200	0.7
All other occupations	7,086	4.3

[1] Does not include those employed in shoe and harness factories and sack sewers in fertilizer, salt, and sugar factories, and cement, flour, and grain mills.

Colored.

Since the days of the anti-slavery agitation, Massachusetts has shown an interest in her colored population, so that it has been considered worth while to segregate the occupations in which this class are engaged for presentation here.

General Division of Gainful Occupations	Total	Males	Females
All occupations	**24,427**	**16,161**	**8,266**
Agriculture, forestry, and animal husbandry	1,768	1,756	12
Extraction of minerals	14	14	–
Manufacturing and mechanical industries	5,536	4,643	893
Transportation	1,790	1,781	9
Trade	1,450	1,385	65
Public service (not elsewhere classified)	438	436	2
Professional service	608	386	222
Domestic and personal service	12,267	5,342	6,925
Clerical	556	418	138

In the following table the occupations in which 100 or more colored males 14 years of age and over were engaged, according to the State Census of 1915, are shown in the order of their numbers as compared with corresponding figures for the United States Census of 1910:

Occupation	1915	1910
All Occupations	**16,161**	**13,488**
Laborers	*4,241*	*2,977*
General and not specified	1,685	1,282
Cranberry bog	641	423
Farm	629	361
Porters and helpers in stores	408	358
Public service	239	96
Garden	232	133
Steam railroad	157	68
Coal yard	147	112
Helpers in building and hand trades	103	144
Waiters	1,344	1,192
Servants	1,123	1,177
Porters, except in stores	1,005	836
Janitors and sextons	925	722
Draymen, teamsters, and expressmen	425	395
Chauffeurs	364	165
Deliverymen (bakeries, laundries, and stores)	324	331
Elevator tenders	297	224
Clerks (except clerks in stores)	261	244
Cotton mill operatives	362	175
Longshoremen and stevedores	224	154
Shoe factory operatives (semiskilled)	207	204
Hostlers and stable hands	179	193
Barbers, hairdressers, and manicurists	175	188
Retail dealers	175	164
Carpenters	152	140
Salesmen (stores)	141	97
Painters, glaziers, varnishers, enamelers, etc.	140	87
Sailors and deckhands	136	202
Messenger, bundle, and office boys	120	118
Machinists and millwrights	113	102
Brick and stone masons	105	103
Firemen (except locomotive and fire department)	103	74
All other occupations	3,520	3,224

The occupations in which 100 or more colored females 14 years of age and over were engaged, with the number in each, are given below:

Occupation	1915	1910
All Occupations	**8,266**	**8,026**
Servants	6,025 [1]	5,700 [1]
Dressmakers and seamstresses (not in factories)	405	493
Laundry operatives	215	159
Boarding and lodging-house keepers	196	185
Housekeepers and stewardesses	192	200
Waitresses	134	135
All other occupations	1,099	1,154

[1] Includes charwomen and cleaners, and laundresses (not in laundries).

The Day-time Population of Boston.

The number of persons engaged in gainful occupations who work in Boston was ascertained in the State Census of 1915 for each of the 39 cities and towns in the Metropolitan District, and it was found that of the total population of the 38 municipalities outside of Boston (841,654) 358,784 were engaged in gainful occupations, of which number, 111,564 (86,581 males and 24,983 females), or 31.1 per cent, worked in Boston.

In Boston, out of a total population of 745,439, the number engaged in gainful occupations was 350,321, of which number, 338,372 (240,220 males and 98,152 females), or 96.6 per cent, worked in Boston, and 11,949 (9,269 males and 2,680 females) worked outside of Boston. Only persons *working in Boston* and *those with no gainful occupation but who live in Boston* have been considered in this connection. It must be assumed that the 395,118

persons living in Boston who have no gainful occupations remain in the city during the day. We have thus:

Classification	Total	Males	Females
Number engaged in gainful occupations living and working in Boston	338,372	240,220	98,152
Population of Boston having no gainful occupations	395,118	119,945	275,173
Population of Boston less those working outside Boston (11,949)	733,490	360,165	373,325
Number engaged in gainful occupations in Boston but living in the Metropolitan District outside of Boston	111,564	86,581	24,983
Total approximate "day-time" population (exclusive of visitors and persons working in Boston but living outside the Metropolitan District)	845,054	446,746	398,308

Attention should be called to the fact that no figures can be obtained for the number of shoppers or other visitors from outside the city who are in Boston during the day, nor is any account here taken of persons working in Boston who live outside the Metropolitan District, — probably a negligible number.

The following table shows for each city and town of the Metropolitan District the total population, the number of persons engaged in gainful occupations, and the number of persons living in each city and town who work in Boston:

Cities and Towns	Total Population	Number of Persons Engaged in Gainful Occupations	Number of Persons Working in Boston		
			Total	Males	Females
Metropolitan District	**1,587,093**	**709,105**	**449,936**	**326,801**	**123,135**
Boston	**745,439**	**350,321**	**338,372**	**240,220**	**98,152**

Married Women Engaged in Gainful and Non-Gainful Occupations in Principal Cities.

The extent to which married women were employed in gainful occupations in each of the 15 principal cities in Massachusetts is shown in the following table:

Cities	Total Number of Married Women	Number of Married Women Engaged in—		Per Cent of Total Number of Married Women Engaged in—	
		Gainful Occupations	Non-Gainful Occupations	Gainful Occupations	Non-Gainful Occupations
Boston	134,042	11,190	122,852	8.3	91.7
Worcester	31,343	1,701	29,642	5.4	94.6
Fall River	22,912	5,865	17,047	25.6	74.4
New Bedford	22,414	5,564	16,850	24.8	75.2
Cambridge	20,018	1,491	18,527	7.5	92.5
Lowell	19,750	3,922	15,828	19.9	80.1
Springfield	21,351	1,492	19,859	7.0	93.0
Lynn	19,767	2,731	17,036	13.8	86.2
Lawrence	17,237	3,950	13,287	22.9	77.1
Somerville	18,293	883	17,410	4.8	95.2
Brockton	13,298	1,765	11,533	13.3	86.7
Holyoke	10,962	1,576	9,386	14.4	85.6
Haverhill	10,391	2,155	8,236	20.7	79.3
Malden	9,702	689	9,013	7.1	92.9
Chelsea	8,166	341	7,825	4.2	95.8

An examination of the percentages in the above table leads to the conclusion that the percentage in gainful occupations of the total number of married women is relatively high in those cities in which there is an industry affording large opportunity for the employment of women,—such as the textile industry in Fall River, New Bedford, Lowell, and Lawrence; the boot and shoe industry in Lynn, Brockton, and Haverhill; and the paper manufacturing industry in Holyoke. Of the 15 cities shown in the table, Fall River, with 25.6 per cent of the married women employed in gainful occupations, ranked first in this respect, followed by New Bedford (24.8 per cent), Lawrence (22.9 per cent), Haverhill (20.7 per cent), and Lowell (19.9 per cent). The cities in which the industries were more diversified or which were more residential in character showed comparatively low percentages in gainful occupations of the total number of married women. The percentages in Chelsea, Somerville, and Worcester were remarkably low, namely, 4.2, 4.8, and 5.4, respectively.

TABLE 27. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND OVER BY SEX, FOR THE STATE.

[NOTE. — "N. o. c." means not otherwise classified.]

OCCUPATION	Total	Males	Females
Population 14 years of age and over	**2,751,299**	**1,339,232**	**1,412,067**
Population 14 years of age and over in non-gainful occupations	**1,110,409**	**156,101**	**954,308**

Buffers and polishers	2,766	2,617	149
Filers	384	382	2
Grinders	750	735	15
Firemen (except locomotive and fire department)	6,644	6,644	–
Foremen and overseers (manufacturing)	19,445	17,018	2,427
Furnace men, smeltermen, heaters, pourers, etc.	312	312	–
Furnace men and smeltermen	193	193	–
Heaters	94	94	–
Ladlers and pourers	15	15	–
Puddlers	10	10	–
Glass blowers	160	146	14
Jewelers, watchmakers, goldsmiths, and silversmiths	2,122	2,027	95
Goldsmiths and silversmiths	795	781	14
Jewelers and lapidaries (factory)	429	352	77
Jewelers and watchmakers (not in factory)	898	894	4
Laborers (n. o. c.)	80,579	80,037	542
Building and hand trades	33,828	33,828	–
General and not specified laborers	30,258	30,258	–
Helpers in building and hand trades	3,570	3,570	–
Chemical industries	1,415	1,407	8
Fertilizer factories	199	198	1
Paint factories	51	51	–
Powder, cartridge, fireworks, etc., factories	311	309	2
Other chemical factories	854	849	5
Clay, glass, and stone industries	1,493	1,491	2
Brick, tile, and terra-cotta factories	675	675	–
Glass factories	143	141	2
Lime, cement, and gypsum factories	395	395	–
Marble and stone yards	239	239	–
Potteries	41	41	–
Iron and steel industries	9,887	9,865	22
Automobile factories	385	383	2
Blast furnaces and rolling mills	1,256	1,251	5
Car and railroad shops	676	676	–
Wagon and carriage factories	158	158	–
Other iron and steel works	7,412	7,397	15
Other metal industries	864	845	19
Brass mills	357	357	–
Copper factories	202	202	–
Lead and zinc factories	37	37	–
Tinware and enamelware factories	85	84	1
Other metal factories	183	165	18
Lumber and furniture industries	2,424	2,423	1
Furniture, piano, and organ factories	805	805	–
Saw and planing mills[1]	1,197	1,196	1
Other woodworking factories	422	422	–
Textile industries	14,465	14,113	352
Cotton mills	6,742	6,521	221
Silk mills	76	70	6
Woolen and worsted mills	3,416	3,338	78
Other textile mills	4,231	4,184	47
Other industries	16,203	16,065	138
Charcoal and coke works	314	314	–
Cigar and tobacco factories	33	32	1
Clothing industries	177	164	13
Electric light and power plants	299	299	–
Electrical supply factories	1,119	1,114	5
Food industries	2,317	2,294	23
Bakeries	217	214	3
Butter and cheese factories	66	66	–
Fish curing and packing	109	101	8
Flour and grain mills	59	59	–
Fruit and vegetable canning, etc.	11	11	–
Slaughter and packing houses	1,048	1,048	–
Sugar factories and refineries	472	470	2
Other food factories	335	325	10
Gas works	1,394	1,394	–
Liquor and beverage industries	517	517	–
Oil refineries	128	128	–
Paper and pulp mills	2,103	2,080	23
Printing and publishing	245	232	13
Rubber factories	2,540	2,521	19
Shoe factories	1,655	1,644	11
Tanneries	1,254	1,253	1
Turpentine distilleries	2	2	–
Other factories	2,106	2,077	29

[1] Includes wooden box factories.

TABLE 27. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND OVER BY SEX — Continued.

Occupation	Total	Males	Females
Manufacturing and Mechanical Industries — Con.			
Loom fixers	4,477	4,469	8
Machinists, millwrights, and toolmakers	41,740	41,729	11
Machinists and millwrights	39,216	39,208	8
Toolmakers and die setters and sinkers	2,524	2,521	3
Managers and superintendents (manufacturing)	7,311	7,220	91
Manufacturers and officials	14,849	14,543	306
Manufacturers	13,069	12,817	252
Officials	1,780	1,726	54
Mechanics (n. o. c.)	2,367	2,367	-
Gunsmiths, locksmiths, and bell hangers	335	335	-
Wheelwrights	424	424	-
Other mechanics	1,608	1,608	-
Millers (grain, flour, feed, etc.)	111	111	-
Milliners and millinery dealers	5,254	145	5,109
Molders, founders, and casters (metal)	5,947	5,944	3
Brass molders, founders, and casters	529	529	-
Iron molders, founders, and casters	5,331	5,330	1
Other molders, founders, and casters	87	85	2
Oilers of machinery	854	854	-
Painters, glaziers, varnishers, enamelers, etc.	22,993	22,852	141
Enamelers, lacquerers, and japanners	237	149	88
Painters, glaziers, and varnishers (building)	19,750	19,734	16
Painters, glaziers, and varnishers (factory)	3,006	2,969	37
Paper hangers	1,111	1,106	5
Pattern and model makers	1,722	1,708	14
Plasterers	1,549	1,549	-
Plumbers and gas and steam fitters	11,085	11,085	-
Pressmen (printing)	1,395	1,385	10
Rollers and roll hands (metal)	95	95	-
Roofers and slaters	1,409	1,408	1
Sawyers	832	832	-
Semiskilled operatives (n. o. c.)	379,265	233,524	145,741
Chemical industries	3,258	1,646	1,612
Paint factories	185	160	25
Powder, cartridge, fireworks, etc., factories	1,383	591	792
Other chemical factories	1,690	895	795
Cigar and tobacco factories	3,942	3,133	809
Clay, glass, and stone industries	1,689	1,601	88
Brick, tile, and terra-cotta factories	140	130	10
Glass factories	769	706	63
Lime, cement, and gypsum factories	133	133	-
Marble and stone yards	531	531	-
Potteries	116	101	15
Clothing industries	5,281	3,538	1,743
Hat factories (felt)	1,043	920	123
Suit, coat, cloak, and overall factories	1,823	1,552	271
Other clothing factories	2,415	1,066	1,349
Food industries	8,555	3,389	5,166
Bakeries	950	333	617
Butter and cheese factories	81	63	18
Candy factories	5,123	1,317	3,806
Flour and grain mills	23	19	4
Fruit and vegetable canning, etc.	139	52	87
Slaughter and packing houses	566	547	19
Other food factories	1,673	1,058	615
Harness and saddle industries	1,221	1,083	138
Iron and steel industries	26,364	24,120	2,244
Automobile factories	2,393	2,334	59
Blast furnaces and rolling mills	3,255	2,973	282
Car and railroad shops[1]	1,302	1,302	-
Wagon and carriage factories	947	911	36
Other iron and steel works	18,467	16,600	1,867
Other metal industries	9,540	6,546	2,994
Brass mills	825	788	37
Clock and watch factories	2,444	1,307	1,137
Gold and silver and jewelry factories	5,365	3,646	1,719
Lead and zinc factories	48	47	1
Tinware and enamelware factories	207	152	55
Other metal factories	651	606	45
Liquor and beverage industries	1,408	1,387	21
Breweries	889	885	4
Distilleries	115	113	2
Other liquor and beverage factories	404	389	15
Lumber and furniture industries	12,248	11,168	1,080
Furniture, piano, and organ factories	7,200	6,612	588
Saw and planing mills[2]	2,557	2,525	32
Other woodworking factories	2,491	2,031	460
Paper and pulp mills	10,525	6,294	4,231
Printing and publishing	8,023	3,430	4,593
Shoe factories	79,858	54,402	25,456
Tanneries	9,096	8,937	159
Textile industries	162,817	81,026	81,791
Beamers, warpers, and slashers	4,199	2,526	1,673
Cotton mills	2,849	1,584	1,265
Silk mills	184	44	140
Woolen and worsted mills	944	776	168
Other textile mills	222	122	100

[1] Includes car repairers for street and steam railroads.

[2] Includes wooden box factories.

TABLE 27. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND OVER BY SEX — Continued.

Occupation	Total	Males	Females
Manufacturing and Mechanical Industries — Con.			
Semiskilled operatives (n. o. c.) — *Con.*			
Textile industries — *Con.*			
Bobbin boys, doffers, and carriers	6,135	4,161	1,974
Cotton mills	4,138	3,143	995
Silk mills	24	16	8
Woolen and worsted mills	1,276	809	467
Other textile mills	697	193	504
Carders, combers, and lappers	7,536	5,581	1,955
Cotton mills	5,384	3,701	1,683
Silk mills	11	2	9
Woolen and worsted mills	1,884	1,697	187
Other textile mills	257	181	76
Drawers, rovers, and twisters	10,532	3,037	7,495
Cotton mills	8,280	2,642	5,638
Silk mills	141	63	78
Woolen and worsted mills	1,693	298	1,395
Other textile mills	418	34	384
Spinners	21,757	8,953	12,804
Cotton mills	15,299	5,790	9,509
Silk mills	333	59	274
Woolen and worsted mills	4,953	2,885	2,068
Other textile mills	1,172	219	953
Weavers	49,115	26,255	22,860
Cotton mills	32,843	17,032	15,811
Silk mills	1,453	541	912
Woolen and worsted mills	11,297	6,681	4,616
Other textile mills	3,522	2,001	1,521
Winders, reelers, and spoolers	13,792	1,117	12,675
Cotton mills	8,447	615	7,832
Silk mills	907	34	873
Woolen and worsted mills	2,923	287	2,636
Other textile mills	1,515	181	1,334
Other occupations	49,751	29,396	20,355
Cotton mills	20,408	12,348	8,060
Silk mills	741	206	535
Woolen and worsted mills	14,420	9,431	4,989
Other textile mills	14,182	7,411	6,771
Other industries	35,440	21,824	13,616
Electrical supply factories	5,635	3,448	2,187
Paper box factories	4,374	891	3,483
Rubber factories	9,815	6,396	3,419
Other factories	15,616	11,089	4,527
Sewers and sewing machine operators (factory)[1]	22,279	1,735	20,544
Shoemakers and cobblers (not in factory)	3,861	3,855	6
Skilled occupations (n. o. c.)	1,258	1,244	14
Annealers and temperers (metal)	276	274	2
Piano and organ tuners	599	592	7
Wood carvers	242	239	3
Other skilled occupations	141	139	2
Stonecutters	2,954	2,954	–
Structural iron workers (building)	732	732	–
Tailors and tailoresses	9,201	8,001	1,200
Tinsmiths and coppersmiths	2,291	2,291	–
Coppersmiths	280	280	–
Tinsmiths	2,011	2,011	–
Upholsterers	1,430	1,307	123
Transportation	**117,455**	**110,048**	**7,407**
Water transportation (selected occupations)	5,904	5,903	1
Boatmen, canal men, and lock keepers	291	290	1
Captains, masters, mates, and pilots	1,133	1,133	–
Longshoremen and stevedores	3,090	3,090	–
Sailors and deck hands	1,390	1,390	–
Road and street transportation (selected occupations)	45,699	45,675	24
Carriage and hack drivers	1,267	1,267	–
Chauffeurs	12,776	12,773	3
Draymen, teamsters, and expressmen[2]	24,413	24,413	–
Foremen of livery and transfer companies	500	500	–
Garage keepers and managers	880	878	2
Hostlers and stable hands	3,416	3,416	–
Livery-stable keepers and managers	743	739	4
Proprietors and managers of transfer companies	1,704	1,689	15
Railroad transportation (selected occupations)	37,037	36,901	136
Baggagemen and freight agents	1,024	1,024	–
Baggagemen	798	798	–
Freight agents	226	226	–
Boiler washers and engine hostlers	189	189	–
Brakemen	3,249	3,249	–
Conductors (steam railroad)	1,724	1,724	–
Conductors (street railroad)	5,405	5,405	–
Foremen and overseers	1,803	1,803	–
Laborers	9,981	9,874	107
Steam railroad	7,947	7,841	106
Street railroad	2,034	2,033	1

[1] Includes sewers and sewing machine operators in all factories except shoe and harness factories, and sack sewers in fertilizer, salt, and sugar factories, and cement, flour, and grain mills.

[2] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; and drivers for bakeries and laundries are classified with deliverymen in trade.

TABLE 27. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND OVER BY SEX — Continued.

Occupation	Total	Males	Females
Transportation — Con.			
Railroad transportation (selected occupations) — *Con.*			
Locomotive engineers	2,289	2,289	–
Locomotive firemen	1,435	1,435	–
Motormen	5,468	5,468	–
Officials and superintendents	744	740	4
Steam railroad	552	550	2
Street railroad	192	190	2
Switchmen, flagmen, and yardmen	2,625	2,625	–
Switchmen and flagmen (steam railroad)	2,090	2,090	–
Switchmen and flagmen (street railroad)	178	178	–
Yardmen (steam railroad)	357	357	–
Ticket and station agents	1,101	1,076	25
Express, post, telegraph, and telephone (selected occupations)	15,235	8,488	6,747
Agents (express companies)	301	299	2
Express messengers and railway mail clerks	835	835	–
Express messengers	253	253	–
Railway mail clerks	582	582	–
Mail carriers	3,657	3,653	4
Telegraph and telephone linemen	1,571	1,571	–
Telegraph messengers	584	577	7
Telegraph operators	1,501	1,200	301
Telephone operators	6,786	353	6,433
Other transportation pursuits	13,580	13,081	499
Foremen and overseers (n. o. c.)	1,094	818	276
Road and street building and repairing	188	188	–
Telegraph and telephone companies	586	310	276
Water transportation	144	144	–
Other transportation	176	176	–
Inspectors	1,410	1,402	8
Steam railroad	736	734	2
Street railroad	279	279	–
Other transportation	395	389	6
Laborers (n. o. c.)	8,604	8,604	–
Road and street building and repairing	7,100	7,100	–
Street cleaning	79	79	–
Other transportation	1,425	1,425	–
Proprietors, officials, and managers (n. o. c.)	726	644	82
Telegraph and telephone companies	387	308	79
Other transportation	339	336	3
Other occupations (semiskilled)	1,746	1,613	133
Steam railroad	254	254	–
Street railroad	803	674	129
Other transportation	689	685	4
Trade	**201,098**	**172,644**	**28,454**
Bankers, brokers, and money lenders	3,856	3,810	46
Bankers and bank officials	1,472	1,441	31
Commercial brokers and commission men	768	765	3
Loan brokers and loan company officials	77	70	7
Pawnbrokers	101	100	1
Stockbrokers	1,094	1,092	2
Brokers not specified and promoters	344	342	2
Clerks in stores other than sales-persons	4,220	2,927	1,293
Commercial travelers	11,286	11,199	87
Decorators, drapers, and window dressers	365	343	22
Deliverymen	17,456	17,454	2
Bakeries and laundries	2,083	2,081	2
Stores	15,373	15,373	–
Floorwalkers, foremen, and overseers	1,311	1,159	152
Floorwalkers and foremen in stores	1,101	949	152
Foremen, warehouses, stockyards, etc.	210	210	–
Inspectors, gaugers, and samplers	478	445	33
Insurance agents and officials	6,109	6,016	93
Insurance agents	5,491	5,409	82
Officials of insurance companies	618	607	11
Laborers in coal and lumber yards, warehouses, etc.	3,284	3,284	–
Coal yards	1,793	1,793	–
Elevators	78	78	–
Lumber yards	1,036	1,036	–

Veterinary surgeons	282	282	–
Other professional pursuits	2,217	875	1,342
Semiprofessional pursuits	4,966	2,555	2,411
Abstractors, notaries, and justices of peace	93	70	23
Fortune tellers, hypnotists, spiritualists, etc.	107	13	94
Healers (except physicians and surgeons)	544	175	369
Keepers of charitable and penal institutions	689	506	183
Officials of lodges, societies, etc.	629	476	153
Religious and charity workers	2,019	486	1,533
Theatrical owners, managers, and officials	632	577	55
Other occupations	253	252	1
Attendants and helpers (professional service)	1,835	877	958
Domestic and Personal Service	**180,254**	**64,588**	**115,666**
Barbers, hairdressers, and manicurists	10,002	8,558	1,444
Bartenders	4,546	4,546	–
Billiard room, dance hall, skating rink, etc., keepers	1,051	1,050	1
Billiard and pool room keepers	694	693	1
Dance hall, skating rink, etc., keepers	357	357	–
Boarding and lodging house keepers	9,312	705	8,607
Bootblacks	836	836	–
Charwomen and cleaners	10,049	711	9,338
Elevator tenders	2,357	2,354	3
Hotel keepers and managers	1,381	1,229	152
Housekeepers and stewards	12,459	1,493	10,966
Janitors and sextons	9,158	8,931	227
Laborers (domestic and professional service)	1,401	1,394	7
Launderers and laundresses (not in laundry)	7,875	586	7,289
Laundry operatives	6,790	2,601	4,189

TABLE 27. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND OVER BY SEX — Concluded.

Occupation	Total	Males	Females
Domestic and Personal Service — Con.			
Laundry owners, officials, and managers	1,788	1,713	75
Midwives and nurses (not trained)	7,529	2,063	5,466
Midwives	47	–	47
Nurses (not trained)	7,482	2,063	5,419
Porters (except in stores)	2,342	2,340	2
Restaurant, café, and lunch room keepers	3,030	2,618	412
Saloon keepers	1,026	1,015	11
Servants	71,667	12,489	59,178
Bell boys, chore boys, etc.	1,090	1,090	–
Chambermaids	3,775	–	3,775
Coachmen and footmen	1,108	1,108	–
Cooks	15,131	5,298	9,833
Other servants	50,563	4,993	45,570
Waiters and waitresses	14,877	6,658	8,219
Other pursuits	778	698	80
Bathhouse keepers and attendants	85	71	14
Cemetery keepers	326	326	–
Cleaners and renovators (clothing, etc.)	203	177	26
Umbrella menders and scissors grinders	63	63	–
Other occupations	101	61	40
Clerical	**133,545**	**71,003**	**62,542**
Agents, canvassers, and collectors	5,405	4,926	479
Agents	3,164	3,034	130
Canvassers	1,016	701	315
Collectors	1,225	1,191	34
Bookkeepers, cashiers, and accountants	39,463	15,740	23,723
Clerks (except clerks in stores)	55,853	41,682	14,171
Shipping clerks	10,862	10,680	182
Other clerks	44,991	31,002	13,989
Messenger, bundle, and office boys[1]	7,477	6,522	955
Bundle and cash boys and girls	817	158	659
Messenger, errand, and office boys	6,660	6,364	296
Stenographers and typewriters	25,347	2,133	23,214

[1] Except telegraph and telephone messengers.

TABLE 28. — GAINFUL OCCUPATIONS OF PERSONS 14 YEARS OF AGE AND

[NOTE. — "All other" includes Chinese, Japanese, Indian,

	Sex and Occupation	Total	Age Period		
			14 and over but under 16 Years	16 and over but under 18 Years	18 and over but under 21 Years

73	Hostlers and stable hands	3,416	10	69	139
74	Livery-stable keepers and managers	739	–	2	1
75	Proprietors and managers of transfer companies	1,689	–	3	22

[1] Includes sewers and sewing machine operators in all factories except shoe and harness factories, and sack sewers in fertilizer, salt, and sugar factories, and cement, flour, and grain mills.

[2] Teamsters in agriculture, forestry, and the extraction of minerals are classified with the other workers in those industries, respectively; and drivers for bakeries and laundries are classified with deliverymen in trade.

PART V

THE FISHERIES AND COMMERCE CENSUS; APPENDICES

THE CENSUS OF FISHERIES AND COMMERCE.

The act providing for the Decennial Census of 1915 required that there should be taken, in addition to the Population Census, a Census of the Fisheries and Commerce of the Commonwealth, the results of which are herewith presented.

I. THE SEA AND SHORE FISHERIES.

The statistics of the Sea and Shore Fisheries of the Commonwealth, gathered in the Census of 1915, are based upon the returns for the year ending December 31, 1914, and are shown in one presentation, giving Value of Equipment, Number or Quantity and Value of Product, and Number of Persons Employed.

Equipment.

The value of material actually required in the fishing industry for boats, vessels, and apparatus for fishing have been considered as equipment, and aggregate $4,571,176, of which $3,680,163 was invested in 8,890 boats and vessels and $891,013 in apparatus; the value of equipment in 1905 was $5,092,217, of which $4,148,640 was invested in boats and vessels and $943,577 in apparatus, a decrease in the total value of equipment from 1905 to 1915 of $521,041.

In determining the location of owners of the boats and vessels, the records of the port of registry were used. These records could not, however, always be considered as final for this purpose, because in several cases Massachusetts owned vessels were found to be registered out of the State, and in other cases Gloucester owned vessels were found registered in Boston. Several changes have taken place in the fishing industry during the past ten years, — many of the larger vessels have been sold out of the State, some have become old and unseaworthy, and persons engaged in the industry have not had others built to take their places because the steamer and beam-trawler, so-called, have replaced other vessels. The speedy motor boat, carrying from two to five men, which can make daily trips, doing away with the necessity of provisioning and covering distances impossible for those depending upon the sail, has largely taken the place of the old fishing boat, and its advent has practically revolutionized the fishing industry. Almost every fishing boat now has gasolene power, even the large schooners having an auxiliary engine. This has, in a sense, brought the fishing grounds nearer to the market, as the fish can be brought long distances on the day when caught. The engines also serve to pull the fishermen's nets and drag their heavy trawls.

Product.

The returns for fisheries in this census pertained only to quantity and value of the fish caught (and in order to avoid any duplication, the catch has been credited to the port from which the vessel hailed), which were classified for tabulation purposes in the following order: (1) Fish, (2) Mollusks, and (3) Crustaceans; and comparisons were made with the value of the fish caught as reported in the Decennial Census of 1905. It was, however, impossible to make a comparison of quantities between the two census periods, since the basis of measurement returned in 1905 was not comparable with that for 1915.

Fish.

Various kinds of fish formerly used for bait or other purposes are now used as food fish; therefore all kinds of fish caught have been considered as food fish and classified under *fish,* all kinds of shell fish belonging to the mollusk family are classified as *mollusks;* lobsters, crabs, and shrimps are classified as *crustaceans.* That class of food fish which was reported in 1905 as fish products and which in 1915 was classified as fish (food fish), showed an increase in value of $309,441.

The quantity of some of the staple fish has largely decreased, such as cod, cusk, hake, herring, mackerel, and pollock. The size and weight of the fish caught has not been as great owing to the fact that the beam-trawler gathers in everything that comes before it, and as the fish that are too small for the market are thrown overboard, — most of it dead or mutilated, — the large fish of the species named are becoming scarce. It will be noticed that there is also a decrease in the amount of bluefish which is due to the fact that the menhaden on which the bluefish live have almost deserted these shores.

According to the Census of 1905 the amount of halibut reported for Boston was 9,724,900 pounds, while in 1915 the amount was but 1,589,751 pounds, which, on the face of it, apparently shows a tremendous falling off in the catch; this, however, is not true, the apparent difference being due to the fact that the returns for 1905 are not comparable with those for 1915, since the quantity reported for 1905 included over 8,000,000 pounds of western halibut brought to Boston by rail, whereas, as above stated, only the quantity and value of fish caught by Massachusetts boats or vessels was taken into account in the Census of 1915.

Ten years ago the whiting, known as silver hake or silver scrod, was practically unknown as a food fish. Recently squid has been added to the list of edible fish; also albacore, known as horse mackerel or tuna fish, has taken its rightful place on the table. While it was known to the fishermen that these fish were good to eat, it was the fish freezers that made possible their addition to the list of edible fish. They are sold

mostly in Pennsylvania and New York State, as the Boston market can almost always be depended upon to supply this State with fresh fish at about the same price for which storage fish sells. There are about a dozen fish freezers along the Massachusetts coast and aside from their buying from the incoming boats, most of them have fishing apparatus of their own. Thus millions of pounds of fish caught are yearly being brought to this State for storage. The business is still in its infancy and every year will, no doubt, see an increase in the use of frozen fish for food.

The kinds and varieties of fish inhabiting these waters change greatly in different years. Squeteague (weak fish) were very scarce in 1914 and had been for several years. They were formerly the main catch of the fishermen of some parts of Martha's Vineyard, but in the year 1914 they practically disappeared, and it was reported that enormous schools of them appeared on the Pacific Coast, where they had never before been known. While in some seasons swordfish are plentiful, in other years they seem to disappear and the swordfisherman has to go to a different locality for his catch. During the two years prior to the Census of 1915 mackerel were caught in great numbers, and the increase in the use of the heavy beam-trawlers brought in tons of flounders.

The decrease in the catch shown in the cities of Beverly and Fall River was due partly to the fact that the vessels engaged in the business had been sold and partly because the sewage has been the means of stopping the fishermen from obtaining shell fish. This has also been the case in many other places. In the town of Wareham it was claimed that the chemicals from the bleachery at East Wareham have so polluted the waters that it is difficult to obtain fish. It is also claimed that the oil and gasolene from the motor boats entering the waters kill the spawn. In some cases along the Cape, especially in the town of Harwich, the scarcity of alewives was due to the fact that the brooks were dammed to flood the cranberry bogs, thereby stopping the alewives from coming up to spawn. It is also claimed that in 1914 the prevailing blackfish, which is of the whale species, drove the other fish away. Seiners from Boston and Provincetown take what they can in a day and what they do not catch they drive into deeper water, so that the local men who depend upon hand-fishing have but very little chance. The preponderance of opinion seems to be that the beam-trawlers have done the greatest injury to shore fishing, from the fact that with their heavy trawls they clean up the bottoms, thereby destroying the spawn and driving the fish into deeper waters. It is the general opinion of local fishermen that if heavy trawling continues, it will destroy the fishing industry on the Massachusetts coast.

The following table shows the value of the principal kinds of fish caught in this State for 1915 as compared with 1905 and 1895:

Product	1915	1905	1895
Alewives	$24,381	$33,682	$24,937
Bass	5,318	11,045	11,640
Bluefish,	7,967	15,229	54,735
Cod	2,347,634	2,317,008	567,602
Cusk	125,711	222,510	38,385
Eels	33,957	50,034	35,088
Flounders	289,394	104,202	17,902
Haddock	1,798,691	1,176,283	622,383
Hake	347,465	309,077	66,625
Halibut	456,798	863,708	513,080
Herring,	372,964	534,812	124,497
Mackerel	834,749	939,411	232,032
Pollock	322,017	347,277	35,069
Scup	20,001	18,052	26,455
Shad	5,179	3,786	2,355
Squeteague	1,462	90,737	14,812
Squid	65,381	19,485	13,465
Swordfish	259,794	110,450	24,206

Whaling.

Many of the vessels reported in 1905 as engaged in the whaling industry are now out of commission, and the value and product of the industry have not been included in the presentation for 1915. The following table shows the value of the whale products for New Bedford and Provincetown for 1915 as compared with 1905:

Whale Product	1915	1905
Total	**$222,487**	**$419,340**
New Bedford		
Ambergris	–	1,150
Whalebone	–	137,700
Whale-oil	217,987	258,925
Provincetown		
Ambergris	–	2,800
Whale-oil	4,500	18,765

Mollusks.

In 1905 the value of mollusks was $786,071 compared with $1,540,550 for 1915, a marked increase of $754,479.

Many changes have taken place in the shell fisheries, chiefly in the town of Nantucket. In the summer of 1904 a considerable bed of seed quahaugs was discovered off Tuckernuck Island. These were dug in large quantities by the use of hand rakes for the purpose of propagation. During the summer and the following winter, heavy storms, however, broke an opening between the islands of Tuckernuck and Muskeget, and the beds were buried with sand and destroyed. In the early fall of 1906, the entire shore of the south and east side of Muskeget Island was covered with tiny seed quahaugs, but the gales and storms during that winter washed them out to bottoms where they perished by anchor frost. In the winter of 1913 an enormous bed of quahaugs, about fifteen miles long and eight miles wide, was discovered outside of Nan-

tucket Bar near Nantucket Shoals by a fisherman from Edgartown. It has been fished daily, weather permitting, up to the present time, yielding in the beginning, for the larger boats and under favorable conditions, as high as 100 bushels a day. The digging is done by heavy power dredges. The years of 1914 and 1915 show the highest records for shipments of quahaugs from Nantucket. The fishermen claim that this bed is showing signs of decreasing product and that it is now difficult to obtain more than 50 bushels a day. The area, however, is so great that it would seem to be almost impossible to completely exterminate the quahaug. One of the greatest enemies of the quahaug is the salt water snail, which feeds upon the seed quahaugs found in shoal waters having a sandy bottom. When the seed quahaug is found on a muddy bottom the snail does not trouble it, as it seems to be able to work only on sandy bottoms.

In the fall of 1909, seed clams were discovered in Nantucket Harbor near Hussey Shoals and were dug in such large quantities for bait that the bed was entirely cleaned out. In Eastham the clam and quahaug beds have been practically dug out; they have been reseeded but were not ready for digging in 1914. It is very often claimed that the practice of summer visitors digging clams for their own consumption and taking all sizes, destroys the opportunity for the clams to seed, with the result that the industry has, in a great measure, decreased.

Little interest has been taken during the past few years in replanting oyster beds, and as a result that class of fishing has decreased.

In the winter of 1910 a large bed of scallops was discovered outside and to the east of Nantucket Breakwater. These were dredged out in such quantities that the bed was entirely exhausted. In 1914 hundreds of bushels of scallops were destroyed at Muskeget Island, as the beds located on the flats in shoal waters were badly frozen during the month of February. Notwithstanding this fact, the season of 1913-1914 was the largest Nantucket ever had in the scallop fishing industry, and the records show that the amount of scallops shipped during the season from November, 1913, to March, 1914, was 7,968 kegs, or about 48,000 gallons; for the season of 1914-1915, the shipments were 2,477 kegs; and for the season of 1915-1916, 1,035 kegs. It is of little use to make any record of scallop beds, as the life of the scallop is but two years. They are migratory and in some years will be found in localities where they were before practically unknown.

The following table shows the value of the principal mollusks obtained in this State for 1915 as compared with 1905 and 1895:

Product	1915	1905	1895
Clams	$295,588	$222,643	$174,332
Oysters	445,737	278,961	119,603
Quahaugs	380,776	195,841	31,115
Scallops	396,941	80,154	79,541

Crustaceans.

The total value of crustaceans reported for the Census of 1915 was $447,167, of which $430,839 represented the value of the lobster catch, an increase of $209,905 compared with the amount reported for 1905. This should not be considered as an increase in the quantity of lobsters obtained, as it is a well-known fact that the lobster is rapidly decreasing in size and quantity. The enormous demand for lobsters and the shortage in the market have greatly increased the selling price; thus the large increase in value shown between the two censuses.

Persons Engaged in the Fisheries.

There were 11,814 persons reported as engaged in the fishing industry. No attempt was made in the Census of 1915 to show the number of partners, stockholders, etc., engaged in the fisheries; therefore the figure 11,814 represents the number of persons actually engaged in catching fish. It was also decided not to show the nationality of the persons employed, owing to the fact that the various crews of the boats and vessels were continually changing. It is, however, a well-known fact that the number of native-born persons engaged in fishing has gradually decreased and that they have been replaced by those of foreign birth, Portuguese and Italians predominating.

Most of the fishing done on boats or vessels is by the share system, except in the case of beam-trawlers, where the men are hired by the trip or by the month. Sometimes the owners supply the boats and crews with everything required, including the necessary food for the trip, and take a certain number of shares of the catch for themselves, dividing the balance among the crew; in other cases the captain will furnish the supplies, in which case the distribution of shares differs.

II. OCEAN AND COASTWISE COMMERCE.

The statistics presented on Ocean and Coastwise Commerce are for the year ending December 31, 1914, and were obtained from 624 firms, individual owners, and shipping agents to whom vessels were consigned and who represented a number of firms. In tabulating the data care was taken to avoid duplications, and where the same boat or vessel entered different ports, it was credited to the port of entry, but where the same boat or vessel entered a specified port more than once it was accounted for only once, although the cargo brought on the various trips was included in the total amount for that port. The number of boats or vessels reported by ports, therefore, cannot be totalized to show the number of craft engaged in commerce in the State. The tables presented are as follows:

(B) Number and kind of boats and vessels engaged in commerce in the State, by port of entry.

(C) Number, gross tonnage, value of boats and vessels, and number of crew, by port of entry.
(D) Number of tons of freight, number of passengers, and amount received for transportation, by port of entry.
(E) Number, kind, gross tonnage, value of boats and vessels, and number of crew by State or country in which registered.

The amount of freight and the number of passengers carried in 1914 shows a decrease from 1904, although the earnings, due to the advance in rates, have increased. In the early part of 1914, on account of business depression, commerce greatly decreased and in August of that year 43 German and seven Austrian steamers which had been operating regularly, ceased their operations. These 50 vessels, during the first seven months of the year, brought to this country 198,629 tons of freight, at a cost for transportation of $920,685, and 4,984 passengers, for transporting whom $223,064 was received. The records also show that as a result of the war other foreign vessels decreased greatly in the amount of freight and the number of passengers carried. Many of the large steamers were used by their respective governments for transporting troops, which prevented them from being engaged in commerce.

The Census reports from 1885 to 1915 show earnings as follows:

Census Year	Total Receipts	Freight		Passengers	
		Tons	Receipts	Number	Receipts
1885	$12,915,974	5,168,176	$10,731,637	13,636,795	$2,184,337
1895	15,353,395	6,241,234[1]	12,029,488	7,845,075[2]	3,323,907
1905	30,982,231	21,039,109	24,792,584	26,492,075	6,189,647
1915	38,449,301[3]	18,754,393	29,051,526	23,451,988	8,786,881

[1] Number of tons carried by 12 vessels not stated.
[2] Includes 2,171,604 railroad passengers carried free.
[3] Includes $610,894 for towing.

The number of passengers carried and the amount received for their transportation for the year ending December 31, 1914, classified by kind of vessels, is shown in the following table:

Passenger Boats and Vessels	Number of Passengers	Amount Received for Transportation
Total	**23,451,988**	**$8,786,881**
Foreign vessels	160,766	4,922,747
American vessels	788,955	2,734,204
Excursion steamers	2,503,844	579,369
Ferries	19,647,957	478,100
All other	350,466	72,461

In conjunction with the information obtained during the canvass for the census, the following compilation has been made and is here submitted as of interest with respect to the shipbuilding industry of the Commonwealth, being brought to date as of December 31, 1917:

Number and Kind of Boats and Vessels of Five Tons and Over Built in Massachusetts from January 1, 1900, to December 31, 1917, as Registered in the United States.

1917	13,187,950	302,550	12,795,320	90,080	–	–	–

In addition to the above-mentioned there have been built in the Commonwealth for the United States Government and for foreign countries the following vessels:

7 Battleships
4 Cruisers
42 Tugs and steamships
5 Torpedo boats
45 Torpedo boat destroyers
63 Submarines
5 Lightships
2 Barges
20 Car floats
4 Gas launches

Under construction at the same time were:

12 Submarines
24 Torpedo boat destroyers
2 Scout cruisers
1 Tank steamer

TABLE A. — VALUE OF EQUIPMENT AND PRODUCT AND NUMBER OF STATE AND FOR SPECIFIED CITIES AND

[NOTE. — The State totals for 1905 include $1,018 for boats and vessels, $86 for apparatus, $2,515 for fish

APPENDICES.

Appendix A.

Chapter 692, Acts of 1914.

AN ACT TO PROVIDE FOR TAKING THE DECENNIAL CENSUS.

Be it enacted, etc., as follows:

Section 1. The decennial census of the inhabitants of each city and town of the commonwealth and a special enumeration of the legal voters thereof, as required by Articles XXI and XXII of the amendments to the constitution, shall be taken by the bureau of statistics as of the first day of April in the year nineteen hundred and fifteen. The census shall be taken by means of printed schedules which shall embrace, besides the questions necessary to obtain the information required as aforesaid, such other questions as may be deemed expedient by the director of the said bureau, subject to the approval of the governor and council.

Section 2. For the purpose of obtaining the information called for by this act, the director of the bureau of statistics shall divide the commonwealth into enumeration districts, and he shall have authority to appoint enumerators, interpreters, inspectors and special agents who shall be paid such rates of compensation as may be fixed by him, subject to the approval of the governor and council, except that in extreme emergencies or in districts in which suitable enumerators and interpreters cannot be obtained at the rate of compensation fixed as aforesaid, the director may fix a rate which, in his judgment, is reasonable under the circumstances; and the appointment of enumerators, interpreters, inspectors and special agents shall be in accordance with such rules and tests as the director may, with the approval of the civil service commission, devise for this purpose: *provided, however*, that enumerators shall be, so far as is practicable, residents of the cities and towns for which they are appointed. From the persons so appointed, the director may select for clerical work in examining and tabulating the returns and preparing the results of the census for publication such as may, by virtue of experience and training acquired in the work of the census, be deemed especially qualified therefor. All clerks, stenographers and other employees necessary in connection with the taking of the census and the analysis and publication of the results thereof, except as is otherwise provided herein, shall be appointed in accordance with the provisions of chapter nineteen of the Revised Laws, and the amendments thereof, and the compensation of such employees shall be determined in the same manner as that of the regular employees of the bureau of statistics. Persons employed in accordance with the provisions of this act may, after their census work is completed, be transferred by the director of the bureau of statistics to the regular staff of the said bureau. Whenever, for the purpose of expediting the census or the publication of the results thereof, it shall be deemed necessary to require clerks, stenographers or other office employees

to work more than the usual number of actual working hours in any one day, they may be paid extra compensation based upon the regular rate of pay. Any person employed under the provisions of this act who is found incompetent or derelict in the performance of his duty may be removed by the director of the bureau of statistics and a successor immediately appointed.

SECTION 3. Upon the petition of the city government of any city filed with the director of the bureau of statistics prior to the first day of January in the year nineteen hundred and fifteen for an enumeration of the city in such manner as to show the number of inhabitants and legal voters in each street, square or avenue, or in such blocks or squares of the city as may be designated, and specifying the details with which it is desired that the results thereof shall be tabulated, the enumeration shall so be made: *provided*, that the director is able to procure such maps or plans as may be necessary for this purpose. The tabulations herein provided for shall be limited to such inquiries as appear upon the regular schedules for the census of population provided for in section one of this act, and upon the completion of the tabulations as aforesaid made for any city under the provisions of this section and the determination of the expense incurred therefor, the treasurer and receiver general shall issue his warrant as provided in section thirty-four of Part I of chapter four hundred and ninety of the acts of the year nineteen hundred and nine, requiring the assessors of the cities concerned to assess a tax to the amount of such expense, and the said amount shall be collected and paid over to the treasurer and receiver general in the same manner as other state taxes. A copy of any tabulations made in accordance with this section shall, as soon as possible thereafter, be filed by the director of the bureau of statistics with the city clerk of the city for which they were prepared.

SECTION 4. The enumerators, interpreters, inspectors, special agents and other persons appointed under this act shall be furnished with a commission certifying to their appointment, and before entering upon the discharge of their duties shall take and subscribe an oath or affirmation that they will faithfully perform to the best of their ability the duties imposed upon them and that they will support the constitution and laws of the commonwealth; and each enumerator in making returns to the bureau shall sign and transmit therewith a certification, properly sworn to, that the information reported in such returns is correct to the best of his knowledge and belief.

SECTION 5. Upon the completion of the canvass of the district to which he is assigned, each enumerator shall forward to the director of the bureau of statistics a voucher properly sworn to, certifying to the number of days taken in making the canvass, the number of persons enumerated, and such other facts as may be required by said director; and each interpreter shall file a voucher in proper form for services rendered. No allowance or compensation shall be made to any enumerator or interpreter except upon the approval by the director of the bureau of statistics of vouchers filed as aforesaid, and no allowance shall be made to any enumerator or interpreter for travelling or other expenses in addition to the fixed rate of pay, except in extreme cases, when, in the opinion of said director, such extra allowance would secure economy in the enumeration; and in no case shall any such

extra allowance be made except upon the previous written authority of said director to incur such expenses nor except upon the presentation of a proper voucher covering the same: *provided, however,* that enumerators employing interpreters at their own expense without authorization in advance, may, within the discretion of said director, be allowed reimbursement for expenses so incurred; nor shall any allowance of pay for an enumerator or interpreter be made until the district to which he is assigned has been canvassed to the satisfaction of the director of the bureau of statistics, nor shall full payment be allowed an enumerator until all schedules furnished to him have been returned, examined, and accepted for tabulation. Said director may, before making allowances of pay, require any enumerator to make needed corrections of errors in his schedules without additional pay, and if an enumerator declines to make such corrections, or if, in the judgment of said director, it is deemed necessary to cause such correction or a re-enumeration of any part of such enumerator's district to be made by some other person, the cost of making the corrections or re-enumeration may be deducted from the amount that would otherwise have been allowed to him.

Section 6. The information obtained under the provisions of this act shall be deemed confidential as respects individuals and no disclosures shall be made of names or any other data relating to individuals or of the names of individuals supplying the information called for by this act, except as is authorized by chapter three hundred and eighty-five of the acts of the year nineteen hundred and six. Any person employed under the provisions of this act or any officer or other employee of the bureau of statistics who improperly discloses information furnished in confidence in accordance with this act, or who wilfully refuses to perform any duty required of him in accordance with law, or who is guilty of wilful deceit or falsehood in the discharge of his duty shall be subject to a fine not exceeding two thousand dollars or imprisonment for not more than one year; and any person who refuses to furnish information as required by this act to a person authorized to collect the same shall be liable to pay a fine not exceeding one thousand dollars for every such refusal. All fines imposed by this act may be recovered in any court of competent jurisdiction, by information or complaint of the attorney-general, and shall accrue to the commonwealth.

Section 7. As soon as possible after the enumeration provided for by this act has been completed and the results thereof duly determined, the director of the bureau of statistics shall make a return of the same to the secretary of the commonwealth, showing the number of inhabitants and legal voters as determined by said enumeration in each town and in each ward of the several cities, and the secretary shall submit the same to the general court within the first ten days of the session next following.

Section 8. In addition to the census provided for by section one of this act, the director of the bureau of statistics shall also cause to be taken during the year nineteen hundred and fifteen a census of the fisheries and commerce of the commonwealth, and the several provisions of this act shall, so far as is practicable, apply thereto.

Section 9. The director of the bureau of statistics shall cause to be prepared and printed, in such detail and with such analyses as he may deem advisable, tabulations of the various classes of information gathered in

accordance with this act; and he may publish the same in bulletins from time to time in such number as may be necessary in his judgment to meet the legitimate demand therefor, reserving not less than twenty-one hundred copies of each issue for subsequent binding as herein provided for. When a series of said bulletins covering related subjects has been completed, he may cause the same to be suitably bound in volumes, and these, with such other volumes containing information gathered in the census, as may be prepared, shall be distributed under the direction of the secretary of the commonwealth as follows: — To each member of the general court in the year nineteen hundred and fourteen, nineteen hundred and fifteen and nineteen hundred and sixteen, one copy, and an additional copy to the clerk of the senate and the clerk of the house for the use of their respective offices; to the governor, lieutenant governor, and each member of the council of the years nineteen hundred and fourteen, nineteen hundred and fifteen and nineteen hundred and sixteen, one copy; to each state board, department, or commission listed in the manual for the general court, one copy; to the senators and representatives of Massachusetts in congress, one copy each; to the justices of the supreme judicial court and to the justices of the superior court and to the clerks of said courts, one copy each; to the several registers of deeds, one copy each; to the several registers of probate and insolvency, one copy each; to each board of registrars of voters in the cities of the commonwealth, one copy; to each city and town clerk for the use of his office, one copy; to the libraries of the incorporated colleges and universities of the commonwealth, one copy each; to the several state normal schools, one copy each; to the several county law libraries of the commonwealth, one copy each; to each free public library in the commonwealth, at least one copy; to the Massachusetts Historical Society, the New England Genealogical Society, the Boston Athenæum, and the American Antiquarian Society, one copy each; to the library of congress, one copy; to the several state and territorial libraries of the United States, one copy each; to the bureau of statistics for distribution in the discretion of the director of said bureau, one hundred copies. Any remaining copies shall be distributed under the direction of the secretary of the commonwealth.

Section 10. In addition to the preparation and publication of the tabulations provided for in section nine of this act, the director of the bureau of statistics is authorized to prepare from information obtained in the census such special tabulations from time to time as may be desired by any individual or organization, and to charge therefor a reasonable sum, based upon the cost of making the same. All fees received under the provisions of this section shall be paid into the treasury of the commonwealth.

Section 11. The director of the bureau of statistics is hereby authorized to expend a sum not exceeding four hundred thousand dollars in carrying out the provisions of this act, exclusive of the cost of paper, of which an amount not exceeding fifteen thousand dollars shall be available during the current year; and the sergeant-at-arms is hereby directed to provide for use in carrying out the provisions of this act such quarters as may be deemed by the director of the bureau of statistics to be suitable therefor, the cost of rental and other expenses in connection therewith to be paid out of the appropriation for the census. From and after the first day of July, in the

year nineteen hundred and fourteen, until the thirtieth of June in the year nineteen hundred and seventeen, this period covering approximately the time required in preparing for and supervising the taking of the census and tabulating the results thereof for publication, the director of the bureau of statistics and the deputy director of said bureau shall receive extra compensation at the rate of twelve hundred dollars and one thousand dollars per annum, respectively, in addition to their salaries as fixed by law, the same to be paid from the appropriation for census purposes. Chapter four hundred and twenty-three of the acts of the year nineteen hundred and four is hereby repealed.

SECTION 12. This act shall take effect upon its passage. [*Approved June 20, 1914.*

Appendix B.

Chapter 120, Resolves of 1914.

RESOLVE TO PROVIDE FOR SECURING IN CONNECTION WITH THE DECENNIAL CENSUS CERTAIN INFORMATION RELATIVE TO AGED AND DEPENDENT PERSONS.

Resolved, That, for the purpose of securing information for the general court for a proper consideration of the subject of old age pensions, so-called, the director of the bureau of statistics be required, in connection with the taking of the decennial census in the year nineteen hundred and fifteen, to collect, assort, arrange and transmit in print to the general court at his earliest convenience the following statistical information: — the number of persons sixty-five years of age and over in the cities and towns of the commonwealth and their length of residence in the commonwealth; the number of dependent persons of all ages being supported in the various public and private institutions throughout the commonwealth; the number of persons of all ages in the various cities and towns of the commonwealth who are receiving aid from any public source or who have received it during the preceding year, and the total amounts so paid. The director of the bureau of statistics is further authorized to compile statistics as to the number of persons aided from private sources and the total amount so paid, and to obtain any other information which, in his opinion, may promote the purposes of the inquiry. All expenses under this resolve shall be paid out of the appropriation for said census, and, so far as may be practicable, the director shall give preference in tabulating the results of the census to the compilation of the information called for by this resolve. [*Approved June 20, 1914.*

Appendix C.

I.

ORDER OF THE HOUSE OF REPRESENTATIVES, ADOPTED MARCH 24, 1915, REQUESTING THE OPINION OF THE JUSTICES OF THE SUPREME JUDICIAL COURT UPON THE CONSTITUTIONAL AUTHORITY OF THE LEGISLATURE TO FIX THE CENSUS DAY.

Ordered, That the opinion of the justices of the Supreme Judicial Court be required by the House of Representatives on the following questions of law: —

1. If a census of the inhabitants of each city and town of the Commonwealth, and a special enumeration of the legal voters thereof, shall be taken by the Bureau of Statistics as of the first day of April in the year nineteen hundred and fifteen, as provided by section one of chapter six hundred and ninety-two of the acts of the year nineteen hundred and fourteen, will such census be in conformity with the requirements of Articles XXI and XXII of the Amendments of the Constitution which provides that "a census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June in the year one thousand eight hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter?"

2. Will an apportionment by the Legislature of the members of the House of Representatives to the several counties and a division of the Commonwealth into senatorial districts based upon an enumeration of legal voters made under the provisions of said chapter six hundred and ninety-two, if otherwise in conformity with the requirements of said Articles XXI and XXII of the Constitution, be rendered illegal because the enumeration of legal voters is made as of the first day of April in the current year?

3. Will a census of the inhabitants of each city and town of the Commonwealth, and a special enumeration of the legal voters thereof, taken in conformity with the provisions of said chapter six hundred and ninety-two, as amended by the accompanying bill, now pending in the House of Representatives, conform with the requirements of said Articles XXI and XXII of the Constitution, so that the same may be made the basis for an apportionment by the Legislature of the members of the House of Representatives to the several counties of the Commonwealth and of a division of the Commonwealth into senatorial districts?

4. These questions of law are important, and the opinion of the justices is required in order to determine whether the remedial legislation is necessary to provide for the taking of the decennial census of the current year

II.

OPINION OF THE JUSTICES.

The order adopted on the twenty-fourth day of March, 1915, a copy of which is hereto annexed, has been received and the following opinion is submitted: —

The question presented is whether Articles XXI and XXII of the Amendments to the Constitution require the state decennial census to be taken as of the first day of May, or whether the exact time within the designated year may be fixed by the General Court. The decisive words of Article XXI are these: "A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June in the year one thousand eight hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter." Precisely the same words occur in Article XXII of the Amendments.

The natural and ordinary meaning of these words is that the date as of which the enumeration shall be made and when it shall be returned into the office of the secretary of the commonwealth is defined for the year 1857; but it is not stated for the year 1865 or any subsequent period. No later provision of either article or amendment discloses a different purpose. The apportionment of the representatives to the several counties required by Article XXI must be made by the Legislature "at its first session after the return of each enumeration as aforesaid." The boards of public officers authorized to divide the counties nto districts are required to assemble "on the first Tuesday of August next after each assignment of representatives to each county" for the performance of their duties. By Article XXII, "The general court shall, at its first session after each next preceding special enumeration, divide the commonwealth into forty districts" for the election of senators. These requirements do not point to any particular or unvarying date for taking the census. Articles XXI and XXII, which were adopted in 1857, supplanted respectively Article XII and XIII of the Amendments. Those articles by unmistakable language made necessary the taking of each successive decennial census in the month of May. The words of Article XII as to the time when the census should be taken were these: "A census of the ratable polls in each city, town and district of the commonwealth, on the first day of May, shall be taken and returned into the secretary's office, in such manner as the legislature shall provide, within the month of May, in the year of our Lord one thousand eight hundred and thirty-seven, and in every tenth year thereafter, in the month of May." The words of Article XIII are equally unequivocal in designating the month of May, and are these: "A census of the inhabitants of each city and town, on the first day of May, shall be taken, and returned into the secretary's office, on or before the last day of June, of the year one thousand eight hundred and forty, and of every tenth year thereafter." The refusal to follow this plain provision of the earlier amendments in adopting the amendments now in force, and the use of words

naturally conveying a different meaning, indicates that the people intended to make a change in this respect. The convention of 1853 included among its constitutional propositions one beginning with these words: "A census of the inhabitants of each city and town in the commonwealth, on the first day of May in the year one thousand eight hundred and fifty-five, and on the first day of May of each tenth year thereafter, shall be taken and returned into the secretary's office, on or before the last day of June following the said first day of May in each of said years." Although this with the other propositions of that convention was rejected by the people in November, 1853, its provisions doubtless were familiar to the public men who composed the Legislature of 1856 by which Articles XXI and XXII of the Amendments were first adopted.

If it had been the purpose of the framers of Articles XXI and XXII of the Amendments that each census should be taken during the month of May, it would have been easy to express that purpose in simple and direct phrase so clear that it could not be misunderstood. Three models of apt words in suitable form to convey that meaning were at hand in the existing Articles XII and XIII and the proposition of the convention of 1853. The adoption of words of a contrary import cannot be treated as accidental, but must be construed as manifesting a settled design to alter the provisions of the earlier amendments on this point as to each census following that of 1857. This is in conformity with the true theory of a constitution which is to establish only broad principles and to leave details to be wrought out by the Legislature according to the varying demands of policy and expediency.

It follows that under the constitutional provisions now in force the General Court may fix the first day of April as the date as of which the state census must be taken in any tenth year following 1865.

The first of May was assumed to be the date of the census in *Opinions of the Justices*, 142 Mass. 601, 604, 605, and 157 Mass. 595, 598. But that question was not there presented for determination and was not discussed. Doubtless no date other than May first was thought of then or at any time until after the passage of St. 1914, c. 198, fixing the first of April in place of the first of May as the date as of which taxes must be assessed. The references in those opinions to the first of May are not authorities against the conclusions now reached.

Accordingly the first question is answered Yes and the second No.

Perhaps the third question becomes immaterial in view of the foregoing answers. But plainly it is within the constitutional power of the Legislature to order the census to be taken on the first day of May in the current year, and thus change St. 1914, c. 692, requiring it to be taken as of April first.

Appendix D.

PROCLAMATION OF THE GOVERNOR RELATIVE TO THE CENSUS.

The Commonwealth of Massachusetts

By His Excellency DAVID I. WALSH, Governor.

A PROCLAMATION.

Whereas, By the provisions of Chapter 692, Acts of 1914 of the General Court of Massachusetts, the

Decennial Census of the Commonwealth

is to be taken by the Bureau of Statistics, beginning on the first day of April, nineteen hundred and fifteen; and

Whereas, A correct enumeration of the population every ten years and an enumeration of the legal voters is required by the Constitution of the Commonwealth for the purpose of determining the representation of the people in the Legislature; and

Whereas, It is of the utmost importance to the interest of all the people of Massachusetts that this census should be a complete and accurate report of the population of the Commonwealth;

Now, therefore, I, David I. Walsh, Governor of the Commonwealth of Massachusetts, do hereby declare and make known that, under the act aforesaid, it is the duty of every person to answer all questions on the census schedules applying to him and the family to which he belongs, and that any person refusing to do so is subject to penalty.

The sole purpose of the census is to secure general statistical information regarding the population of the state, and replies are required from individuals only in order to permit the compilation of such general statistics. The census has nothing to do with taxation, with army or jury service, with the compulsion of school attendance, with the regulation of immigration, or with the enforcement of any national, state, or local law or ordinance, nor can any person be harmed in any way by furnishing the information required. There need be no fear that any disclosures will be made regarding any individual person or his affairs, since for the due protection of the rights and interests of the persons furnishing information every employee of the Bureau of Statistics engaged in this work is prohibited, under heavy penalty, from disclosing any information which may thus come to his knowledge.

I therefore earnestly urge upon all persons to answer promptly, completely, and accurately all inquiries addressed to them by the enumerators or other employees of the Bureau of Statistics, and thereby to contribute their share toward making this great and necessary public undertaking a success.

In witness whereof, I have hereunto set my hand and caused the seal of the Commonwealth to be affixed.

Done at the city of Boston this first day of March, A.D. one thousand nine hundred and fifteen, and of the Independence of the United States of America the one hundred and thirty-ninth.

DAVID I. WALSH.

By His Excellency the Governor.

ALBERT P. LANGTRY,
Secretary of the Commonwealth.

God save the Commonwealth of Massachusetts.

AN HISTORICAL SURVEY OF CENSUS TAKING IN MASSACHUSETTS.

Part I.

CENSUSES OF POPULATION.

Census taking, or enumerations of portions of or the entire population, in Massachusetts falls naturally into four distinct historical periods, as follows: —

1. From the earliest colonial times to 1790, the year when the first United States Census under the federal Constitution was taken.
2. From 1790 to 1837, during which period enumerations of population were limited to those taken decennially by the United States under the federal Constitution.
3. From 1837 to 1857, during which period the federal decennial censuses were supplemented by state censuses of *ratable polls* in 1837 and of *inhabitants* in 1840 and 1850 in compliance with the provisions of Articles XII and XIII, respectively, of the Amendments to the Constitution; and also by censuses of *inhabitants* in 1837 and in 1855 under statutory authority only.
4. From 1857 to the present time, during which period there have been, in addition to the federal decennial censuses, in the years ending in a zero, state censuses of legal voters in 1857 and of population and legal voters in 1865, and in each tenth year thereafter in compliance with the provisions of Articles XXI and XXII of the Amendments to the Constitution.

From 1837 to 1905 there have also been periodical censuses of industry, agriculture, and other subjects taken in later years in conjunction with the censuses of population under the authority of statutory provisions only, which will be considered separately; in the matter immediately following, therefore, the term "census" will be understood as limited to enumerations of population.

1. Censuses Prior to 1790.

The first general enumeration of the population of Massachusetts, which may properly be dignified by the term "census" and for which fairly complete and accurate returns are available, was that of 1765. As early, however, as May 10, 1643, the General Court of the Massachusetts Bay Colony passed an order "that warrant should bee sent to the townes to send the number of males from sixteen year ould to sixetie, in the beginning of the 6th m. next," this enumeration being made necessary by the requirements of the Articles of Confederation of the United Colonies of New England, — a combination of the colonies of Plymouth, Massachusetts Bay, Connecticut, and New Haven, — Article 4 of which was as follows: —

> It is by these Confederats agreed that the charge of all just warrs whether offensiue or defensiue upon what part or member of this Confederacon soeuer they fall, shall both in men and provisions and all other Disbursements be borne

by all the parts of this Confederacon in different proprocons according to their different abilitie in manner following, namely that the Commissioners for eich Juridiccon from tyme to tyme as there shalbe occation bring a true account and number of all the males in euery Plantacon or any way belonging to or under their seueral Jurisdiccons of what quallyty or condicon soeuer they bee from sixeteene years old to three-score being Inhabitants there. And that according to the different numbers which from tyme to tyme shalbe found in eich Jurisdiccon upon a true and just account, the service of men and all charges of the warr be borne by the Poll: eich Jurisdiccon or Plantacon being left to their owne just course and custome of rating themselues and people according to their different estates with due respects to their quallites and exemptions among themselues though the Confederacon take no notice of any such priviledg; and that according to their different charge of eich Jurisdiccon and plantacon, the whole advantage of the warr (if it please God to bless their Endeavours) whether it be in lands goods or persons shall be proportionately deuided among the said Confederats.

In May, 1646, another order was passed by the General Court for a similar enumeration of males between 16 and 60, and in November of the same year an enumeration of all males was ordered in connection with a uniform valuation and assessment of property. Similar orders were passed October 27, 1647, May 23, 1655, and from time to time afterwards, the object of which was to secure enumerations of the inhabitants for assessment purposes, but such returns as may have been made of the results were very meagre. An exhaustive research of early colonial and provincial records, supplemented by reference to a memorandum book relative to facts pertaining to the population during the revolutionary period, in the library of the Massachusetts Historical Society, appears to have been made by Joseph B. Felt (at one time librarian of that society), the results of which he embodied in a paper on the "Population of Massachusetts," published in 1845 in the first volume of the Collections of the American Statistical Association. From this paper, which remains the authoritative treatise on this subject, the following statements respecting the population of the Plymouth Colony for various years from 1621 to 1673, of the Massachusetts Bay Colony from 1629 to 1665, and of the Province from 1696 to the first general enumeration in 1765, are quoted: —

Population of Plymouth Colony, 1621–1673.

Before proceeding to give any particular census of the whites in Massachusetts, we will notice them generally, as existing in Plymouth, while an independent Colony. As well known, this section of our Commonwealth became a part of her by the charter of 1691.

1621, Nov. According to Prince's Chronology, there were about 51, who survived the devastations of disease.

1622, July 16. Purchase assigned to the Colony about 100.

1624. Capt. John Smith, in his Path Way, remarked, "In this Plantation there is about an hundred and fourscore persons."

1633. There were 89 polls, from 16 to 60. These, multiplied by $4\frac{1}{9}$, make nearly 396.

1637. The number of freemen was 122. These were to the whole people as about 1 to $4\frac{1}{2}$. Such a proportion allows 549.

1654. The population of Connecticut was about 3,186. She stood to Plymouth the year before, according to an assessment of men by commissioners of the United Colonies, in case of war with the Dutch, as 65 to 60. Then, as the former of these two proportions is to the people of Connecticut, so the latter is to those of Plymouth; being *2,941*, within a small fraction.

1665. The estimated inhabitants of Massachusetts were 23,467. The proportion of Plymouth to her, in 1661, was as 105 to 464, in the division of wampum among the United Colonies. Assuming these premises, Plymouth would have about 5,310 souls, and a fraction over.

1673. An estimate of population in New England, was 78,416. Plymouth then held a ratio to the rest of New England as about 30 to 250. This would afford Plymouth 9,410 within a fraction.

Population of Massachusetts Bay Colony, 1629–1665.

In 1626, after Rev. John Lyford left Salem for Virginia, there probably remained thirty souls of all ages. It is not unlikely, that there were then 80 more at Mount Wollaston and other places, making a total of 110. In 1629, Mr. Higginson stated, that there were 300 new and old planters at Salem and Charlestown. Among the emigrants, who arrived that year, were 60 single and married females with 26 children. Besides these, the planters probably had as many as 50 servants. As Mount Wollaston settlement had terminated and sickness had diminished the colonists, who came with Endicott, there may not have been more than 140, who resided in Massachusetts before 1629, that survived and continued. Of these survivors, 70 may have been comprehended among the planters. Such items would make the people of the whole Colony, in *1629* as then bounded, amount to *506*. More than 80 of this number were cut off, the next winter, by disease.

In 1637, the General Court ordered 211 men proportionably from each town in Massachusetts. Salem was assessed 24 of them and then had 900 inhabitants. Say as the latter number of men is to their population, so are 211 men to the whole population of all the towns. The result is *7,912* and a fraction.

Winthrop's *Journal* related, in 1639, that the soldiers of the Bay were mustered at Boston and amounted to 1,000. From supposing that the Bay then included what was subsequently Essex County, some of the best historical authorities have taken such military force to be all which existed in what has been denominated Massachusetts. But as it reached no further north than Chelsea, there were about 611 more soldiers. The reason for this supposition is, that, in 1637, the towns, not included in the preceding reference of Winthrop, were assessed 80 of the 211 soldiers, ordered against the Pequods. Though this ratio is not conclusively right, in its application to the case in view, because of changes in the number of the people, during the interim of two years, yet it is not likely to be far from being correct. Computing the total, 1,611 of the militia, at $5\frac{1}{3}$, as their part of the whole people, the Colony contained *8,592*. The moderate increase of two years, though many emigrants came in 1638, may be accounted for in the companies, who went to other colonies, and in the departure of those, who were sent off or went away on account of the difficulties with Ann Hutchinson. Johnson observed, in his *Wonder Working Providence*, that, in the period of fifteen years to 1643, there had been brought to Massachusetts about 21,200 passengers. More than half of this number, at such a date, had, for other reasons in connection with that just assigned, returned to Europe or gone to different sections of America. Among these reasons may be particularly classed this, that as the persecution of the Puritans in England ceased in 1640, and thus stopped the tide of emigration to our shores, many of the colonists were induced to return and dwell in their native country.

The modern part of *Universal History*, vol. 29, p. 288, states, that, in 1642, New England could raise 7 or 8,000 militia. Such an estimate is too high. If we allow Massachusetts $\frac{2}{5}$ of them, about her proportion, she would have had a population of over 20,000. This was much beyond the reality.

Population of the Province, 1696–1765.

In 1696, President Stiles estimated the inhabitants of New England at 100,000. The preceding year, Governor Fletcher laid before the Assembly of New York, the King's requisition of quotas from the several Provinces for raising a united force against the French. Rhode Island and Providence Plantation were proportioned at 48, Connecticut 120, and Massachusetts 350. Had New Hampshire been included, it would have stood at about 40. Hence, our Commonwealth, comprising Maine, as well as Plymouth, then possessed a part of the 100,000 people, as 350 to 558, which is 62,724. Other estimates of years prior to 1696, have been cited by authors. But they are evidently above what they should be, and, therefore, have not been adduced particularly in this connection.

From observations on the American Colonies, about 1701, by Rev. Dr. Humphreys, Secretary of the Society, in England, for propagating the gospel in foreign parts, the *Annals* of Rev. Dr. Holmes estimate the population of Massachusetts, at that period, as 70,000.

In 1718, according to Governor Shute's representation to the Board of Trade and Plantations in London, 1723, the militia of this Commonwealth were 15,000. Douglass remarked, that such force was one third of the alarm list, or about the number of polls. Of course, the 15,000 multiplied by $5\frac{1}{3}$ allow 80,000 people.

In 1723, on the authority of Governor Shute, our Province had 94,000 inhabitants.

In 1731, Anderson states, that Massachusetts had 120,000 souls. The number of militia, being 50,000, assigned to her, the year before, by Salmon, must have been too many.

In 1735, the *History of the British Dominions* in North America, allows 35,427 white polls to this Commonwealth, besides 2,600 negroes. The former number multiplied by 4, give a product of 141,708, which, with the colored people, make 144,308. This total is likely to be correct, because based on the Provincial account of polls.

In 1742, Douglass places the white polls of Massachusetts at 41,000, being about 164,000 inhabitants.

In 1747, the *History of the British Dominions*, just before quoted, estimates her militia at 36,000, making about 192,000 people.

In 1749, the population here, as represented by a table in the *Annals* of Rev. Dr. Holmes, was 220,000, and, in 1755, 234,000. The great difference between the number of 1747 and 1749, indicates, that considerable deduction should be made from one or the other. The probability is, that the mistake is in the estimate of 1749, as being too large.

Census of 1765.

The first movement for a general census of Massachusetts was begun in 1763. On the 2d of June of that year, Governor Bernard communicated a message to the General Court to the following effect: —

> I am directed by the Lords of Trade, to take a particular account of the number of the people of this Province, with all proper distinctions thereof. I am desirous to have this done with the utmost exactness, as such informa-

tion will be of great use to the Government of this Province as well as of his Majesty's ministers. I therefore propose to have the returns of the several towns made upon oath, according to a form issued for this purpose. And as I apprehend these orders will be more effectual, if they are issued under the authority of the whole legislature, I recommend this affair to your consideration.

The General Court apparently did not take kindly to the idea. The census being required by the British Government, it was viewed, comments Felt, "with anxious jealousy, by our fathers, as another plan for the imposition of taxes on our Province and the infringement of their charter rights. The numbering of Israel by David and its results were remembered, and applied by some to the injunction for their observance, as similarly objectionable and liable to be followed with judgments. Besides, the proposal, with so wide an application, being an unpractised one, in this meridian, was met with objections, common to novelties in political requisitions."

Considerable delay accordingly ensued in putting the project into execution, for which Governor Bernard tactfully found excuses, but he persisted in endeavoring to procure the co-operation of the Legislature, which not desiring an open rupture with the Government, finally sanctioned the proposal, the House of Representatives passing an order February 2, 1764 directing the selectmen of each town and district to "take an exact account of the number of dwelling-houses, families, and people, in their respective towns and districts, including as well Indians civilized, negroes and mulattos, as white people, and females as well as males."

"But," continues Felt, "as the heart of the people was not in it, many refused to comply with its requisitions. No doubt, their disaffection to it was much increased by the tidings, that the Parliament had voted to tax the American Colonies. Nor was the acerbity of their feelings toward it, at all sweetened by the Sugar Act, which restricted their commerce with the West Indies. After waiting over a year, with his patience much tried and his fear not small, lest the British authorities would look on him as nerveless, the Chief Magistrate desired, that the stronger confirmations of a formal law might be superadded. Accordingly, March 1, 1765, 'An act for carrying into execution an order of the General Court for numbering the people within this Province,' passed in the two houses to be engrossed. On the 5th, it received the signature of the Governor." The returns were ordered to be made on or before the twenty-fifth day of May, 1765.[1]

Census of 1776.

On December 26, 1775, the Provincial Congress, for the purpose of raising the necessary funds for the prosecution of the war of independence, resolved —

That the thirteen United Colonies be pledged for the redemption of the bills of credit so directed to be emitted. That each Colony provide ways

[1] *Collections of the American Statistical Association*, 1845, Vol. I, paper by Joseph B. Felt, *Population of Massachusetts*, pp. 123–127, 146–157. For another account of this census see Joseph B. Benton's *Early Census Making in Massachusetts*.

and means to sink its proportion of said bills, in such manner as may be most effectual, and best adapted to the condition, circumstances, and equal mode of levying taxes in each Colony. That the proportion or quota of each respective Colony be determined according to the number of inhabitants of all ages, including negroes and mulattoes, in each colony. That it be recommended to the several Assemblies, Conventions, or Councils, or Committees of Safety of the respective Colonies, to ascertain, by the most impartial and effectual means in their power, the number of inhabitants in each respective colony, taking care that the lists be authenticated by the oaths of the several persons who shall be intrusted with this service; and that the said Assemblies, Conventions, Councils, or Committees of Safety, do respectively lay before this Congress a return of the number of inhabitants of their respective Colonies, as soon as the same shall be procured.

In conformity with this act of Congress, the General Court of Massachusetts, on February 16, 1776, passed an act "for ascertaining the number of inhabitants in this Colony," which recited: —

Whereas the American Congress have recommended to the several Assemblies, Conventions, Councils, and Committees of Safety of the respective Colonies, to ascertain, by the most impartial and effectual means in their power, the number of Inhabitants in the Colonies respectively: *Be it enacted, by the Council and House of Representatives in General Court assembled, and by the authority of the same*, that the Selectmen who shall be chosen in each town within this Colony for the year one thousand seven hundred and seventy-six, at their annual meeting in March, shall take an exact account of the number of inhabitants, of all ages, including negroes and mulattoes (distinguishing the number of each), resident in their respective towns, and belonging to this Colony on the twentieth day of March aforesaid, and all soldiers and seamen in the service of the Continent or of this Colony, who are to be considered as inhabitants of the towns to which they belonged respectively when they entered the said services, and that they shall make return of the same into the Secretary's office of this Colony, on or before the last day of June next. And every Selectman refusing or neglecting his duty herein, shall forfeit and pay as a fine for the use of this Colony, the sum of four pounds.

Supplementing the resolve above quoted, the Legislature passed other resolves on the same date to facilitate the enumeration. One prescribed the form of the return to be made by the several towns, which was to provide for obtaining the following information: —

The names of heads of each family.
The number of white people in each family.
The number of negroes and mulattoes in each family.
The whole number in each family.

Census of 1784.

Congress, not satisfied with the results of efforts it had made in 1781[1] to procure an enumeration of the white inhabitants of the sev-

[1] On the 11th of December, 1781, the Continental Congress "*Resolved*, That it be recommended to the legislatures of the several States, to cause to be taken and transmitted to Congress, as soon as practicable, the number of white inhabitants thereof, pursuant to the ninth article of the confederation." This being communicated to the Legislature of Massachusetts, was placed in the hands of a committee for consideration, which reported Feb-

eral states, again ordered a census in a resolve passed February 17, 1783. This was very deliberately complied with by the General Court of Massachusetts, which on July 2, 1784, passed an act "for obtaining a just and accurate account of the quantity of land within this Commonwealth granted to, or surveyed for, any person, the number of buildings thereon, and of its inhabitants." The assessors of the various towns were required to make the canvass and to return the particulars thereof as of September 1, 1784, to the Secretary of the Commonwealth not later than the following November 1.

2. Censuses from 1790 to 1837.

During this period the Commonwealth took no censuses, membership of the Legislature being based upon the number of ratable polls as determined by the assessors, and the only enumerations of the population of the State being those made by the United States pursuant to the requirements of the federal Constitution. The population of Massachusetts as determined by these censuses was as follows: 1790, 378,787; 1800, 422,845; 1810, 472,040; 1820, 523,287; 1830, 610,408.

3. Censuses from 1837 to 1857.

Censuses of 1837.

Two censuses were taken by the Commonwealth in 1837 as of the same date, May 1, — one, a census of *inhabitants*, the other, a census of *ratable polls* only. The first was provided for by Chapter 85, Acts of 1837, approved March 21 of that year, and was taken for the purpose of enabling compliance with the act of Congress providing for the distribution of the surplus revenue in the treasury of the United States among the several states, and which it was required by the Legislature should be deposited with the several towns of the Commonwealth in proportion to their respective *population*. The population as determined by this census was 701,331.

The census of ratable polls taken in the same year was necessitated by the requirements of Article XII of the Amendments to the Constitution as a means of establishing what was believed would be a more satisfactory basis for apportioning membership in the House of

---

ruary 20, 1782, to the effect that "a very accurate account of the number of souls within this Commonwealth" having been taken in 1776, "at which time the whites amounted to 338,627, and as there was a general valuation taken of all polls, rateable and not rateable, whether at home or abroad, in 1772, 1778, and 1781, — it is supposed a more accurate account of the number of whites cannot be had than from said returns. . . ." Based upon the number of polls returned for 1781, the report estimates the total white population for that year as 358,402. No recommendation for compliance with the request of Congress was made, the committee evidently feeling that the desired information, so far as Massachusetts was concerned, was sufficiently accurate and up to date for practical purposes. The House accepted the report, the Senate favored a more literal compliance with the act of Congress, and the matter was then dropped and the data already at hand were permitted to serve the purposes of taxation for carrying on the remainder of the war. "Whatever else," says Felt in his paper on the population of Massachusetts already quoted (p. 133), "may have induced the Representatives thus to hold back, it was not to hide the real number of our inhabitants. They endorsed the liberal estimate of the report, which multiplied the polls by 4½, as the amount of them, instead of the common ratio of 4. Their apparent objection to comply with the recommendation of Congress, was, that the call for it, in Massachusetts, was not so great as in other parts of the Union, because they had means whereby it might be correctly enough answered, as to all its public purposes. They also probably feared that, under the great burdens borne by the people, such a measure might alienate the feelings of many from government, without any absolute benefit. Still, the example of the Senate was safer and wiser, which by obedience would have given stability to the legislation of Congress, already too weak-handed by deficiencies of the confederacy."

Representatives than by permitting the number to be determined locally by the assessors as had, in effect, hitherto been the practice.[1] This amendment, which was adopted by the General Court during the sessions of the years 1835 and 1836 and was approved and ratified by the people November 14, 1836,[2] provided that the apportionment of representatives should be based upon "a census of the *ratable polls* in each city, town, or district of the commonwealth, on the first day of May," which should "be taken and returned into the secretary's office, in such manner as the legislature shall provide, within the month of May," in the year 1837 and in every tenth year thereafter in the month of May; and an enabling act consistent with the constitutional requirement was passed on April 12 (Chapter 128 of the Acts of 1837). The number of ratable polls returned by this census was 193,431.

Censuses of 1840.

A new basis of determining representation in the Senate and House of Representatives was provided by Article XIII of the Amendments, which was adopted by the General Court during the sessions of the years 1839 and 1840 and approved and ratified by the people April 6, 1840.[3] It provided that —

> A census of the *inhabitants* of each city and town, on the first day of May, shall be taken, and returned into the secretary's office, on or before the last day of June, of the year one thousand eight hundred and forty, and of every tenth year thereafter; which census shall determine the apportionment of senators and representatives for the term of ten years.

Consistently with this article of amendment, the Legislature passed Chapter 68 of the Acts of 1840, approved March 21 of that year, which provided in Section 1 as follows: —

> A census of the inhabitants of the several cities and towns in this commonwealth, on the first day of May next, and on the first day of May, in every tenth year thereafter, shall be taken and returned into the secretary's office, on or before the last day of the following June, in the manner hereinafter prescribed; *provided, however*, that state paupers and convicts in the state prison shall not be numbered; also the inmates of the several hospitals, jails and houses of correction, and the students in colleges, academies and high schools, shall not be numbered in the census of towns to which they do not belong.

The total number of "inhabitants of the several cities and towns" as determined by this census was 719,364. The total *population* as determined by the United States Census, taken in the same year, was 737,699.

The constitutional and legislative provisions for a census in the year 1840 and every tenth year thereafter involved in those years a duplication of the canvass made by the United States in taking its decennial census of population, though the character of the two censuses

[1] See Part IV, p. 727. [2] Yeas, 34,719; nays, 11,754. [3] Yeas, 24,884; nays, 4,912.

was not absolutely identical, for the federal enumeration was supposed to be complete as to total population, while the state enumeration expressly excluded "state paupers and convicts in the state prison."

Censuses of 1850.

The decennial census of *inhabitants* provided for by Article XIII of the Amendments to the Constitution was duly taken in 1850 under the provisions of Chapter 68 of the Acts of 1840, which remained in force, no additional legislation being apparently deemed necessary. The number of *inhabitants* of the Commonwealth as determined by this census was 973,654. The total *population* as determined by the United States Census taken in the same year was 994,514.

Census of 1855.

Notwithstanding the censuses of population and of inhabitants which were now being taken decennially in the same year by the federal government and by the Commonwealth, respectively, under constitutional provisions, the Legislature apparently felt that there should be an enumeration as often as once in each five years, and so in 1855 it passed an act (Chapter 439), approved May 21, which provided that —

> A census of the inhabitants of each city and town of the commonwealth of Massachusetts shall be taken, between the first day of June and the first day of October, as to existing facts on the first day of June in the year eighteen hundred and fifty-five and also in the year eighteen hundred and sixty-five, and in each tenth year thereafter.

The population of the Commonwealth as determined by the Census of 1855 was 1,132,369.

Census of 1857.

But before the year 1860, in which, under the Constitution, another census of inhabitants for the purpose of determining representation in the Legislature during the succeeding decade must needs be taken, the Constitution was again amended by Articles XXI and XXII (adopted by the General Court of the political years 1856 and 1857 and approved and ratified by the people May 1, 1857),[1] which changed the basis of representation from *inhabitants* to *legal voters*, the provision for the census being as follows: —

> A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June, in the year eighteen hundred and fifty-seven; and a census of the inhabitants of each city and town in the year eighteen hundred and sixty-five, and of every tenth year thereafter. In the census aforesaid, a special enumeration shall be made of the legal voters; and in each city, said enumeration shall specify the number of such legal voters aforesaid, residing in each ward of such city.

Inasmuch as the census of legal voters to be taken in 1857, as provided for in these amendments, was to be as of May 1, and as the

[1] The vote on Article XXI was: yeas, 31,277; nays, 6,282. The vote on Article XXII was: yeas, 32,971; nays, 4,342.

election to determine whether the amendments would be ratified was to be held on that day, the Legislature anticipated the ratification by passing an act on April 11, 1857, making more definite provision for taking the census of legal voters in the then current year, and for the census of legal voters and inhabitants to be taken in the year 1865 and every tenth year thereafter. This act, Chapter 60 of 1857, was to become effective "from and after the date of the governor's proclamation, announcing that either of the articles of amendment of the Constitution, relating to the districting of the state for the choice of representatives or senators to the General Court, to be submitted to the people on the first day of May of the present year, has been duly adopted and ratified by them; and if both of said amendments shall be rejected, this act shall be void." This act also expressly repealed Chapter 68 of the Acts of 1840 and thus remedied the virtual duplication of the population census by the Commonwealth and the federal government in the same year, such as had already occurred in 1840 and 1850, while by the adoption of the amendments of 1857 to the State Constitution there was, in conjunction with the federal census, a quinquennial enumeration of the population of the Commonwealth, which has been maintained up to the present time. The census of May 1, 1857, showed a total of 211,681 legal voters.

4. State Censuses since 1857.

Census of 1865.

As above stated, Chapter 60, Acts of 1857, approved April 11 of that year, passed in conformity with the Twenty-first and Twenty-second Articles of Amendment, provided that —

> A census of the legal voters of each city and town in this commonwealth, on the first day of May next, shall be taken and returned into the office of the Secretary of the Commonwealth, on or before the last day of June next, and a census of the inhabitants of each city and town on the first day of May, in the year eighteen hundred and sixty-five, and of every tenth year thereafter, in the manner hereinafter prescribed.

This act thus became, unless and until repealed, the permanent census law of the Commonwealth, and in 1860 it was repealed by Chapter 182 of the General Statutes, but was reincorporated, in substance, in the general revision, becoming Chapter 20 of the General Statutes of 1860. When, however, the time came to prepare for the Census of 1865, it was found desirable to pass a new enabling act, and this has been done with each recurring census period, notwithstanding the act as passed each decade, with the exception of that making provision for the Census of 1915, has in form purported to provide for all future censuses. The enabling act for the Census of 1865 was Chapter 69 of the Acts of that year, approved March 6, and provided in Section 1 that —

> "A census of the inhabitants of each city and town in the commonwealth on the first day of May shall be taken in the year 1865 and in every tenth year thereafter and shall contain a special enumeration of the legal voters

residing in each town, and in each ward of the several cities." By Section 3, the census was to be taken in the cities by agents appointed by the mayor and aldermen, and in towns by the selectmen or by agents appointed by them, and it was provided that a return of the results should be made on or before August 20 of the same year to the sheriff of the county "who shall transmit it to the office of the secretary of the commonwealth on or before the *last day of said August;* or the selectmen or agents may themselves transmit the return to the office of the secretary on or before the day last named."

Hitherto it had been the practice to have censuses taken by the assessors, but it was felt that this method was distinctly prejudicial to a complete and impartial canvass because of the supposed indisposition of many persons to give all the facts desired for census purposes to canvassers who might use the same for purposes of taxation.

Section 7 of this act *repealed* Chapter 20 of the General Statutes of 1860. Thus *Chapter 69 of the Acts of 1865 became the law for the Census of 1865 and for succeeding decennial censuses unless and until amended or repealed.* The population of the Commonwealth as determined by the Census of 1865 was 1,267,031.

Census of 1875.

A notable change was made in the administrative methods of census-taking in preparing for the Census of 1875. Since the preceding state census, namely, in 1869, a distinct statistical department had been created by the Legislature, the Bureau of Statistics of Labor, and since this Bureau was charged by the provisions of Chapter 386 of the Acts of 1874, approved June 30, with the duty of taking an industrial census in 1875, it was decided to give over to it also the taking of the population census, which had hitherto been a function of the Secretary of the Commonwealth. This was done by incorporating a provision (Section 2) in the industrial census act stipulating that "the decennial census of the commonwealth required by articles twenty-one and twenty-two of the amendments to the Constitution shall be taken by the same persons as are appointed to gather the industrial statistics," provided for in Section 1, namely, such of the assessors of the several cities and towns as might be appointed by the Bureau of Statistics of Labor, — thus authorizing a return to the extent that the chief of the Bureau might find it expedient to do so, to the practice of permitting assessors to act as enumerators.

As no special designation was made in the census legislation of 1874 of a census day, or a date for making the return of the results to the Secretary of the Commonwealth, and as only so much of Section 3 of Chapter 69 of the Acts of 1865 as was inconsistent with Chapter 386 of the Acts of 1874 was repealed by it, the provision of the act of 1865 requiring the census of that year and of every tenth year thereafter to be taken as of May 1 remained in force, and the Census of 1875 was accordingly taken as of May 1. The act of 1865, however, in providing in Section 3 that the return to the Secretary should be made not later than August 31, did not specifically indicate that the

period for making the return should remain the same in each subsequent census year; but the census office apparently construed this to be intended and as applying to the Census of 1875. The population of the Commonwealth as determined by the Census of 1875 was 1,651,912.

Census of 1885.

In 1882 the laws of the Commonwealth were subjected to another general revision, and Chapter 69 of the Acts of 1865 was accordingly repealed by Chapter 224 of the Public Statutes of 1882, and its provisions incorporated into Chapter 31, the phraseology running in Section 1: —

> A census of the inhabitants of each city and town in the commonwealth on the first day of May shall be taken, under the direction of the bureau of statistics of labor, in the year eighteen hundred and eighty-five, and in every tenth year thereafter, and shall contain a special enumeration of the legal voters residing in each town, and in each ward of the several cities;

and in Section 3 it was provided that —

> The agents and assessors appointed to take the census "shall on or before the twentieth day of August of the same year, deliver the return to the sheriff of the county, who shall transmit it to the office of the said bureau on or before the last day of said August; or they may themselves so transmit the return."

Thus, Chapter 31 of the Public Statutes of 1882 became the law for the Census of 1885 and succeeding censuses unless and until amended or repealed. This statute was, however, superseded by Chapter 181, Acts of 1884, approved April 23, which provided in Section 1 that —

> The decennial census of the commonwealth required by articles twenty-one and twenty-two of the amendments to the Constitution and the decennial census of the industries of the commonwealth shall be taken in the year eighteen hundred and eighty-five and in every tenth year thereafter, under the direction of the bureau of statistics of labor, by enumerators to be appointed by said bureau.

Section 3 of this act provided that the information gathered on the population schedule —

> shall relate to each person residing in the commonwealth on the first day of May and by such schedule there shall be made a special enumeration of the legal voters, [etc.].

Section 10 of the act provided that —

> The said bureau, after it has gathered the facts as to population, shall make a return of the aggregated results of the census as to population and voters for each town and city, and each ward of each city, and shall return into the office of the secretary of the commonwealth, said aggregated results, on or before the first day of December of each census year, and the secretary shall prepare from such aggregated results, an abstract, arranged by counties, showing the number of legal voters in each town and in each ward of the several cities, and shall submit the same to the general court within the first ten days of the session following the taking of the census of inhabitants.

Section 18 of this act repealed Chapter 31 of the Public Statutes. Thus Chapter 181 of the Acts of 1884 became the law for succeeding decennial censuses unless and until amended or repealed. The population of the Commonwealth as determined by the Census of 1885 was 1,942,141.

Census of 1895.

Chapter 224, Acts of 1894, approved April 11, provided in Section 1 for taking the census in the year 1895 "and in every tenth year thereafter;" and in Section 3 provided that the information to be gathered as to population and social statistics shall include an enumeration of the inhabitants and a special enumeration of the legal voters "on the first day of May in the census year." Section 10 repeated the provisions of the corresponding section of the Act of 1884 requiring a return of the results of the census to be made to the Secretary of the Commonwealth "on or before the first day of December of each census year."

Section 18 of this act repealed the Census Act of 1884 (Chapter 181) in its entirety. Thus the act of 1894 became the law for the Census of 1895 and for succeeding decennial censuses unless and until amended or repealed. The population of the Commonwealth as determined by the Census of 1895 was 2,500,183.

Census of 1905.

When the general laws were codified and enacted as the Revised Laws of 1902, the census legislation on the statute books was omitted, though it had been included in the general revisions of 1860 and 1882, but since the census act of 1894 was not repealed by the Revised Laws of 1902, it still remained in force. As at each recurring census period since 1875, however, it had been found necessary to enact new legislation, so in 1904, Chapter 423, approved June 4, was passed to provide specifically for the Census of 1905, and, following custom, provision was made for taking the Census in 1905 "and in every tenth year thereafter" as of the first day of May, and requiring the return to be made to the Secretary of the Commonwealth "on or before the first day of December in each census year."

Section 27 of this act repealed the census act of 1884 (Chapter 224). Thus the act of 1904 became the law for the Census of 1905 and for succeeding decennial censuses unless and until amended or repealed. The population of the Commonwealth as determined by the Census of 1905 was 3,003,680.

Census of 1915.

The enabling act for the Census of 1915 was approved June 20, 1914, being Chapter 692 of the acts of that year. It was characterized by numerous modifications of census legislation of former decades intended to meet the changing conditions of the times. One radical departure from the procedure of all former state censuses was the provision for taking the census as of April 1 instead of May 1,[1]

[1] See Part III, "The Census Day."

which had been uniformly the census day since the first census of ratable polls in 1837; and for the first time, also, no definite date was fixed in the census act for the return to be made into the office of the Secretary of the Commonwealth, the stipulation in this respect being only that the returns should be made "as soon as possible after the enumeration"; but the Secretary of the Commonwealth being required to submit the return to the General Court within the first ten days of the legislative session next following the taking of the census, it was, of course, imperative that the return should be made in season to permit this to be done. The return was, in fact, made on December 23, 1915, and showed the population of the Commonwealth to be 3,693,310.

Chapter 692 of the Acts of 1914 specifically repealed Chapter 423 of the Acts of 1904, and provided only for the Census of 1915; that is, it did not follow the practice of preceding census acts by providing not only for the Census of 1915, but for a census "in every tenth year thereafter," it having become apparent that such a provision served no useful purpose in view of the necessity of passing new legislation for each census.

Part II.

CENSUSES OF INDUSTRY, AGRICULTURE, AND SUBJECTS OTHER THAN POPULATION.

1837. By Chapter 199 of the Acts of 1837, approved April 19, provision was made for obtaining "statistical information in relation to certain branches of industry within the Commonwealth" as of April 1, 1837. This information was to be procured by the assessors of the several towns and returned to the Secretary of the Commonwealth, and was to embrace data relative to the following specified industries: Cotton, woolen, and silk manufacturing and sperm oil used by manufacturers; sheep growing and wool production; boot and shoe manufacturing; tanning; hat and straw bonnet manufacturing; paper manufacturing; pig, bar iron, and iron castings manufacturing; nail, axe, cutlery, metal button, and farm implement manufacturing; glass manufacturing; comb manufacturing; tin and wooden ware manufacturing; distilling; salt making; shipbuilding; importation of sperm oil; the fisheries. This was the first systematic attempt to appraise the industrial resources of the Commonwealth.

1845. By Chapter 171 of the Acts of 1845, approved March 21, provision was made for taking a census of industry similar to that of 1837, but upon a much more extended scale, over 90 articles of manufacture and agricultural products being specified regarding which information was to be obtained by the assessors as of April 1 and returned to the Secretary of the Commonwealth.

1855. By Chapter 467 of the Acts of 1855, approved May 21, 1855, provision was made for an industrial census similar to the Censuses of 1837 and 1845, and of substantially the same scope as the Census of 1845. The data, however, were to be obtained as of June 1 instead of April 1.

1865. By Chapter 146 of the Acts of 1865, approved April 24, provision was made for obtaining the *Industrial Statistics* of the Commonwealth, returns to be made as of May 1, 1865, by the aldermen of each city and the selectmen of each town, between May 1 and September 1, and in every tenth year thereafter, to the Secretary of the Commonwealth, relating to amount, description, and value of stock and fuel consumed, and of articles manufactured; to the produce of land, quarries, kilns, coal-beds, ore-beds, and fisheries; to wool, wood, bark, charcoal, farm products, live stock, ice, and imports; to vessels and boats built and buildings erected. The act proceeded to specify in great detail the character of information to be secured for these and for other subjects, including cotton and other textile manufactures.

1875. By Chapter 386 of the Acts of 1874, approved June 30, it was provided that the decennial *Industrial Statistics* to be obtained in 1875 in conformity with the requirements of Chapter 146 of the Acts of 1865 should be gathered under the direction of the Bureau of Statistics

of Labor by such of the assessors of the several cities and towns as said Bureau might appoint; and that the schedule of "heads of information" set forth in the act of 1865 should be revised by the secretary of the Board of Education, the secretary of the Board of Agriculture, and the Insurance Commissioner, subject to the approval of the Governor and Council. Beginning with this year all censuses have been taken by the Bureau of Statistics.

1885. By Chapter 181 of the Acts of 1884, approved April 23, comprehensive provision was made in one act for the decennial censuses of population, legal voters, and industries (preceding census legislation being repealed), the information sought to be gathered on eight schedules, as follows: —

1. Population and social statistics.
2. Manufactures.
3. Mining and quarrying.
4. Agricultural products and property.
5. Fisheries.
6. Commerce.
7. Libraries.
8. Schools and school property.

The inquiries were subject to the approval of the Governor and Council. By a supplementary act, Chapter 55, Resolves of 1884, data relating to woodland were to be secured. The data to be obtained on schedules 2, 3, 5, 6, 7, and 8 were to be for the year ending June 30 of the census year, and those for schedule 4 for the year ending November 15 of the census year. For the first time provision was made that the census in all its branches should be obtained by "enumerators" appointed for the purpose, although certain of the returns were to be made by mail.

1895. By Chapter 224 of the Acts of 1894, approved April 11, provision was again made in one act not only for the decennial census of population and legal voters, as required by the Constitution, but also for securing information relating to —

Social statistics.
Manufactures.
Mining and quarrying.
Agricultural products and property.
Fisheries.
Commerce.
Libraries.
Schools and school property.

The several schedules were to bear inquiries framed by the Bureau of Statistics of Labor and be approved by the Governor and Council.

1905. By Chapter 423 of the Acts of 1894, approved June 4, provision was again made in one act for the decennial census of population and

legal voters required by the Constitution and for securing information relating to —

Social statistics.
Manufactures.
Trade.
Mining and quarrying.
Agricultural products and property.
Fisheries.
Commerce.
Libraries.
Schools and school property.

The schedules were to contain inquiries framed by the Bureau of Statistics of Labor and be approved by the Governor and Council.

The federal government, which had hitherto for some decades taken a census of manufactures in conjunction with its decennial census of population, began in 1905 to take a quinquennial census of manufactures, so that in this year there were technically two censuses in Massachusetts covering this subject, for although there was but one field canvass (due to a co-operative arrangement between the Government and the Commonwealth), the results were tabulated and published independently. This appeared to be a needless duplication of effort and expense, so that in planning for the State Population Census of 1915, no provision was made for a census of manufactures to be taken in that year by the State, nor did the Legislature provide for a census of agriculture as it had hitherto done in connection with the decennial population census. Moreover, the annual collection of manufactures statistics by the Bureau of Statistics, begun in 1886, had by now been developed so that it served the purpose of an annual census.

Part III.

THE "CENSUS DAY," AND THE AUTHORITY OF THE LEGISLATURE TO FIX THE SAME IN ITS DISCRETION UNDER ARTICLES XXI AND XXII OF THE AMENDMENTS TO THE CONSTITUTION.

Since the first enumeration of ratable polls in 1837, the census day for each census up to and including that of 1905 had uniformly been May 1, but when the time approached for drafting legislation to provide for the Census of 1915, the Director of the Bureau of Statistics thought it desirable that the date be changed to April 1. Before making a recommendation for such a radical innovation, however, he deemed it important to satisfy himself that the somewhat awkward phrasing of the constitutional provisions for the census did not deprive the Legislature of the power to make the change, and he accordingly made a careful study of the subject, the results of which are here set forth as a matter of record.

Articles XXI and XXII of the Amendments to the Constitution, ratified by the people on May 1, 1857, provided that there should be taken a census of the *legal voters* as of May 1 that year and that the same should be returned into the office of the Secretary of the Commonwealth on or before the last day of June of the same year. No provision was made by these amendments for taking a census of the *inhabitants* in 1857, but provision was made for taking a census of the inhabitants and also an enumeration of the legal voters in the year 1865 and every tenth year thereafter. While the amendments specified the day for which the census of legal voters should be taken in the year 1857, and also the period within which the return of said census should be made to the Secretary they did not specify the day on which the census of the inhabitants and the enumeration of the legal voters should be taken in the subsequent census years, nor did they specify the period within which the censuses to be taken in subsequent census years should be returned into the office of the Secretary of the Commonwealth. The amendments plainly left the census day and the period of making the return for the censuses required to be taken in the year 1865 and every tenth year thereafter to the determination of the Legislature. While the amendments were still pending, the Legislature passed an act (Chapter 60 of the Acts of 1857) which became effective upon the ratification of the amendments, and which supplied the provisions in question for the Census of 1865 and of every tenth year thereafter. These were that in the census of that year and succeeding decennial censuses the day of enumeration should be May 1 and the last day for making the return to the Secretary of the Commonwealth, June 30.

Chapter 60 of the Acts of 1857 was repealed by Chapter 182 of the General Statutes of 1860, but Chapter 20 of the General Statutes of 1860 again fixed the date of enumeration and the last day for making the return

for the Census of 1865 and the decennial censuses thereafter as May 1 and June 30, respectively.

Chapter 69 of the Acts of 1865 repealed Chapter 20 of the General Statutes of 1860, but while it made the provision that May 1 should be the date of enumeration for the Census of 1865 and each decennial census thereafter, it extended the period for making the return to the Secretary of the Commonwealth to August 31.

Chapter 224 of the Public Statutes of 1882 repealed Chapter 69 of the Acts of 1865, but Chapter 31 of the Public Statutes of 1882 again provided that the date of enumeration and the last day for making the return should be May 1 and August 31, respectively, for the Census of 1885 and each decennial census thereafter.

Chapter 181 of the Acts of 1884 repealed Chapter 31 of the Public Statutes of 1882, but while it provided that May 1 should be the date of enumeration for the Census of 1885 and each decennial census thereafter, it extended the period within which the return should be made for the Census of 1885 and each decennial census thereafter to December 1.

Chapter 224 of the Acts of 1894 repealed Chapter 181 of the Acts of 1884, but continued the provision that May 1 should be the date of enumeration and December 1 the last day for making the return for the Census of 1895 and each decennial census thereafter.

Chapter 423 of the Acts of 1904 repealed Chapter 224 of the Acts of 1894 but continued the provision that May 1 should be the date of enumeration and December 1 the last day for making the return for the Census of 1905 and each decennial census thereafter.

Thus, it will be seen that the Legislature in 1857 and again in 1860 and again in 1865 passed acts providing for the census to be taken in the year 1865 and in each tenth year thereafter, the statute of 1860 repealing that of 1857 and the statute of 1865, in turn, repealing that of 1860; the statute passed in 1865 was allowed to remain in force and to govern the Census of 1875, but in 1884, the act of 1865 was entirely repealed and a new act passed; again, in 1894, the act of 1884 was repealed and a new act passed; and again, in 1904, the act of 1894 was repealed and a new act passed. In all of these acts, from 1857 to 1904, inclusive, the Legislature saw fit to fix the census day as of May 1, presumably for the reason that throughout this period this was the date for the assessment of property, — indeed, during a part of this period the statutes provided that the census should be taken by the assessors. During the period from 1857 to 1904, however, the last day permitted for making the return of the census results into the office of the Secretary of the Commonwealth was changed on three different occasions. The provision made in the original enactment of 1857 and re-enacted in the General Statutes of 1860 was that the return should be made for the Census of 1865 and each decennial census thereafter not later than the last day of June, but before the time arrived for taking the Census of 1865 the provision was changed by Chapter 69 of the Acts of that year so as to extend the period for making the return to the last day of August; and this remained unchanged until 1884, when it was provided that the return of the Census for 1885 and each decennial census thereafter might be made not later

than the first day of December, this provision being re-enacted in the census acts of 1894 and 1904 to govern the Censuses of 1895 and 1905, respectively, and each decennial census thereafter.

While, therefore, the Legislature had not in any of the intervening census legislation between 1857 and 1914 changed the date of enumeration, it did change the date of making the return into the office of the Secretary, and there seemed, therefore, to be no question but that it had the same authority to change the date of enumeration as it had exercised on three occasions to change the date for making the return. The subject was discussed by Mr. Horace G. Wadlin, Chief of the Bureau of Statistics of Labor from October, 1888, to January 31, 1903 (and who had been connected with the office through several censuses, being in entire charge of the Census of 1895), in a communication addressed to the Director of the Bureau of Statistics under date of February 12, 1914, as follows: —

Boston Public Library, February 12, 1914.

Mr. Charles F. Gettemy, *Director, Bureau of Statistics, State House, Boston, Mass.*

My dear Mr. Gettemy: — The question which is interesting you, as to the power of the Legislature, under the Constitution, to fix the date of enumeration of the inhabitants and voters within the census year, is one to which I have given some consideration. My view might not accord with the opinion of the court, but at any rate it agrees with the action of the Legislature taken continuously since 1865. I am aware, of course, that Legislatures sometimes err in legislating upon matters controlled by constitutional limitations, and that legislation finally pronounced unconstitutional, although previously unchallenged, ceases to have value as a precedent.

It is well, perhaps, in order that the subject may be clearly outlined, to review the constitutional provisions relating to the census as they have been successively modified.

Originally, senators were apportioned by districts, created by the General Court, in number according to "the proportions of the public taxes" paid therein; while representatives were apportioned to each town according to the number of *ratable polls* therein, each town having at least one representative.

Article XII of the Amendments changed this, and, in order to establish an equal basis of representation, provided for a decennial census of "the *ratable polls* . . . on the first day of May," to "be taken and returned into the Secretary's office, in such manner as the Legislature shall provide, *within the month of May*" in 1837 and in "every tenth year thereafter in the month of May."

Article XIII of the Amendments superseded this, however, and provided for a decennial census of *inhabitants* "on *the first day of May*," to be returned into the office of the Secretary on or before *the last day of June*, 1840, and every tenth year thereafter, to be used in an apportionment of senators and representatives *on the basis of inhabitants.*

A State census of inhabitants was thus taken in 1840 and in 1850. The national census fell in the same years, a decennial census having been taken by the national government each tenth year since 1790.

Meanwhile, irrespective of a census enumeration of the people, industrial statistics were gathered under statutory provisions in 1837 and 1845, and, continuing this practice, a collection was authorized in 1855, and in that year, by statutory provisions, an enumeration of the inhabitants was also taken. Before

the year 1860, in which, under the Constitution, another census of inhabitants would have been required, the Constitution was again amended by Articles XXI and XXII.

These articles, respectively dealing with the apportionment of senators and representatives, supersede Article XIII and provide for a special census of "legal voters . . . on the *first day of May*", to be taken and returned into the office of the Secretary of the Commonwealth, "on or before *the last day of June* in the year 1857"; and also for a regular decennial census of inhabitants to be taken in 1865 and every tenth year thereafter; in which, incidentally, a special enumeration of legal voters should be made. This decennial census provision is contained in the second clause of each amendment. The sentence following begins: "In the census aforesaid, a special enumeration shall be made of the legal voters." The "census aforesaid" must be the census of inhabitants to be taken in 1865 and every tenth year thereafter, since the Census of 1857 had already been specified as a census of legal voters.

It may be noted that the provisions of Article XII and Article XIII, and of the first clause of XXI and XXII relating to the census of legal voters to be taken in 1857, were all explicit as to the subjects of enumeration, the date of enumeration, and the date of the return. Under Article XII it was to be of ratable polls, on the first day of May, returned into the Secretary's office within the month of May; under Article XIII, of inhabitants on the first of May, returned into the Secretary's office on or before the last day of June.

By the Amendments XXI and XXII a new basis of apportionment of senators and representatives was fixed, *i.e.*, legal voters (as distinguished from ratable polls, or inhabitants), this requiring a special census of legal voters in 1857; to be taken on the first day of May, and returned into the Secretary's office on or before the last day of June.

The second clause of Articles XXI and XXII is, however, not explicit as to the census day or date of return. It is explicit as to the subjects of enumeration, *i.e.*, "the inhabitants" and "the legal voters." This was the important thing. Why was it not made equally explicit on the other points? It might easily have been made so if it had been thought necessary, as had been done in the preceding cases. Of course, as any one conversant with census-taking knows, the particular date of enumeration and return are details to be settled by the practical exigencies of the case. The dates that best enable the facts to be collected and tabulated with accuracy are the best dates. When the facts as to legal voters and ratable polls were fixed by the date May 1, that day was the most convenient day for establishing the facts. The date of return was affected by the extent of tabulation and revision required. The first date, so far as related to the status of polls and voters, apart from any question of enumeration, was subject to change at any time by legislation, and has since been changed so that April 1 becomes the better day for enumeration.

To provide for the details of the enumeration in 1865, Chapter 69 of the Acts of that year was enacted. With the constitutional provisions for this census before them, no explicit date being fixed in the Constitution, either for enumeration or return, the Legislature in this statute proceeded to fix both. The enumeration was to be of May 1 (that being the natural and convenient day, as the provisions of law relating to legal voters then existed), and the return was to be made into the office of the Secretary "on or before the twentieth day of August." Obviously, if the conclusion was right that the date of return could be fixed by statute, and was not limited by anything in the Constitution, so likewise the date of enumeration might have then been changed by statute (or might now be changed), both dates being, as far as the Constitution is con-

cerned, subject to the same considerations. Subsequent Legislatures have proceeded in the same way. These statutes relating to the details of the enumeration within the census years fixed by the Constitution all provide not only for the particular census then in hand but those in each "tenth year thereafter." Thus, unless repealed or modified by subsequent legislation, the details of census-taking fixed by either of them would continue in force. No new law was enacted relating to the Census of 1875 so far as concerned the enumeration of the inhabitants, and the provisions of Chapter 69 of 1865 formed the basis for that enumeration.

As the census year 1885 approached, the complexity of the work required additional legislation, and Chapter 181 of 1884 was enacted, wherein May 1 was fixed as the date of information as to inhabitants and legal voters, the census to be taken under direction of the Bureau of Statistics of Labor, and the details of enumeration to be turned into the office of this Bureau before the last day of June and transmitted into the office of the Secretary on or before December 1.

Again, in 1894, Chapter 224 provides for the census to be taken in 1895. This, following the natural precedent established in 1865 and 1885, fixed May 1 as the date of the enumeration of the inhabitants, legal voters, to be conducted by the Bureau of Statistics of Labor, the results to be returned by this Bureau into the office of the Secretary on or before the first day of December. Still again, preceding the Census of 1905, Chapter 423 of 1904 superseded the Act of 1894, but continued the dates fixed in that act for the enumeration of persons and voters, and for the return of the results into the office of the Secretary, and, as usual, the Act of 1904 prescribes the details not only for the census to be taken in the census year immediately following, but for the census to be taken "in every tenth year thereafter." It therefore would govern the census to be taken in 1915 unless, as is proposed, superseded by other legislation.

It seems to me that a fair interpretation of the second clause of Amendments XXI and XXII leaves the Legislature free to fix the exact dates of the enumeration and of the return, and it seems clear that this view was taken by the Legislature in 1865 and has been followed in the subsequent enabling acts.

An opinion contrary to this, namely, that the date of enumeration must be of May 1, must assume that this is implied because fixed in the first clause of the amendments as to the special census of 1857. If the date is thus fixed as to the enumeration it is equally fixed as to the return of the enumeration, and if so the Legislature erred in 1865 and in each subsequent act. The Supreme Court in its opinion on a certain question propounded by the Legislature in 1893, wherein it said, "In the year 1895 a census must be taken on the first day of May, which is to be returned into the office of the Secretary of the Commonwealth on or before the last day of June," must have overlooked the action of the Legislature in Chapter 69 of 1865, fixing the date of return in August, and in Chapter 181 of 1884, which, not having been repealed, would have governed the Census of 1895, the date of return having been extended to December 1. I think it probable that had these statutory variations from what they supposed to be the provisions governing the decennial census attracted their attention, they would have changed the form of their statement, or if they thought the Legislature in error would have said so. No doubt this phase of the census not having been brought to their attention, they concentrated their research on the particular thing concerning which their opinion was asked.

What view the court might now take on the direct question as to whether or not the dates are definitely fixed in the Constitution as to the decennial census, by implication from the dates fixed as to the special census of voters in 1857, no one can say. The conditions having changed with respect to the quali-

fications of a legal voter so that April 1 now occupies the position formerly occupied by May 1, if the Legislature, following the precedent established in 1865 *et seq.* in regard to the date of return, should change the date of enumeration to April 1, I do not know whether this detail would in any respect invalidate the census as a basis of reapportionment of senators and representatives, no other question being raised as to the validity of the enumeration and its results; nor do I suppose any one can know until this question is answered by the court. The question of the constitutionality of the change of date, as heretofore made by the Legislature, has never been raised.

It is, of course, too late to obtain an amendment of the Constitution, should it be thought necessary. It is not too late to obtain the opinion of the court on the direct question involved, and if the opinion should be that the Legislature cannot change the date of enumeration to April 1, although that date is obviously the better one in view of the present statutory provisions as to legal voters, nevertheless, the census could in 1915 obtain and return the facts as they exist on May 1.

For your own satisfaction you may think it proper to suggest the advisability of asking the court's opinion.

Yours very truly,

HORACE G. WADLIN.

To this letter reply was made as follows: —

BUREAU OF STATISTICS, March 10, 1914.

Mr. HORACE G. WADLIN, *Librarian, Boston Public Library, Boston, Mass.*

DEAR MR. WADLIN: — I fear I owe you an apology for not acknowledging before now your communication of February 12 with regard to the census day, etc., which came duly to hand but which I laid aside temporarily until I could give it a careful reading. This I have now done and wish to thank you for the pains to which you have been in going into the matter so thoroughly and stating the case so clearly.

I am just putting the finishing touches to the draft of the census bill for 1915 and the brief report relating to the subject which is to accompany it and which I hope to file in a few days. After giving the matter consideration, I am disposed to follow my first inclination and call attention to the proposed change in the census day and make an incidental reference to the Supreme Court decision in 1893, but without requesting that the Legislature obtain a new opinion from the court in regard to the matter. I am convinced personally that there is nothing substantial to the point, and therefore do not desire to say or do anything which would tend to magnify it, feeling that I shall be doing my entire duty and be sufficiently on record by merely referring to it.

It may be that I shall want to take advantage of the carefully prepared opinion in your letter in some form at a future time; at any rate, it will be a very valuable memorandum for the files of the Bureau.

Again thanking you, believe me,

Very truly yours,

CHARLES F. GETTEMY,
Director.

By the provisions of Section 7, Chapter 371, Acts of 1909, the Director of the Bureau of Statistics is required to submit to the General Court in the year 1914 and every tenth year thereafter a "preliminary report embodying an estimate of the cost of taking, compiling, and publishing the

next succeeding decennial census and such other information and recommendations" in relation thereto as may be necessary. In response to these requirements the Director of the Bureau submitted to the General Court of 1914, under date of March 16, a report (printed as House Document No. 2318) including the draft of a bill for carrying out the provisions of the Constitution and the general law. A portion of this report related to a proposed amendment of the then existing provision of law relative to the changing of ward lines in cities, and this was referred to the Committee on Election Laws, and resulted in the passage of an act in accordance with the recommendation made. That portion of the report which related specifically to the taking of the census, together with the bill providing for the same, was referred to the Joint Committee on Ways and Means. Particular attention was called in the report (page 5) to the proposed change in the census day to April 1, as provided for in the draft of the bill submitted, in order that the Legislature might be fully advised thereof, and reference was made in this connection to an opinion given to the Legislature in 1893 upon another matter by the Supreme Court in which the justices made reference to the census day. This portion of the report was as follows: —

> It will be noted that April 1 has been fixed as the census day instead of May 1, which has been the date in all former State census acts. While it may be observed in this connection that in an opinion given to the Legislature in 1893 upon another matter, the Supreme Court incidentally asserted that "in the year 1895 a census must be taken on the first day of May which is to be returned into the office of the Secretary of the Commonwealth on or before the last day of June," the Legislature in the census act passed the following year provided that the returns of the Census of 1895 should be made not later than December 1, and the 1905 census act contained a similar provision. Indeed, the wording of the two Articles of Amendments to the Constitution which form the warrant for taking the decennial census of population and legal voters seems to justify the opinion always held by this department and by the Legislature that the fixing of the first day of May as the census day and the last day of June as the last date on which the returns of the census must be made into the office of the Secretary of the Commonwealth related only to the special census of legal voters which it was provided should be made in the year 1857, and that, so far as these two dates for the Census of 1865 and every tenth year thereafter were concerned, they were left to be determined by the Legislature; and the Legislature has, in fact, determined these dates as it chose at each decennial period. April 1 is now the logical date for the same reason that formerly applied to May 1, this being the date for the assessment of taxes, and, in Boston, for the listing of voters; and besides the natural argument in favor of uniformity, there is the additional very practical reason for identity in these dates, — that the assessors' lists are found extremely helpful in checking up the work of the enumerators, their value for this purpose being obviously to some extent vitiated if the assessment and census dates do not correspond.

On May 22, the Joint Committee on Ways and Means reported the bill (House Document No. 2646) in the House without changing the census day or making other substantial alterations in the original draft, and it was ordered to a third reading on May 25, being passed to be engrossed

on June 2. In the meantime, on June 1, an order was offered by Representative William M. McMorrow to obtain the opinion of the Supreme Court on the question as to whether the pending bill, providing for the taking of the census as of the first day of April, 1915, would be legal and constitutional if enacted; and pending action on this order Mr. McMorrow made a motion on June 3 to reconsider the vote whereby the House had passed the bill to be engrossed. The text of this order as offered was as follows:[1] —

> *Ordered*, That the opinion of the justices of the Supreme Judicial Court be required by the House of Representatives on the following important question of law: Would the provisions of House Bill No. 2646, now pending, entitled "An Act to provide for taking the decennial census," which provides for the taking of a census as of the first day of April, 1915, be legal and constitutional if enacted?

On June 4, the Committee on Rules, having given a hearing on the subject, unanimously reported in the House recommending that the order be not adopted, whereupon the order was, on motion of Representative Channing Cox of Boston, rejected.[2] On June 9, on motion of Mr. McMorrow, his motion for a reconsideration of the vote whereby the bill was passed to be engrossed was discharged from the orders of the day under a suspension of the rules, and the motion was withdrawn.[3] The bill was then sent to the Senate, where it was ordered to a third reading on June 10 and passed to be engrossed on June 11; it was enacted in the House on June 12, enacted in the Senate on June 15, and approved by the Governor on June 20; and on July 15, the schedules devised by the Director of the Bureau of Statistics for the taking of the census of population and legal voters were approved, as provided by the act, by the Governor and Council.

Preparations accordingly went forward for the Census of 1915 on the assumption that the day for the enumeration had been decisively fixed for April 1, the enumerators' instruction book and the explanatory literature being written on this basis and the mechanical procedure of the Census Office being timed accordingly. But as the day of enumeration approached, a feeling of apprehension began to be apparent in the Legislature, voiced particularly by Representative J. Weston Allen of Newton, as to the complications which might ensue if, after taking the census as of April 1, it should transpire that the Legislature had no right, under the Constitution, to fix a date other than May 1, for should the Supreme Court rule to that effect, the Legislature could not make a constitutional apportionment in 1916, and there were those who even expressed a fear that without a reapportionment and division of the State into legislative districts in 1916, as required by the Constitution, it might not be possible to elect, constitutionally, a Legislature in that or the following years of the decade. So distinguished a lawyer as the Hon. John D. Long, a former governor of the Commonwealth, was quoted as of the opinion that the articles of amendment adopted in 1857 required the census to be taken as of May 1, not only in that year but in 1865 and each decennial year thereafter. It was, therefore, wisely determined to have the question passed upon by the

[1] House Journal, 1914, p. 1800. [2] *Ibid.*, p. 1840. [3] *Ibid.*, p. 1888.

Supreme Court, so that it might be settled beyond all question, notwithstanding it was not until March 24, 1915, or only a week before the date of enumeration fixed in the census act that the opinion of the Justices was asked in an order of the House, as follows: —

THE COMMONWEALTH OF MASSACHUSETTS,
HOUSE OF REPRESENTATIVES, March 24, 1915.

Ordered, That the opinion of the justices of the Supreme Judicial Court be required by the House of Representatives on the following questions of law: —

1. If a census of the inhabitants of each city and town of the Commonwealth, and a special enumeration of the legal voters thereof, shall be taken by the Bureau of Statistics as of the first day of April in the year nineteen hundred and fifteen, as provided by section one of chapter six hundred and ninety-two of the acts of the year nineteen hundred and fourteen, will such census be in conformity with the requirements of Articles XXI and XXII of the Amendments of the Constitution, which provides that "a census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the Secretary of the Commonwealth, on or before the last day of June in the year one thousand eight hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter?"

2. Will an apportionment by the Legislature of the members of the House of Representatives to the several counties and a division of the Commonwealth into senatorial districts based upon an enumeration of legal voters made under the provisions of said chapter six hundred and ninety-two, if otherwise in conformity with the requirements of said Articles XXI and XXII of the Constitution, be rendered illegal because the enumeration of legal voters is made as of the first day of April in the current year?

3. Will a census of the inhabitants of each city and town of the Commonwealth, and a special enumeration of the legal voters thereof, taken in conformity with the provisions of said chapter six hundred and ninety-two, as amended by the accompanying bill, now pending in the House of Representatives, conform with the requirements of said Articles XXI and XXII of the Constitution, so that the same may be made the basis for an apportionment by the Legislature of the members of the House of Representatives to the several counties of the Commonwealth and of a division of the Commonwealth into senatorial districts?

4. These questions of law are important and the opinion of the justices is required in order to determine whether remedial legislation is necessary to provide for the taking of the decennial census of the current year.

JAMES W. KIMBALL,
Clerk.

The reply of the justices was received in the House on April 1. It substantiated the position taken by the Director of the Bureau, the justices ruling, in effect, that the constitutional provision relative to taking a census as of May 1 applied only to the census of legal voters which it was provided in the amendment should be taken as of May 1, 1857, but that the Legislature had power to fix the census day for subsequent censuses. This opinion, printed as No. 1996 of the House Documents for 1915, is inserted here: —

To the Honorable the House of Representatives of the Commonwealth of Massachusetts.

The order adopted on the twenty-fourth day of March, 1915, a copy of which is hereto annexed, has been received and the following opinion is submitted.

The question presented is whether Articles XXI and XXII of the Amendments to the Constitution require the state decennial census to be taken as of the first day of May, or whether the exact time within the designated year may be fixed by the General Court. The decisive words of Article XXI are these: "A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June, in the year one thousand eight hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter." Precisely the same words occur in Article XXII of the Amendments.

The natural and ordinary meaning of these words is that the date as of which the enumeration shall be made and when it shall be returned into the office of the Secretary of the Commonwealth is defined for the year 1857; but it is not stated for the year 1865 or any subsequent period. No later provision of either article of amendment discloses a different purpose. The apportionment of the representatives to the several counties required by Article XXI must be made by the Legislature "at its first session after the return of each enumeration as aforesaid." The boards of public officers authorized to divide the counties into districts are required to assemble "on the first Tuesday of August next after each assignment of representatives to each county" for the performance of their duties. By Article XXII, "The general court shall, at its first session after each next preceding special enumeration, divide the commonwealth into forty districts" for the election of senators. These requirements do not point to any particular or unvarying date for taking the census. Articles XXI and XXII, which were adopted in 1857, supplanted respectively Articles XII and XIII of the Amendments. Those articles by unmistakable language made necessary the taking of each successive decennial census in the month of May. The words of Article XII as to the time when the census should be taken were these: "A census of the ratable polls, in each city, town and district of the commonwealth, on the first day of May, shall be taken and returned into the secretary's office, in such manner as the legislature shall provide, within the month of May, in the year of our Lord one thousand eight hundred and thirty-seven, and in every tenth year thereafter, in the month of May." The words of Article XIII are equally unequivocal in designating the month of May, and are these: "A census of the inhabitants of each city and town, on the first day of May, shall be taken, and returned into the secretary's office, on or before the last day of June of the year one thousand eight hundred and forty, and of every tenth year thereafter." The refusal to follow this plain provision of the earlier amendments in adopting the amendments now in force, and the use of words naturally conveying a different meaning, indicates that the people intended to make a change in this respect. The convention of 1853 included among its constitutional propositions one beginning with these words: "A census of the inhabitants of each city and town in the commonwealth, on the first day of May in the year one thousand eight hundred and fifty-five, and on the first day of May of each tenth year thereafter, shall be taken and returned into the secretary's office, on or before the last day of June following the said first day of May in each of said years." Although this with the other propositions of that convention was rejected by the people in November, 1853, its provisions doubtless were familiar to the public men who composed the Legislature of 1856, by which Articles XXI and XXII of the Amendments were first adopted.

If it had been the purpose of the framers of Articles XXI and XXII of the Amendments that each census should be taken during the month of May, it would have been easy to express that purpose in simple and direct phrase so clear that it could not be misunderstood. Three models of apt words in suitable form to convey that meaning were at hand in the existing Articles XII and XIII and the proposition of the convention of 1853. The adoption of words of a contrary import cannot be treated as accidental, but must be construed as manifesting a settled design to alter the provisions of the earlier amendments on this point as to each census following that of 1857. This is in conformity with the true theory of a constitution which is to establish only broad principles and to leave details to be wrought out by the Legislature according to the varying demands of policy and expediency.

It follows that under the constitutional provisions now in force the General Court may fix the first day of April as the date as of which the state census must be taken in any tenth year following 1865.

The first of May was assumed to be the date of the census in *Opinions of the Justices*, 142 Mass. 601, 604, 605, and 157 Mass. 595, 598. But that question was not there presented for determination and was not discussed. Doubtless no date other than May 1 was thought of then or at any time until after the passage of St. 1914, c. 198, fixing the first of April in place of the first of May as the date as of which taxes must be assessed. The references in those opinions to the first of May are not authorities against the conclusion now reached.

Accordingly the first question is answered Yes and the second No.

Perhaps the third question becomes immaterial in view of the foregoing answers. But plainly it is within the constitutional power of the Legislature to order the census to be taken on the first day of May in the current year and thus change St. 1914, c. 692, requiring it to be taken as of April 1.

Part IV.

THE DETERMINATION AND APPORTIONMENT OF MEMBERSHIP OF THE HOUSE OF REPRESENTATIVES, THE SENATE, AND THE COUNCIL.

I. THE HOUSE OF REPRESENTATIVES.

Since the formation of the state government under the Constitution of 1780 there have been three different methods of determining the membership of the House of Representatives, namely, in accordance with —

(1) the number of *Ratable Polls* (1780 to 1840).
(2) the number of *Inhabitants* (1840 to 1857).
(3) the number of *Legal Voters* (1857–).

(1) Ratable Polls.

The number of ratable polls[1] in the several corporate towns of the Commonwealth was the basis of representation in the House under the provisions of Chapter 1, Section III, Article II of Part the Second of the Constitution, which read as follows: —

> Art. II. And in order to provide for a representation of the citizens of this commonwealth, founded upon the principle of equality, every corporate town containing one hundred and fifty ratable polls may elect one representative; every corporate town containing three hundred and seventy-five ratable polls may elect two representatives; every corporate town containing six hundred ratable polls may elect three representatives; and proceeding in that manner, making two hundred and twenty-five ratable polls the mean increasing number for every additional representative.
>
> Provided, nevertheless, that each town now incorporated, not having one hundred and fifty ratable polls, may elect one representative; but no place shall hereafter be incorporated with the privilege of electing a representative, unless there are within the same one hundred and fifty ratable polls.
>
> And the house of representatives shall have power from time to time to impose fines upon such towns as shall neglect to choose and return members to the same, agreeably to this constitution.
>
> The expense of travelling to the general assembly, and returning home, once in every session, and no more, shall be paid by the government, out of the public treasury, to every member who shall attend as seasonably as he can, in the judgment of the house, and does not depart without leave.

The system thus prescribed had numerous defects. It will be noted that instead of determining by the terms of this article what the total membership of the House should be, and leaving the Legislature to provide for such number of units as might be entitled to representation from time to time, the latter was fixed by the Constitution, and in such a manner that the actual number of members was bound to fluctuate. Thus the membership

[1] An interesting question arose in 1811 as to whether aliens were ratable polls within the meaning of the Constitution, the Supreme Court deciding, in response to an inquiry of the House of Representatives, that they were to be so regarded by towns in determining their representation in the Legislature. — House Journal, 1811, pp. 278, 324; 7 Mass. 523.

of the first House to assemble after the adoption of the Constitution was 296; in the following year, 1781, it was 179; in 1782 it dropped to 131, its lowest number; in 1812 it reached its highest number, 748; in 1818 it was 223, and in 1819 it was 402. These irregular fluctuations were evidently due to two causes, — the annual increases and decreases in the number of ratable polls in the several towns of the Commonwealth, and the indifference of numerous towns to representation, due partly, no doubt, to the fact that the cost of sending a representative to the General Court, whose compensation was borne by assessment on the town, was felt in many instances to be a no inconsiderable financial burden, the saving of which probably would not be offset by the fine which the Legislature might impose under the Constitution for non-representation.[1]

Amendment Proposed by the Convention of 1820.

There was a great deal of discussion in the Constitutional Convention of 1820 over propositions to amend the provisions of the original Constitution relative to the manner in which the Senate and House of Representatives should be composed, an earnest effort being made to change the basis of representation, with a view, apparently, to making the same essentially more democratic and at the same time establishing for the House a more stable membership. A resolution submitting a draft for a proposed amendment, designated as Article V, was reported by the committee having the matter in charge, which, with respect to representation in the House, provided that it should be based upon the number of *inhabitants*, instead of ratable polls, in the following manner: —

> The members of the House of Representatives shall be elected in the following manner: Every corporate town containing 1,200 inhabitants may elect one representative; and 2,400 inhabitants shall be the mean increasing number which shall entitle a town to an additional representative.
>
> In every case where any town is now united to any other town or to a district for the purpose of electing a representative, such towns and districts so united

[1] See opinion of the justices of the Supreme Judicial Court in response to an inquiry of the House of Representatives June 13, 1815: ". . . it is obvious that to send a representative is a corporate duty as well as a corporate right, for the neglect of which *the House may* impose a fine, but which neglect they are under no obligation by the constitution to punish. If the House may excuse the delinquency, we think it clear that a town may constitutionally vote not to send, and so incur the risk of a fine, or trust to the clemency of the House, and that in such case the minority cannot impose a burthen upon the town, which the House of Representatives may excuse them from bearing."

The Legislature appears to have been more or less liberal with the offending towns in this matter, since the early acts and resolves contain many special exemptions granted upon petition of impecunious communities. For example, in 1785, upon petition of John Goddard, "*in behalf of the town of Brookline, praying for abatement of a fine laid on said town, for not sending a Representative to the General Court, for the year 1782; for reasons set forth in said petition*, it was —

"*Resolved*, That the prayer of the petition be so far granted, that the sum of seventeen pounds twelve shillings and six pence, which is one half of said fine set against said town of *Brookline*, in the Tax Act of *March*, 1783, be abated, and the Treasurer of this Commonwealth is hereby directed to credit the town of Brookline, on the aforesaid tax, seventeen pounds twelve shillings and six pence, any act or resolve to the contrary notwithstanding." (Chapter 24, Resolves of 1785.)

The condition of the public finances at this early period — *i.e.*, before the establishment of the Union under the federal constitution and when the Confederation was the only governmental bond between the states — is further reflected by the following resolve "directing the treasurer to borrow money to pay the members of the general court the present session": —

Whereas it may happen, that at the ensuing adjournment of this Court, a sum of money sufficient to pay the members may not be in the treasury: Therefore,

Resolved, That the Treasurer be, and he is hereby empowered and directed to borrow a sum of money sufficient to pay the members of the General Court for their services during the present session; *provided* there is not a sum adequate to the above purpose now in the treasury. (Chapter 131, Resolves of 1784.)

are and shall be respectively considered as one town in all things respecting the election of representative, as provided for in this article.

Every corporate town containing less than 1,200 inhabitants shall be entitled to elect one representative every other year only, excepting the years in which the valuation of estates within the Commonwealth shall be settled, when each of said towns shall be entitled to send a representative; but the Legislature of that year shall never appoint the year in which the next valuation shall be taken or settled.

The division into representative districts by this method was to be made by the Legislature at its first session "after the census which is now taking under the authority of the United States shall be completed, and after every subsequent census which shall be taken as aforesaid, or under the authority of this Commonwealth." The manner in which the representatives were to be distributed among the different towns was further provided for with some care, the purpose evidently being, while not to arbitrarily fix an inelastic membership in point of size for the House of Representatives, to limit it approximately to a maximum of 275. The Legislature was to —

divide the towns in each county where there are more than one, which according to the provisions of this article shall not be entitled to send a representative every year, into two equal classes; the first of which shall comprise half the towns in number, and those which contain the greatest population, and each town in this class may elect a representative the first year after they are so classed.

The second class shall consist of the other corporate towns in the county not entitled to send a representative every year, each of which may elect a representative the second year after they are classed, and if there be an uneven number of such towns in any county, the largest number shall be placed in the second class, and the towns so classed may each thereafter continue to elect one representative every other year, excepting as aforesaid. Provided, that the Legislature may place in different classes any two adjoining towns which may happen to be in the same class, upon their application for that purpose. And each of said classed towns shall be entitled to elect a representative every year, when such towns shall have the number of inhabitants which shall entitle other towns to elect one representative according to the provisions of this article.

And if any two towns herein directed to be classed shall wish to be united and elect a representative together every year, instead of electing one separately every other year, the Legislature, upon their application for that purpose, shall so unite them, and prescribe the time and place of holding their meetings for the election of their representatives, and the manner in which their choice shall be certified by the selectmen of both or either of said towns; and such towns shall continue so united until the inhabitants of one of them shall have increased to such a number as shall entitle it separately to send a representative; or until one of said towns, by a vote of a major part of the legal voters therein, shall apply to the Legislature to separate them, whereupon it shall be their duty so to do, and to class them in the same manner as they then would and ought to be classed if they had never been united.

And to prevent the House of Representatives becoming too numerous, the number of inhabitants which shall entitle a town to elect one representative, and the mean increasing number which shall entitle it to elect more than one, shall be proportionally increased in the year of our Lord one thousand eight hundred

and thirty-one and every tenth year afterwards, so that the House of Representatives shall never consist of more than two hundred and seventy-five members, excepting in those years in which the valuation is settled. And if any town which contains 1,200 inhabitants and upwards shall, in the year of our Lord one thousand eight hundred and thirty-two, or in any tenth year afterwards, be found not to contain the number of inhabitants which, according to the provision aforesaid, shall be requisite to entitle it to send a representative every year, such town shall be classed by the Legislature, and shall thereafter be entitled to send a representative every other year only, until it shall have a competent number to entitle it to send a representative every year; and no town which shall be entitled to send a representative every other year, shall ever be deprived of that privilege.

Every town which shall hereafter be incorporated, shall be entitled to send one representative, when it shall contain twenty-four hundred inhabitants, and not before.

This amendment, as proposed, also contained a provision that the members of the House should be paid out of the Treasury of the Commonwealth for their attendance on the General Court during the session thereof, thereby relieving the towns of the cost of maintaining their members and leaving them without this excuse for non-representation.

Considerable debate was provoked by this proposition when it was brought into the convention by the committee. The member from the town of Bolton (Nathaniel Longley) moved a substitute providing that ratable polls should be continued as the basis, observing that "the phraseology of his resolution, except in the numbers, was copied from the present constitution. He thought the ratio in the report was too high; between 20 and 30 towns in the County of Worcester would be deprived of a representation, except every other year — taking the Census of 1810 for the guide. The number in the House would be kept down by removing the fine from the small towns; which would probably not send a representative oftener than every other year. He could see no other way of saving the rights of the small towns."[1]

The member from Groton (Luther Lawrence), speaking in behalf of the committee in favor of changing the basis from ratable polls to population, said: "The amendment proposed [by the member from Bolton] that polls should be adopted as the basis of representation instead of population. He presumed this basis never would have been adopted if there had been at the time of the framing of the constitution any provision for the periodical enumeration of the inhabitants. Polls did not before that time form the basis of representation. By the laws of 1692 and 1776, the number of freeholders was the basis. There was at the time of the formation of the constitution no mode of ascertaining the number of inhabitants; but there was of rateable polls. It would be found that from particular causes, the number of rateable polls was not proportioned to the number of inhabitants. In the county of Suffolk, for instance, there were two thousand more rateable polls than in Berkshire, though in the latter county the population was greatest. The Legislature also may alter the number of rateable polls, but cannot the number of inhabitants. They may provide

[1] Journal of Debates and Proceedings, Convention of 1820, p. 119.

by law for taxing all polls over 10 years of age, or that only those over 21 or 50, should be taxed. The determining the number of polls is left to the towns, and is liable to fraud."[1]

Mr. Lawrence's view that the framers of the original Constitution of 1780 had adopted ratable polls as the basis of representation in the House merely because it was the most convenient method at hand rather than because it was deemed to possess of itself any particular virtue, is interesting; and his further comment that, since the number of polls was left to the towns to be determined, it was therefore liable to fraud, is likewise worthy of note. These remarks in favor of population as the basis apparently made an impression on the convention, for when he concluded the question was taken on Mr. Longley's amendment and decided in the negative. After some further debate respecting the meaning of the proposed amendment as reported by the committee, the vote was taken on its adoption and decided in the affirmative, 225 to 89.

The Convention of 1820 submitted altogether fourteen articles of amendment to the people, nine of which were approved; and that under consideration here relating to the membership of the House, Senate, and Council, and the basis upon which their members were to be chosen, was among the five rejected articles, the people at the election held on April 9, 1821, recording their disapproval of this article by a vote of 20,729 nays and 9,904 yeas, an adverse majority of 10,825. This result may not have been due to any particular aversion to a change in the basis of representation in the House from ratable polls to inhabitants, so much as to hostility to other details involved in the proposed new scheme of representation; so the people, if not altogether satisfied with the existing arrangement, appeared to prefer its continuance under the circumstances. In this particular, therefore, the endeavors of the Convention of 1820 came to naught, and the conditions which had hitherto prevailed continued, except that, with respect to the size of the membership of the House, they seem to have been aggravated, for while the average membership for the years 1780–1820, inclusive, was 322, it was 415 for the period 1821–1837.

Article XII of the Amendments.

In 1835 another attempt at reform was made and Article XII of the Amendments was brought forward, being adopted by the Legislature of that year and of 1836, and approved and ratified by the people November 14, 1836. This amendment provided, in part, as follows: —

> In order to provide for a representation of the citizens of this commonwealth, founded upon the principles of equality, a census of the ratable polls, in each city, town, or district of the commonwealth, on the first day of May, shall be taken and returned into the secretary's office, in such manner as the legislature shall provide, within the month of May, in the year of our Lord one thousand eight hundred and thirty-seven, and in every tenth year thereafter, in the month of May, in the manner aforesaid; and each town or city having three hundred ratable polls at the last preceding decennial census of polls, may elect one representative, and for every four hundred and fifty ratable polls in addition to the first three hundred, one representative more.

[1] Journal of Debates and Proceedings, Convention of 1820, p. 120.

Any town having less than three hundred ratable polls shall be represented thus: The whole number of ratable polls, at the last preceding decennial census of polls, shall be multiplied by ten, and the product divided by three hundred; and such town may elect one representative as many years within ten years, as three hundred is contained in the product aforesaid.

Any city or town having ratable polls enough to elect one or more representatives, with any number of polls beyond the necessary number, may be represented, as to that surplus number, by multiplying such surplus number by ten and dividing the product by four hundred and fifty; and such city or town may elect one additional representative as many years within ten years, as four hundred and fifty is contained in the product aforesaid.

Any two or more of the several towns and districts may, by consent of a majority of the legal voters present at a legal meeting, in each of said towns and districts, respectively, called for that purpose, and held previous to the first day of July, in the year in which the decennial census of polls shall be taken, form themselves into a representative district to continue until the next decennial census of polls, for the election of a representative, or representatives; and such district shall have all the rights, in regard to representation, which would belong to a town containing the same number of ratable polls.

It will be observed that this amendment made no change in the unit of representation, ratable polls being continued, but the number of such persons was to be determined by means of what was for the first time styled a *census*, which was to be taken as of the first day of May, 1837, and in every tenth year thereafter, and the number thus ascertained was to be used as a basis for determining representation in the House for a period of ten years, when there was to be another adjustment, — the amendment providing for a census for this purpose every ten years, and the Governor and Council being charged with the duty of ascertaining the number of representatives to which each city and town should be entitled. The new method of apportionment provided by the Twelfth Amendment differed from the old, therefore, in detail rather than in principle, but being based upon a definite rule fixed in advance, it was doubtless hoped it would regulate, somewhat more systematically than had hitherto been possible, the fluctuations in the membership of the House and promote a reduction of the maximum number, which had apparently come to be recognized as too large and cumbersome; but even were it to accomplish this purpose, which its first trial demonstrated it would not do, it was most defective in that it would obviously cause a great augmentation in the size of the House all at once after each census.

A census of ratable polls was accordingly taken as of May 1, 1837, under the provisions of an enabling act which had been passed on April 12 of that year,[1] a total for the Commonwealth of 193,003 ratable polls being thus enumerated. *This, then, was the first census taken under constitutional provision*,[2] and pursuant to the requirements of the amendment, the Governor and Council, at its meeting on July 7, 1837, proceeded to deter-

[1] Chapter 128, Acts of 1837.

[2] At the same time, *i.e.*, as of May 1, 1837, the first state census of *population* under statutory authority was taken as provided for by an act (Chapter 85) approved March 21, 1837, for the purpose of arriving at a basis for depositing proportionately with the towns of the Commonwealth the state's share of the United States treasury surplus distributed among the several states of the United States under the act of Congress approved June 23, 1836. By another act (Chapter 199) approved April 19, 1837, the Legislature provided for the first industrial census of the Commonwealth, taken between May 1 and October 1 of that year.

mine the representation to which each city and town was entitled in the House of Representatives.

By the apportionment plan adopted by the Council in accordance with the scheme provided by the amendment, out of the whole number of 304 cities and towns in the Commonwealth at that time, 41 were allotted a definite number of representatives, which was to remain constant until the next census, ten years hence; 171 municipalities were each allotted a given number for the entire decennial period, and, *in addition,* one representative for from one to nine years of the period, as the case might be; and 92 were allotted a representative for from one to nine years of the period, being unrepresented during the remainder. Not all of the additional members were, however, chosen to serve at any one time, and since the first House to be chosen under the new arrangement, that of 1838, consisted of but 480 members, while that of 1839 had 522, it is apparent that many of the towns which were entitled to choose an additional representative for one or more years during the decade did not take advantage of this privilege during the first year.

The results were, therefore, disappointing, since the large increase in the membership of the House during the second year of the operation of the plan made it quite apparent that it would fail to accomplish, to any appreciable extent, the desired object of effecting a material decrease in the membership of the House. It was therefore allowed to remain in force for only a year, when the public men of the time undertook another adjustment. This took the form of what became Article XIII of the Amendments.

(2) Inhabitants.

Article XIII of the Amendments.

By the Thirteenth Amendment, brought forward and adopted by the Legislatures of 1839 and 1840 and approved and ratified by the people April 6, 1840, a radical change in the character of the unit selected as the basis of representation was made, *inhabitants* being substituted for *ratable polls.* The people had rejected this proposition overwhelmingly when recommended by the Convention of 1820 (yeas, 9,904; nays, 20,729); they now reversed this decision by a vote of 24,884 yeas to 4,912 nays. But the framers of this amendment were not yet disposed to adopt the principle of a definite number of members for the House which should be permanent, — such as had been recognized from the beginning as respected the Senate, regardless of the increase in the aggregate number of electoral units, — it being apparently felt that to do this would impair the maintenance of the theory of "a representation of the citizens founded upon the principles of equality," and that the proper remedy for the growing inconvenience of a cumbersome membership was to effect a decrease in the total number, or at least to retard the rate of increase by the method of increasing the basis of apportionment rather than by fixing definitely the size of the body. The members of the House were, in the terms of the amendment, to be apportioned in the following manner: —

> Every town or city containing 1,200 inhabitants may elect one representative; and 2,400 inhabitants shall be the mean increasing number, which shall entitle it to an additional representative.

> Every town containing less than 1,200 inhabitants shall be entitled to elect a representative as many times within 10 years as the number 160 is contained in the number of the inhabitants of said town. Such towns may also elect one representative for the year in which the valuation of estates within the commonwealth shall be settled.
>
> Any two or more of the several towns may, by consent of a majority of the legal voters present at a legal meeting, in each of said towns, respectively, called for that purpose, and held before the first day of August, in the year 1840, and every tenth year thereafter, form themselves into a representative district, to continue for the term of 10 years; and such district shall have all the rights, in regard to representation, which would belong to a town containing the same number of inhabitants.
>
> The number of inhabitants which shall entitle a town to elect one representative, and the mean increasing number which shall entitle a town or city to elect more than one, and also the number by which the population of towns not entitled to a representative every year is to be divided, shall be increased, respectively, by one-tenth of the numbers above mentioned, whenever the population of the commonwealth shall have increased to 770,000, and for every additional increase of 70,000 inhabitants, the same addition of one-tenth shall be made, respectively, to the said numbers above mentioned.

The number of inhabitants to be used as the unit of representation was to be determined by means of a census, the provision being as follows:[1] —

> A census of the inhabitants of each city and town, on the first day of May, shall be taken, and returned into the secretary's office, on or before the last day of June, of the year 1840, and of every tenth year thereafter; which census shall determine the apportionment of senators and representatives for the term of ten years.

The Legislature accordingly passed the necessary enabling act for the taking of the required census, the act being drawn in such general terms as to permit the census to be taken at each recurring decennial period without further legislation.

The Thirteenth Amendment provided that the Governor and Council should, before the first day of September, "apportion the number of representatives which each city, town and representative district is entitled to elect, and ascertain how many years, within ten years, any town may elect a representative which is not entitled to elect one every year." To this task the Council dutifully applied itself,[2] and we read in the records of the meeting of that body for July 23, 1840, that the committee appointed to assign the number of senators to be chosen in each district according to the number of inhabitants therein, also to apportion the number of representatives which each city, town, and representative district is entitled to elect, and ascertain how many years out of ten years any town may elect a representative which is not entitled to elect one every year, reported "that the census of inhabitants of each city and

[1] Chapter 68, Acts of 1840.

[2] Commenting upon this complicated scheme, the Hon. Alfred S. Row, in an address to the Senate and House on the occasion of the dedication of the new House chamber on January 2, 1895 (pp. 20–23), satirically remarked: "As all the members of the Governor's Council during these years had not had the benefit of full college courses in mathematics, the wonder constantly grows that at each recurring ten years there was not a marked addition to the inmates in the various state lunatic asylums."

town on the first day of May recently taken and returned into the Secretary's office shows the whole number of inhabitants to be 718,592." The report then continues: —

> And we have apportioned the number of representatives which each city, town, and representative district is entitled to elect, and also how many years within ten years any town may elect a representative, which is not entitled to one every year, as fully set forth in the schedules hereto annexed, and to be taken as part of this report.
>
> In addition to the statements contained in said Schedule it may be proper to remark that, by the terms of said Amendment, every town in the Commonwealth, not entitled to send one representative every year in ten years, is nevertheless authorized to send one Representative every valuation year, so that every such town may be then represented by one representative, even if it should otherwise have exhausted its right of representation. But of course, no such town can have more than one Representative, in a valuation year, or in any other year. And we recommend that His Excellency be advised to issue his proclamation in conformity to this Report.
>
> Per order of the Committee
>
> COUNCIL CHAMBER JOHN R. ADAM.
> July 23d, 1840.
>
> Report accepted and the Governor is advised to issue his Proclamation accordingly.

Under the plan of the Thirteenth Amendment not all of the additional members were chosen to serve at any one time, but it would appear that most of the towns entitled to a representative during only a portion of the decennial period took advantage of this privilege at the first election to be held after the apportionment, for the session of 1841 contained 397 members, which was the maximum for the decade.

Since the apportionment made three years earlier on the basis of ratable polls in accordance with the Twelfth Amendment, the number of cities and towns in the Commonwealth had increased from 304 to 307, of which (according to the schedule apportioning the number of representatives to which each municipality was to be entitled on the basis of population as approved by the Council at its meeting of July 23, 1840) 208 were allotted a definite number of representatives, which was to remain constant until the next apportionment following the census to be taken in 1850, while the remaining municipalities were allotted one representative for from one to seven years of the period, as the case might be. The result was that the total base number of representatives was 309, while the total of the additional members was 99, so that were the latter all elected for any one year, the membership of the House in some one year might have been 408 (though possibly more in a valuation year), — a considerable reduction from the corresponding possible membership (638) under the plan for which it was substituted.

The membership of the House during the operation of the original apportionment provisions of the Constitution had fluctuated, but with a tendency to increase, during the fifty-eight year period, from 296 in 1780 to 635 in 1837, the smallest membership being 131 in 1782, and the largest in 1812, when it was 748, the average for the period being 349. The

Twelfth Article of Amendment, adopted May 1, 1837, was operative in its effect upon the membership of the House for three sessions, — those of 1838, when as we have seen the membership dropped to 480; of 1839, when it rose to 522; and of 1840, when it was 518. The first session to be affected by the operation of the Thirteenth Amendment, following the population census taken as of May 1, 1840, and in accordance with the schedule of apportionment made by the Council July 23, 1840, was that of 1841, when the membership dropped to 397. For the ten-year period which ensued before the next apportionment — made in 1850, following the census of that year — the average membership was 303.

In 1850, the second census under the Thirteenth Amendment and the provisions of the legislative act of 1840 was taken for the purpose of determining the apportionment for the decade 1850–1860. This census showed the number of inhabitants to be 973,654, and the Governor and Council proceeded to make the apportionment as recommended by the committee to which the matter was referred and whose report was as follows: —

> The Constitution provides, that under the Census of 1840 every town containing 1,200 inhabitants is entitled to one Representative; that the increasing ratio for towns containing more than that number is 2,400; and that every town containing less than 1,200 inhabitants shall be entitled to send a representative as many times in ten years as the number 160 is contained in the number of inhabitants in said town; but that in valuation years every such town shall be entitled to a Representative. It also provides that under the Census of 1850 these several ratios shall be increased by adding ten per ct. for each 70,000 increase over 700,000. The several ratios now stand as follows, viz., 1,560 for one representative, — 3,120 the mean increasing number; and 208 for towns containing less than 1,560 inhabitants. And the Committee have apportioned the Representation on these bases to the several towns and cities in the Commonwealth agreeable to the accompanying schedules, which form a part of this Report, by which it will be perceived that the whole number of Representatives, which may be elected in valuation years, when every town has a right to send one without reference to the number assigned to it for ten years, is 438.
>
> And the Committee recommend that His Excellency the Governor be advised to issue his proclamation in conformity.
>
> For the Committee
>
> B. F. Copeland.
>
> July 18th, 1850 — Report Accepted.

The House of 1851 contained 397 members, and that of 1852 contained 402 members; and although it dropped to 288 in 1853, the Constitutional Convention which met in that year evidently felt that the time was ripe for another readjustment.

Amendment Proposed by the Convention of 1853.

The Constitutional Convention of 1853 discussed at great length the perennial subject of the unit of representation and basis of apportionment, and finally decided, in drawing up the new frame of government for submission to the people, to retain inhabitants as the unit, but to change the number of inhabitants entitled to representation in the several cities and

towns, probably for the same reason that influenced the adoption of the Twelfth and Thirteenth Amendments, namely, to secure a more stable total membership; and it was further provided that the apportionment of the number of representatives to which each town and city should be entitled should be made at its first session next after each decennial state census by the Senate instead of by the Governor and Council. These provisions, embodied in Articles 1 and 2, Chapter 3 of the proposed new form of government, formed a part of Proposition No. 1, which, together with seven other propositions, the Convention voted to submit to the people for their approval. These articles were as follows: —

> Article 1. There shall be, in the Legislature of this Commonwealth, a representation of the people, annually elected, and founded upon the principle of equality.
>
> Article 2. And in order to provide for a representation of the citizens of this Commonwealth, founded upon the principle of equality, every corporate town, containing less than one thousand inhabitants, may elect one representative in the year when the valuation of estates shall be settled, and, in addition thereto, one representative five years in every ten years. Every town containing one thousand inhabitants and less than four thousand, may elect one representative. Every town containing four thousand inhabitants and less than eight thousand, may elect two representatives. Every town containing eight thousand inhabitants and less than twelve thousand, may elect three representatives. Every city or town containing twelve thousand inhabitants may elect four representatives. Every city or town containing over twelve thousand inhabitants, may elect one additional representative for every four thousand inhabitants it shall contain, over twelve thousand. Any two towns, each containing less than one thousand inhabitants, may, by consent of a majority of the *legal voters* present at a legal meeting, in each of said towns respectively, called for that purpose, form themselves into a representative district, to continue for the term of not less than two years; and such district shall have all the rights, in regard to representation which belong to a town having one thousand inhabitants. And this apportionment shall be based upon the census of the year one thousand eight hundred and fifty, until a new census shall be taken.

Had Proposition No. 1 been approved by the people another apportionment would have been made following a census taken in 1855, since Article 1, Chapter XIII of the proposed frame of government, provided as follows: —

> A census of the inhabitants of each city and town in the Commonwealth, on the first day of May in the year one thousand eight hundred and fifty-five, and on the first day of May of each tenth year thereafter, shall be taken and returned into the secretary's office, on or before the last day of June following the said first day of May in each of said years; and while the public charges of government, or any part thereof, shall be assessed on polls and estates, in the manner that has hitherto been practised, in order that such assessments may be made with equality, there shall be a valuation of estates within the Commonwealth taken anew once in every ten years at least, and as much oftener as the General Court shall order.

All of the eight propositions agreed to by the Convention were, however, defeated at the polls, the vote on No. 1 being yeas, 63,222; nays, 68,150; but three years later, in the Legislature of 1856, another suggestion for

determining the membership of the House was brought forward and embodied in what became Article XXI of the Amendments.

The Constitutional Convention of 1853, as we have seen, proposed some change in the method of apportionment while retaining inhabitants as the unit, but the debates in that body clearly reflected the effect of the recently augmented immigration, which was bringing in large numbers of aliens, and the feeling was apparently growing that to continue to base apportionments upon population or inhabitants, irrespective of citizenship, was not equitable or consistent with the theory of representative government which had generally been held up to that time. But although this consideration was not strong enough to influence a majority of the convention, it received an increasing amount of attention in the next two or three years and found expression in what became Article XXI of the Amendments.

(3) Legal Voters.

Article XXI of the Amendments.

The Twenty-first Article of Amendment, brought forward and adopted by the Legislatures of 1856 and 1857, was ratified and approved by the people on May 1, 1857, by a vote of 31,277 yeas and 6,282 nays. While it did not in terms exclude aliens in fixing a unit of representation, this amendment accomplished what was apparently desired by providing that the apportionment should be based upon the number of legal voters, — meaning those who were entitled to vote under the provisions of the Constitution, — which was to be determined by an enumeration of the legal voters of each city and town on the first day of May in the year 1857 and by subsequent special enumerations in the year 1865 and every tenth year thereafter, taken in conjunction with decennial censuses of population which were at the same time provided for. The House of Representatives was to consist for the first time of a definite fixed number of members, namely, 240, which were to be apportioned by the Legislature (at its first session after the return of each enumeration) to the several counties of the Commonwealth equally, as nearly as might be, according to their relative numbers of legal voters; the county commissioners of the several counties, or such board of special commissioners in each county as might be provided for the purpose by law, being charged with the duty of dividing their respective counties into representative districts of contiguous territory, so as to apportion the representation assigned to each county equally, as nearly as possible, according to the relative number of legal voters of the several districts. The full text of this amendment, the provisions of which are still operative, is as follows: —

> Article XXI. A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June, in the year one thousand eight hundred and fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter. In the census aforesaid, a special enumeration shall be made of the legal voters; and in each city, said enumeration shall specify the number of such legal voters aforesaid, residing in each ward of such city. The enumer-

ation aforesaid shall determine the apportionment of representatives for the periods between the taking of the census.

The house of representatives shall consist of two hundred and forty members, which shall be apportioned by the legislature, at its first session after the return of each enumeration as aforesaid, to the several counties of the commonwealth, equally, as nearly as may be, according to their relative numbers of legal voters, as ascertained by the next preceding special enumeration; and the town of Cohasset, in the county of Norfolk, shall, for this purpose, as well as in the formation of districts, as hereinafter provided, be considered a part of the county of Plymouth; and it shall be the duty of the secretary of the commonwealth, to certify, as soon as may be after it is determined by the legislature, the number of representatives to which each county shall be entitled, to the board authorized to divide each county into representative districts. The mayor and aldermen of the city of Boston, the county commissioners of other counties than Suffolk, — or in lieu of the mayor and aldermen of the city of Boston, or of the county commissioners in each county other than Suffolk, such board of special commissioners in each county, to be elected by the people of the county, or of the towns therein, as may for that purpose be provided by law, — shall, on the first Tuesday of August next after each assignment of representatives to each county, assemble at a shire town of their respective counties, and proceed, as soon as may be, to divide the same into representative districts of contiguous territory, so as to apportion the representation assigned to each county equally, as nearly as may be, according to the relative number of legal voters in the several districts of each county; and such districts shall be so formed that no town or ward of a city shall be divided therefor, nor shall any district be made which shall be entitled to elect more than three representatives. Every representative, for one year at least next preceding his election, shall have been an inhabitant of the district for which he is chosen and shall cease to represent such district when he shall cease to be an inhabitant of the commonwealth. The districts in each county shall be numbered by the board creating the same, and a description of each, with the numbers thereof and the number of legal voters therein, shall be returned by the board, to the secretary of the commonwealth, the county treasurer of each county, and to the clerk of every town in each district, to be filed and kept in their respective offices. The manner of calling and conducting the meetings for the choice of representatives, and of ascertaining their election, shall be prescribed by law.

II. THE SENATE AND THE COUNCIL.

The bases of apportionment for determining the membership of the upper branch of the Legislature and of the Executive Council have always been so closely related as to make it necessary to consider them jointly. By a peculiar provision of the Constitution of 1780 (Chapter 1, Section II, Article I, Part the Second), for a period of sixty years from its adoption there was no discrimination in the voting as between the Senate and the Council. That is, there were to be annually elected by "the freeholders and other inhabitants" forty persons, "to be called counsellors and senators," from districts into which the Commonwealth might from time to time be divided by the General Court for the purpose; and the General Court, in assigning the numbers to be elected by the respective districts, was to be governed "by the proportion of the public taxes paid by the said districts." It was further provided that the number of districts

should never be less than 13, and that no district should be so large as to entitle it to choose more than six senators. The first designation of the districts was made by the Constitution itself, as follows: —

> The several counties in this Commonwealth shall, until the General Court shall determine it necessary to alter the said districts, be districts for the choice of counsellors and senators (except that the counties of Dukes county and Nantucket shall form one district for that purpose) and shall elect the following number of counsellors and senators:

Suffolk	six.	York	two.
Essex	six.	Dukes County and Nantucket	one.
Middlesex	five.	Worcester	five.
Hampshire	four.	Cumberland	one.
Plymouth	three.	Lincoln	one.
Barnstable	one.	Berkshire	two.
Bristol	three.		

It will be noted that 40 persons were to be chosen "counsellors and senators," but the voters were not privileged to indicate which of the persons elected were to serve as councillors and which as senators, the ultimate division of those elected into the two groups being provided for in the following manner (Chapter 2, Section II, Article 2, Part 2): —

> Nine counsellors shall be annually chosen from among the persons returned for counsellors and senators, on the last Wednesday in May, by the joint ballot of the senators and representatives assembled in one room; and in case there shall not be found, upon the first choice, the whole number of nine persons who will accept a seat in the council, the deficiency shall be made up by the electors aforesaid from among the people at large; and the number of senators left shall constitute the senate for the year; the seats of the persons thus elected from the senate, and accepting the trust, shall be vacated in the senate.

It thus appears that the Senate was to consist of 31 members, while the Council was to consist of the nine persons selected as thus provided and the Lieutenant Governor.

Amendment Proposed by the Convention of 1820; Legislative Changes in Senatorial Apportionments.

Attention has been called on a preceding page to the Article of Amendment (designated as Article V) proposed by the Constitutional Convention which met in 1820, which undertook to effect a change in the basis of representation in the House. The draft of this article as agreed to by the convention, after some discussion, provided that there should be a Senate of 36 persons, elected in the same manner as then prevailed with respect to the election of the 40 councillors and senators, that is, by the inhabitants qualified to vote; while the Council was to consist of seven, instead of nine, persons besides the Lieutenant Governor, and they were to be chosen from among the people at large by the joint ballot of the senators and representatives. The councillors were to have the same qualifications in point of property and residence within the Commonwealth as were required for senators, — and which were not changed from those laid down in the original Constitution, — and not more than one councillor was to be

chosen from any one senatorial district. It will thus be seen that the effect of these provisions was to permit the people to vote for senators as such, and the Senate by this arrangement would consist of 36 members instead of 31, as hitherto; but the councillors were still to be chosen by the Legislature. The districts from which the senators were to be chosen were also, as hitherto, to be the several counties of the Commonwealth, the proposed amendment distributing the total of 36 among the several counties; and the provision that the number of senators to be assigned to each district should be based upon "the proportion of public taxes paid by the said districts" was also left unchanged.

As has been seen, the proposed article which embodied this arrangement was rejected by the people, so that it came to naught, and the original provisions of the Constitution of 1780 respecting the composition of the Senate and Council continued until the adoption of the Thirteenth Amendment in 1840, the basis of membership of the Senate remaining unchanged by the Twelfth Amendment, adopted in 1836, which affected the House only. On several occasions in the meantime, however, it was found necessary by the General Court to change the original distribution of the "counsellors and senators" among the several counties, first on account of the creation of additional counties[1] and then because of the separation of Maine in 1820. By Chapter 49 of the Acts of the legislative year 1793–1794 (approved February 24, 1794), the following apportionment was made: —

1. Suffolk County	4	10. Barnstable County	1
2. Essex County	5	11. Nantucket and Dukes Counties	1
3. Middlesex County	4	12. York County	2
4. Worcester County	5	13. Cumberland County	2
5. Hampshire County	5	14. Lincoln, Hancock, and Washington Counties	2
6. Berkshire County	2		
7. Norfolk County	3		
8. Bristol County	2	Total	40
9. Plymouth County	2		

For 1793 and every second succeeding year Plymouth was to have 2 representatives and Nantucket and Dukes together, 1; in the alternate years, Plymouth, Nantucket and Dukes together were to have 3 representatives.

By Chapter 97, Acts of the legislative year 1811–1812 (approved February 11, 1812), the above apportionment was superseded by the following: —

1. Boston, Suffolk County	5	10. Dukes and Nantucket Counties	1
2. Chelsea, Suffolk County and certain towns in Essex County	3	11. Certain towns in Worcester County	2
3. Certain towns in Essex County	2	12. Certain towns in Worcester County	2
4. Middlesex County	3	13. Franklin County	1
5. Certain towns in Hampshire County	1	14. Berkshire County	2
6. Certain towns in Hampshire County	1	15. York County	2
7. Plymouth County	2	16. Cumberland and Oxford Counties	3
8. Bristol and Norfolk Counties	4	17. Lincoln, Hancock, and Washington Counties	3
9. Barnstable County	1	18. Kennebeck and Somerset Counties	2
		Total	40

[1] Norfolk County, incorporated February 26, 1793; Franklin County, incorporated June 24, 1811; Hampden County, incorporated February 25, 1812.

Again, by Chapter 152 of the Acts of the legislative year 1813–1814 (approved February 24, 1814), another apportionment was made, as follows: —

1. Suffolk County	6	10. Berkshire County	2
2. Essex County	5	11. Norfolk County	2
3. Middlesex County	3	12. York County	2
4. Hampshire, Hampden and Franklin Counties	3	13. Cumberland County	2
5. Bristol County	2	14. Lincoln, Hancock and Washington Counties	3
6. Plymouth County	2	15. Kennebeck County	1
7. Barnstable County	1	16. Somerset and Oxford Counties	1
8. Dukes and Nantucket Counties	1	Total	40
9. Worcester County	4		

After Maine was set off as a separate state, the 40 "counsellors and senators" were distributed among the Massachusetts counties by Chapter 95, Acts of the legislative year 1821–1822 (approved February 21, 1822), as follows: —

1. Suffolk County	6	9. Berkshire County	2
2. Essex County	6	10. Bristol and Dukes Counties	3
3. Middlesex County	5	11. Plymouth County	2
4. Worcester County	5	12. Barnstable County	1
5. Norfolk County	3	13. Nantucket County	1
6. Hampshire County	2		
7. Hampden County	2	Total	40
8. Franklin County	2		

Still another apportionment was made by Chapter 155 of the Acts of 1832 (approved March 22, 1832), as follows: —

1. Suffolk County	6	9. Norfolk County	3
2. Essex County	6	10. Bristol County	3
3. Middlesex County	5	11. Plymouth County	2
4. Worcester County	6	12. Barnstable County	1
5. Hampshire County	2	13. Dukes and Nantucket Counties	1
6. Hampden County	2		
7. Franklin County	1	Total	40
8. Berkshire County	2		

Article XIII of the Amendments.

By the Thirteenth Article of Amendment, approved and ratified April 6, 1840, the cumbersome method of determining the membership of the Senate by eliminating from the whole number of persons chosen without distinction to be "counsellors and senators" nine who were to be designated as councillors, leaving a Senate of 31, was abandoned, the amendment providing that there should be a Senate of 40 members, and, in addition, nine councillors, to be chosen from among the people at large by joint ballot of the senators and the representatives. This amendment not only, as has been noted, substituted inhabitants as the basis of representation in the House instead of ratable polls, but eliminated the provision for apportioning the senators among the several districts on the basis of the "proportion of public taxes paid by the districts;" and it was provided that "no possession of a freehold or of any other estate" should be required as a qualification for holding a seat in the legislative body or the Executive Council. The article continued: —

> The Legislature, at its first session after this amendment shall have been adopted, and at its first session after the next State census shall have been taken,

and at its first session after each decennial State census thereafterwards, shall divide the Commonwealth into eight districts of contiguous territory, each containing a number of inhabitants as nearly equal as practicable, without dividing any town or ward of a city, and each entitled to elect one councillor; *provided, however*, that if, at any time, the Constitution shall provide for the division of the Commonwealth into forty senatorial districts, then the Legislature shall so arrange the councillor districts, that each district shall consist of five contiguous senatorial districts, as they shall be, from time to time, established by the Legislature. . . .

The apportionment of senators as well as representatives under the Thirteenth Amendment was thus to be determined by the Governor and Council for a period of ten years, in accordance with the number of inhabitants as ascertained by a census on the first day of May of the year 1840, and of every tenth year thereafter, and the several Senate districts then existing were to be permanent, but each district was to have at least one senator. The Council accordingly assigned the 40 senators to the several counties, and we read in the minutes of the meeting of that body for July 23, 1840, the following record of the manner in which this duty was performed: —

The returns of said Census declare the number of inhabitants in each of the Senatorial Districts to be as follows, viz.: —

Suffolk	86,161	Norfolk	50,804
Essex	94,748	Bristol	59,774
Middlesex	104,451	Plymouth	46,786
Worcester	93,462	Barnstable	31,662
Hampshire	30,392	Dukes County and Nantucket	13,372
Hampden	37,339		
Franklin	28,759		718,592
Berkshire	40,882		

This whole number (718,592) being divided by the number of Senators (40) gives $17,964\frac{32}{40}$ as the number of inhabitants entitled to one Senator in each District. Dukes County and Nantucket not having that number, we assign to that District one of the forty senators, pursuant to said amendment of the Constitution. We then deduct the population of Dukes County and Nantucket (13,372) from said 718,592, and one from the 40 Senators, and proceed to assign the number of Senators (from the remaining 39 Senators) to be chosen in each of the remaining 12 Districts according to the number of inhabitants in the same, the whole number of inhabitants after deducting 13,372 for Dukes County and Nantucket, being 705,220 — And we then find —

Suffolk	entitled to	4	Senators	and	a fraction
Essex	"	" 5	"	"	"
Middlesex	"	" 5	"	"	"
Worcester	"	" 5	"	"	"
Hampshire	"	" 1	"	"	"
Hampden	"	" 2	"	"	"
Franklin	"	" 1	"	"	"
Berkshire	"	" 2	"	"	"
Norfolk	"	" 2	"	"	"
Bristol	"	" 3	"	"	"
Plymouth	"	" 2	"	"	"
Barnstable	"	" 1	"	"	"
		33			
Assigned to Dukes County & Nantucket		1			
		34			

This leaves six Senators to be assigned, viz. — one to each of the Districts having the largest fraction — and those Districts are Suffolk, Middlesex, Hampshire, Franklin, Norfolk, and Barnstable.

And we therefore recommend that the number of Senators to be chosen in each District be assigned as follows, viz.: —

Suffolk	5	Norfolk	3
Essex	5	Bristol	3
Middlesex	6	Plymouth	2
Worcester	5	Barnstable	2
Hampshire	2	Dukes County and Nantucket	1
Hampden	2		
Franklin	2		40
Berkshire	2		

The record of the apportionment of senators as made by the Council for the decade[1] following the Census of 1850 runs as follows on the minutes of the meeting of July 18, 1850, the committee's report being duly accepted and approved: —

It appears by the Returns that the whole population of the State, on the first day of May was 973,715
deducting from this 13,195 for the District of Nantucket and Dukes, and there remains 960,520 and
this number divided by 39 gives 24,629 as the ratio for a Senator. Dividing the number in each County by this ratio, 36 Senators are obtained; add to this one Senator for Nantucket and Dukes, and there are three Senators to be apportioned to those three Counties having the largest fractions, which are Suffolk, Hampshire, and Barnstable. The Committee therefore apportion Senators to the Several Counties as follows, to wit

Counties	Population	Number of Senators
Suffolk	145,758	6
Essex	127,170	5
Middlesex	155,762	6
Worcester	126,565	5
Hampshire	34,290	2
Franklin	30,888	1
Hampden	50,224	2
Berkshire	48,937	2
Norfolk	77,441	3
Bristol	74,979	3
Plymouth	54,509	2
Barnstable	33,997	2
Nantucket and Dukes	13,195	1
Total	973,715	40

The Thirteenth Amendment, as we have seen, provided for a Council of nine members, to be chosen *from the people* at large instead of from the 40 persons hitherto elected as "counsellors and senators," of whom nine were to be chosen as "counsellors" by the joint ballot of the senators and representatives; but the sponsors of this amendment were not yet ready

[1] This plan was in actual operation for only seven years, or until the apportionment upon the new basis of legal voters as provided by the Twenty-second Amendment, ratified May 1, 1857, became operative.

to take the position that the members of the Council should be elected directly *by the people*, and their election still remained vested for fifteen years longer in the legislative body.

Article XVI of the Amendments.

It was not until the adoption, on May 23, 1855, of the Sixteenth Amendment that the process of democratizing the executive branch of the government was completed by the provision that the councillors (who by this amendment were reduced to eight in number) were to be annually chosen by the *inhabitants* of the Commonwealth qualified to vote for Governor. The article continued: —

> The legislature, at its first session after this amendment shall have been adopted, and at its first session after the next state census shall have been taken, and at its first session after each decennial state census thereafterwards, shall divide the commonwealth into eight districts of contiguous territory, each containing a number of inhabitants as nearly equal as practicable, without dividing any town or ward of a city, and each entitled to elect one councillor; *provided, however*, that if, at any time, the constitution shall provide for the division of the commonwealth into forty senatorial districts, then the legislature shall so arrange the councillor districts, that each district shall consist of five contiguous senatorial districts, as they shall be, from time to time, established by the legislature. . . .

The provision in the Sixteenth Amendment for the contingency of some future constitutional provision that the Commonwealth be divided into 40 senatorial districts — each to elect a senator — did not become operative until the adoption of the Twenty-second Amendment, so that the 13 counties (Dukes and Nantucket being counted as one) continued in the meantime each to constitute a senatorial district, the several senators to which each county might be entitled under the apportionment of the Council being elected by the voters at large within the respective counties.

Article XXII of the Amendments.

This article was proposed at the same time as Article XXI, relating to the membership of the House, being adopted by the Legislatures of 1856 and 1857, and was ratified and approved by the people on May 1, 1857, by a vote of 32,971 yeas and 4,342 nays, its provisions being still operative. Its text is as follows: —

> Article XXII. A census of the legal voters of each city and town, on the first day of May, shall be taken and returned into the office of the secretary of the commonwealth, on or before the last day of June, in the year one thousand eight hundred fifty-seven; and a census of the inhabitants of each city and town, in the year one thousand eight hundred and sixty-five, and of every tenth year thereafter. In the census aforesaid, a special enumeration shall be made of the legal voters, and in each city said enumeration shall specify the number of such legal voters aforesaid, residing in each ward of such city. The enumeration aforesaid shall determine the apportionment of senators for the periods

between the taking of the census. The senate shall consist of forty members. The general court shall, at its first session after each next preceding special enumeration, divide the commonwealth into forty districts of adjacent territory, each district to contain, as nearly as may be, an equal number of legal voters, according to the enumeration aforesaid: *provided, however,* that no town or ward of a city shall be divided therefor; and such districts shall be formed, as nearly as may be, without uniting two counties, or parts of two or more counties, into one district. Each district shall elect one senator, who shall have been an inhabitant of this commonwealth five years at least immediately preceding his election, and at the time of his election shall be an inhabitant of the district for which he is chosen; and he shall cease to represent such senatorial district when he shall cease to be an inhabitant of the commonwealth.

Part V.

BIBLIOGRAPHY OF MASSACHUSETTS CENSUSES.

(Arranged in Chronological Order of Publication.)

Old Census of Massachusetts. 1764–65. Printed in the "Columbian Centinel" of August 17, 1822, from original manuscript of Census of 1765. (See also below, Early Census Making in Massachusetts, 1643–1765.)

Census of Massachusetts. 1837. Returns of the Census of Massachusetts for 1837. Arranged in alphabetical order by counties. Arranged, in 1857, by Edw. W. Hinks, Clerk. Manuscript. Unpaged.

This volume is a collection of the documents returned by the assessors of towns and censors of cities showing the census of population taken under tne Act of March 21, 1837.

Population of Each Town and County in the State on the First Day of May, 1837. . . . From the Official Returns. Appendix to "Statistical Tables: Exhibiting the Condition and Products of Certain Branches of Industry in Massachusetts, for the Year Ending April 1, 1837." Boston, 1838. p. 205–209.

Statistical Tables: Exhibiting the Condition and Products of Certain Branches of Industry in Massachusetts for the Year Ending April 1, 1837. Prepared from the Returns of the Assessors by John P. Bigelow, Secretary of the Commonwealth. Boston, 1838. viii, 209, (2) p.

Statistics of the Condition and Products of Certain Branches of Industry in Massachusetts for the Year Ending April 1, 1845. Prepared from the Returns of the Assessors by John G. Palfrey, Secretary of the Commonwealth. Boston, 1846. vi, (2), 391 p.

Report on the Subject of the State Census of 1850 by the Special Committee of the Legislature of Massachusetts [Lemuel Shattuck, Chairman]: *presented April 7, 1849;* House Document No. 127, Session of 1849. Boston, 1849. 46 p.

This is a report of a committee appointed under an order of the House of March 23, 1849, "To inquire into the expediency of prescribing a plan for taking a state census of 1850."

A Census of Massachusetts, as Taken by the Authority of the Commonwealth in 1850. Arranged according to the Congressional Districts of the 32d Congress. Also a Statement of the Population of the Several Wards of the City of Boston as Ascertained by the Last State Census, Taken May 1st, 1850. Senate Document No. 16, Session of 1852. 7 p.

Abstract of the Census of the Commonwealth of Massachusetts, Taken with Reference to Facts Existing on the First Day of June, 1855, With Remarks on the Same. Prepared under the direction of Francis DeWitt, Secretary of the Commonwealth. Boston, 1857. xiii, 252 p.

In addition to the statistical returns of the Census of 1855 and descriptive text relating thereto, this volume contains (p. 194–201) a brief résumé of prior censuses.

Statistical Information Relating to Certain Branches of Industry in Massachusetts for the Year ending June 1, 1855. Prepared from Official Returns by Francis DeWitt, Secretary of the Commonwealth. Boston, 1856. xiv, 658 p.

A List of the Counties, Towns, and Cities in the Commonwealth, with the Census of Inhabitants in 1855, of Legal Voters in 1857, and the Last Decennial Valuation in 1850. In Manual for the General Court, 1858. p. 115–123.

In addition to this presentation of population may be found in the Manual (p. 103–114) Senate Districts as established by Chapter 309, Acts of 1857, with the number of legal voters in each district; Council Districts as established by Chapter 310, Acts of 1857; and Representative Districts as established by the County Commissioners of the several counties other than Suffolk, and the Mayor and Aldermen of the city of Boston, for the County of Suffolk, pursuant to the Twenty-first Article of Amendment of the Constitution and Chapter 308 of the Acts of 1857; with the number of legal voters in each district (according to the Census of 1857) and the number of representatives to which said districts are respectively entitled.

Census of Legal Voters for the Years 1857 and 1865, arranged in Parallel Columns by Councillors, Senatorial, and Representative Districts. Prepared by the Secretary of the Commonwealth. House Document No. 30, Session of 1866. 26 p.

Abstract of the Census of Massachusetts, 1860, from the Eighth United States Census, with Remarks on the Same. Prepared under the direction of Oliver Warner, Secretary of the Commonwealth, by George Wingate Chase. Boston, 1863. viii, 373 p.

This volume, besides containing the statistical returns of the United States Census of 1860 for Massachusetts and descriptive text relating thereto, gives (p. 216–237) the date of incorporation of each city and town in the Commonwealth, many of the original or Indian names of places previous to incorporation, changes in boundary lines; also (p. 237–240) a description of European Census Systems; (p. 240–245) the United States Census System; (p. 245–246) Census Systems of the several states of the Union; and (p. 250–283) a résumé of Massachusetts Censuses, including the returns of the Provincial Censuses of 1765 and 1776.

Abstract of the Census of Massachusetts, 1865: with Remarks on the Same, and Supplementary Tables. Prepared under the direction of Oliver Warner, Secretary of the Commonwealth. Boston, 1867. x, 315 p.

This volume, besides containing the statistical returns of the Census of 1865 and collateral text, contains (p. 172–175) descriptive matter relating to the early population of Massachusetts and Plymouth Colonies, dates of incorporation of early towns, and (p. 176–205) the Provincial Censuses of 1765 and 1776; a comparative table by counties and towns of the population as determined at the Provincial Censuses of 1765, 1776, the United States Censuses 1790 to 1860, inclusive, and the State Census of 1865, this table being an exhibit of the population for one hundred years; a table (p. 206) of computed population for each year from 1765 to 1867, compiled by Dr. Edward Jarvis; estimates (p. 207) of population for 1870, 1880, 1890, and 1900, also prepared by Dr. Jarvis; remarks (p. 209) on the State Censuses of 1840 and 1850; a table (o. 240–262) in which appear the State Census returns for 1840 and 1850; and (p. 220–234) numerous statistics of colored population and remarks on slavery in Massachusetts, etc.

Statistical Information Relating to Certain Branches of Industry in Massachusetts for the Year Ending May 1, 1865. Prepared from Official Returns by Oliver Warner, Secretary of the Commonwealth. Boston, 1866. xxv, 805 p.

Legal Voters in the Commonwealth of Massachusetts, as Exhibited by the Census of May 1, 1865. Arranged by Counties. Prepared by the Secretary of the Commonwealth. Senate Document No. 7, Session of 1866. 7 p.

The Census of Massachusetts: 1875. Prepared under the direction of Carroll D. Wright, Chief of the Bureau of Statistics of Labor. Boston, 1876–1877. 3 vols.

Vol. 1. Population and Social Statistics. 1876. lvii, 809 p.
Vol. 2. Manufactures and Occupations. 1877. lvi, 935 p.
Vol. 3. Agricultural Products and Property. 1876. xxxiii, 790 p.

A fourth volume of the results of the Census of 1875 was published as the Seventh Annual Report of the Bureau of Statistics of Labor (1876, xvi, 258 p.), and consisted of tabulations derived from what was known as the Individual Schedule relating to the condition of wage-earners and salaried persons.

In addition to the statistical returns of the Census of 1875 there is given in Vol. 1 (p. 733–774) a presentation of "Censuses of Population during One Hundred Years, 1776 to 1875, by Towns," and notes giving dates of incorporation, changes in names, area, population, etc., of counties, cities, and towns.

A Compendium of the Census of Massachusetts: 1875. Prepared by Carroll D. Wright, Chief of the Bureau of Statistics of Labor. Boston, 1877. vii, 321 p. Prepared under authority of Chapter 38 of the Resolves of 1877.

The Census System of Massachusetts for 1875. Edited and arranged for the Bureau of Statistics of Labor by Oren W. Weaver. Boston, 1876. xix, 165 p.

The volume contains the industrial statistics schedule and copies of all blanks used in taking the Decennial Census and Industrial Statistics of 1875, together with a sketch of the four preceding censuses taken under the authority of the State. The volume was prepared especially for the Centennial Exhibition at Philadelphia.

Census of Legal Voters for the Years 1875 and 1885, arranged in Parallel Columns by Councillor, Senatorial, and Representative Districts. Prepared by the Secretary of the Commonwealth. Senate Document No. 12, Session of 1886. 29 p.

The Census of Massachusetts: 1880. Compiled by authority of the Legislature, Chapter 26, Resolves of 1882, from the returns of the Tenth Census of the United States, by Carroll D. Wright, Chief, Bureau of Statistics of Labor. Public Document (1881) No. 15, Supplement. Boston, 1883. xxiv, 698 p.

The Census of Massachusetts: 1885. Prepared under the direction of Carroll D. Wright, Chief of the Bureau of Statistics of Labor. Boston, 1887–1888. 3 vols. in 4 pts.

Vol. 1. Parts 1 and 2. Population and Social Statistics. Part 1, 1887. xci, 685 p. Part 2, 1888. cxxxi, 1331 p.
Vol. 2. Manufactures, The Fisheries, and Commerce. 1888. ccxxxix, 1543 p.
Vol. 3. Agricultural Products and Property. 1887. lxii, 934 p.

Vol. 1 (p. 61–80) gives Censuses of Population, 1765–1885, by towns, showing the total population at each census (Colonial, United States, or State) and (p. 81–100) notes on the dates of incorporation, changes in name, area, boundaries, population, etc., for counties, cities, and towns.

The First Census of Massachusetts. By Samuel T. Green, M.D., Librarian, Massachusetts Historical Society. American Statistical Association Publications. New series, Vol. II. p. 182. Boston, 1891.

Census of the Commonwealth of Massachusetts: 1895. Prepared under the direction of Horace G. Wadlin, Chief of the Bureau of Statistics of Labor. Boston, 1896–1900. 7 vols.

Vol. 1. Population and Social Statistics. 1896. xiii, 865 p.
Vol. 2. Population and Social Statistics. 1897. xv, 810 p.
Vol. 3. Population and Social Statistics. 1899. xix, 597 p.
Vol. 4. Population and Social Statistics. 1900. xv, 1236 p.
Vol. 5. Manufactures. 1898. xv, 641 p.
Vol. 6. The Fisheries, Commerce, and Agriculture. 1899. xxvii, 883 p.
Vol. 7. Social Statistics and General Summaries. 1900. xxix, 287 p.

In Vol. 1 (p. 129–216) is given a presentation of the Censuses of Population, 1765–1895, arranged by counties and cities and towns, with dates of incorporation, changes in name, area, boundaries, population, etc.; and (p. 220–223) a tabular presentation

of the growth of the city of Boston from 1638 to 1895, giving figures for Boston proper, each of the annexations, and Boston with annexations.

Of the first four volumes of the reports of the Census of 1895, each entitled "Population and Social Statistics," Vol. 1 gives general statistics of population, families, and dwellings; Vol. 2, nativity, race, color, conjugal condition, and age statistics; Vol. 3, parent nativity, schools, and school property; and Vol. 4, statistics of occupations. Vol. 7, entitled "Social Statistics and General Summaries," gives in Part 1 a tabular presentation of employment and unemployment statistics, and in Part 2, statistics of scholars and students and of illiteracy; and a recapitulation of statistics for all occupations supplementary to the presentation of occupation statistics given in Vol. 4.

An Index to Occupations for Use in Census Work and Statistical Tabulations. Prepared by Charles F. Pidgin, Chief Clerk of the Bureau of Statistics of Labor. Boston, 1896. 300 p.

The classification scheme used in the tabulation of occupation statistics in the Census of 1885.

Census of the Commonwealth of Massachusetts: 1905. Prepared under the direction of the Chief of the Bureau of Statistics of Labor. Boston, 1908–10. 4 vols.

Vol. 1. Population and Social Statistics. 1909. cxviii, 981 p.
Vol. 2. Occupations and Defective Social and Physical Condition. 1910. xix, 393 p.
Vol. 3. Manufactures and Trade. 1908. lxviii, 294 p.
Vol. 4. Agriculture, The Fisheries, and Commerce. 1909. xxvi, 598 p.

In Vol. 1 (p. 803–902) is given the presentation of Censuses of Population, 1765–1905, with dates of incorporation, changes in names, area, boundaries, population, etc.

Opinion of the Justices of the Supreme Judicial Court upon the Questions Propounded by the Two Branches of the Legislature on the Division of the Commonwealth, under the Twenty-first and Twenty-second Amendments of the Constitution, into Senatorial and Representative Districts, May 27, 1886. Massachusetts Reports, Vol. 142, p. 601; also printed in city of Boston Document No. 133 for 1886.

Opinion of the Justices of the Supreme Judicial Court upon the Questions Propounded by the Two Branches of the Legislature on the Division of the Commonwealth, under the Twenty-first and Twenty-second Amendments of the Constitution, into Senatorial and Representative Districts, April 28, 1893. Massachusetts Reports, Vol. 157, p. 595.

Early Census Taking in Massachusetts. 1643–1765. With a reproduction of the Lost Census of 1765 (recently found) and documents relating thereto, now first collated and published by J. H. Benton, Jr. Boston. Charles E. Goodspeed, 1905.

The Population of Massachusetts as Determined by the Thirteenth Census of the United States, 1910. Arranged by Cities and Towns, Counties, and Congressional Districts; also the Population of Metropolitan Boston, with Certain Comparisons with Former Censuses; and Notes, with Statutory Citations, on Annexations, Changes in Boundary Lines, Place Names, etc., since 1900. Compiled by the Director of the Bureau of Statistics, pursuant to an order of the House of Representatives, January 6, 1911. Massachusetts House Document (1911) No. 1650.

Opinion of the Justices of the Supreme Judicial Court upon the Questions Propounded by the House of Representatives, March 24, 1915, Relative to the Power of the Legislature to Fix the Census Day. Massachusetts Reports, Vol. 220. 1914–15. p. 609. Also printed as House Document No. 1996 for 1915.

The Constitutional Convention. 1917. Bulletin No. 29. The Basis of the Apportionment of Representation in the Several States. Submitted to the Constitutional Convention by the Commission to Compile Information and Data for the Use of the Constitutional Convention. Boston. 1917. 28 p.

Census of the Commonwealth of Massachusetts: 1915. Prepared under the direction of Charles F. Gettemy, Director of the Bureau of Statistics, 1919. One vol. Issued also in separate parts, as follows: —

Part I. General Introduction and Population Tables; Alphabetical List of Unincorporated Villages, etc.; Notes, with Statutory Citations, on Annexations, Changes in Boundary Lines, Place Names, etc., since 1900.

Part II. Composition and Characteristics of the Population.
